

UNITED STATES DISTRICT COURT  
SOUTHERN DISTRICT OF OHIO  
EASTERN DIVISION

IN RE: E. I. du PONT de NEMOURS AND . CASE NO. 2:13-md-2433  
COMPANY C-8 PERSONAL LITIGATION .  
. COLUMBUS, OHIO  
. MAY 18, 2016  
. 10:00 A.M.

TRANSCRIPT OF THE CONTINUED PROCEEDINGS OF THE FINAL PRETRIAL  
CONFERENCE ON THE MOTIONS ON DEPOSITION DESIGNATIONS AND ADMISSIBILITY  
OF EXHIBITS BEFORE THE HONORABLE EDMUND A. SARGUS, JR., UNITED STATES  
DISTRICT CHIEF JUDGE

APPEARANCES FOR THE PLAINTIFFS:

J. MICHAEL PAPANTONIO, ESQ.; TIMOTHY O'BRIEN, ESQ.; GARY DOUGLAS, ESQ.; DAVID BUTLER, ESQ.; ROBERT BILOTT, ESQ.; REBECCA NEWMAN, ESQ.; MICHAEL LONDON, ESQ.; JON CONLIN, ESQ.; CHRISTOPHER PAULOS, ESQ.; JEFF GADDY, ESQ.; WESLEY BOWDEN, ESQ.; ASHLEY BRITTAINE-LANDERS, ESQ.; KATHY A. BROWN, ESQ.

FOR THE DEFENDANT E. I. du PONT de NEMOURS AND COMPANY:

DAMOND R. MACE, ESQ.; C. CRAIG WOODS, ESQ.; JOHN GALL, ESQ.; STEPHEN M. FAZIO, ESQ.; STEPHANIE E. NIEHAUS, ESQ., AARON T. BROGDON, ESQ.; JOHN BURLINGAME, ESQ.; NATHAN LEBER, ESQ.

LAURA L. SAMUELS, OFFICIAL FEDERAL COURT REPORTER  
(614) 719-3245

## Wednesday Morning Session

May 18, 2016

THE COURT: Okay. We finished up with the plaintiff's exhibits yesterday, and now we'll turn to the issues with the DuPont exhibits.

MR. O'BRIEN: Your Honor, Tim O'Brien for Mr. Freeman.

8 It may make sense at this juncture to address the  
9 supplemental filing on the pollution of the Ohio River and whether  
10 that passes *Daubert* muster for purposes of cross-examination.

11 THE COURT: Well, that was filed -- Tuesday? Monday?

12 MR. MACE: Monday night.

13                   THE COURT: All right. I just skimmed this. I am not  
14 prepared to make a decision. We can take a break, and I can  
15 review -- you haven't responded to it, right?

16 MR. O'BRIEN: Right. Remember at the last motion in  
17 *limine*, we said, well, if it was -- we would take a look at it and  
18 either make the decision to argue it orally or request briefing on  
19 it, and we think we are prepared to argue it. So whenever Your  
20 Honor has an opportunity, perhaps today, we can argue it.

21 MR. MACE: We think it's a tail wagging the dog. We  
22 should focus on the defense exhibits and then deal with that  
23 later, if Your Honor has time.

24 MR. PAPANTONIO: So much of the --

THE COURT: This is what -- you know, as a preliminary

1 issue, and that is how it ties into expert testimony, it seems to  
2 me there's a lot of argument to be made. It's completely  
3 collateral. It's what they call in criminal law an *et tu* defense,  
4 which is prohibited. But it is somewhat dependant on what's in  
5 front of me as far as the record.

6 How many of these documents would be involved with that  
7 particular issue would you say?

8 MR. MACE: I don't think any of these, judge.

9 THE COURT: Well, then that makes it easy, doesn't it? I  
10 mean you want a ruling on that issue --

11 MR. O'BRIEN: Well, there are a few documents in there  
12 about, I think about emissions into the river of nitrates, or  
13 something like that, to tie it into --

14 THE COURT: Well, you both flag me when we get to one of  
15 those --

16 MR. O'BRIEN: Yes, Your Honor.

17 THE COURT: -- and we will hold on that until I decide  
18 the motion.

19 MR. MACE: Yes, sir.

20 MR. BILOTT: Your Honor, there was one of the  
21 housekeeping issues from yesterday. One of the documents that  
22 came up, P1.535, which was a document that I think there was some  
23 discussion about, whether we could show that was actually produced  
24 by DuPont. And after the conference, I went back to our paralegal  
25 who was able to pull out the DuPont production letter from March

1           15, 2010, and the document was on a disk produced by DuPont in the  
2           *Rowe versus DuPont* prior C-8 production. And a paralegal went  
3           back, opened the disk, and the document was on that disk.

4           THE COURT: All right. Take a look at that and tell me  
5           if there's any disagreement, but, hopefully, that puts the matter  
6           to rest.

7           MR. MACE: And, Your Honor, what did counsel say?  
8           P1.535?

9           MR. BILOTT: Yes. I have a copy of the production letter  
10          if DuPont would like to look at that.

11          MR. MACE: Thank you very much, counsel. I appreciate  
12          it.

13          THE COURT: All right. So we'll just jump right in here.  
14          And this is going to be D.10. Let me see if I can group these. I  
15          want to first go through for what it's offered, and then I want to  
16          hear from, of course, the party objecting. So D.10, should we  
17          group this under something --

18          MR. MACE: You're looking at D.20, Your Honor. You're  
19          always ahead of us.

20          THE COURT: This is a document -- I remember this  
21          document from the trial. It's already been admitted, right?

22          MR. MACE: Yes, sir.

23          THE COURT: In the first trial. This was a letter to the  
24          union that is at the plant, right?

25          MR. MACE: Well, it's union at some of the other plants.

1 I don't think this is a union at this plant. But there's no doubt  
2 that this is on the public docket, and there is no doubt this was  
3 in DuPont's possession.

4 THE COURT: What was the issue here on the plaintiff's  
5 side?

6 MR. PAULOS: The issue here -- Your Honor, Chris Paulos  
7 for the plaintiff -- is that it is a letter addressed to Mr. Brian  
8 Lewis from the PACE International Union who represents workers at  
9 the 3M plant, and it was written by Elena Page from the Department  
10 of Health and Human Services. There is no evidence to suggest  
11 that this was in DuPont's file. On the face of the document, it's  
12 not addressed to somebody at DuPont. It's not discussing any --  
13 discussions with DuPont between DuPont and HHS. And there is no  
14 witness that DuPont has to either authenticate this or to confirm  
15 that it was received by Brian Lewis and to testify to the contents  
16 of the document.

17 MR. BILOTT: One clarification, Your Honor, as far as the  
18 production clarification. The 3M Bates number indicates that it  
19 was actually produced by The 3M Company in litigation, and then it  
20 was actually then produced to DuPont in that case years and years  
21 later.

22 THE COURT: Okay. All right.

23 MR. MACE: Three main points, Your Honor. One is you  
24 will recall this came up in cross-examination of the plaintiff's  
25 expert who was testifying about the state of the science as it

1           developed. So this shows the state of the science as NIOSH saw it  
2           as of 2001. It's a just a public document. Also --

3           THE COURT: That sometimes -- It's a letter, but it looks  
4           fairly official. What makes you say it's a public document as  
5           opposed to just a letter from -- I always think of this as a  
6           public report, which means that members of the public can find  
7           this, even if it's hard. It's out there. It's a public  
8           statement. Does it reach that level?

9           MR. MACE: I believe it does, Your Honor, and it's self  
10          authenticating with the Department of Health and Human Services.  
11          There's no contention that it's not authentic.

12          In terms of DuPont's possession, which you will recall we  
13          had this double issue last time, if DuPont was just presenting  
14          something to say the state of the science, we didn't have to show  
15          DuPont had possession of it. If we wanted to say it was something  
16          we had notice of, obviously, we will have to link it up.

17          THE COURT: This doesn't go to notice. It goes to the  
18          state of the science.

19          MR. MACE: It actually goes to both because counsel -- I  
20          will get a copy for you. As counsel has indicated, some of these  
21          documents were obtained and produced to DuPont. So it was the  
22          state of the science as of 2001. But then no later than 2004,  
23          June of 2004, it was in DuPont's possession because it was  
24          produced by Mr. Bilotto to DuPont.

25          MR. PAPANTONIO: Judge, the idea of the state of the art

1           is to suggest that the defendant understood what the development  
2         with the science was and that they relied on that knowledge.  
3         That's just not the case here. This is a -- This is a matter of  
4         simply going back and finding some documents that might agree with  
5         them in retrospect. That is not how state of the art is developed  
6         in a case like this.

7           MR. MACE: So we're going to be able to link that up,  
8         judge, with both on the state of the science with the defense --  
9         I'm sorry, with the plaintiff's experts who were cross-examined  
10        about this at their depositions and at trial the first time around  
11        and with Dr. Rickard in terms of DuPont having possession of this  
12        and considering it.

13           THE COURT: I think this goes for one thing and one thing  
14         only, notice after June 2 of 2004. That's the date this was sent  
15         by Mr. Bilott to counsel for the defendant. All right.

16           That takes us to 20.

17           MR. MACE: Yes, sir. If you want me to speak first or  
18         the plaintiffs to speak first?

19           THE COURT: This is a 2000 document. What is this about?

20           MR. PAPANTONIO: Judge, we will speak first on these  
21         documents. Chris, are you handling this document?

22           MR. PAULOS: Your Honor, this is Defense Exhibit D.20,  
23         and it's titled Documentation of Occupational Biological Limit  
24         Value, BLV, for 3M. We believe that this falls under the purview  
25         of the limiting instruction the Court has used in *Bartlett*

1                   regarding --

2                   THE COURT: In other words this, this has a standard in  
3                   it that doesn't apply in our case. It goes to historical  
4                   knowledge. And you want me to say that this is used to show in  
5                   general what DuPont knew at the time but not to in any way  
6                   contradict that the standard would apply in this case, right?

7                   MR. PAULOS: Yes, Your Honor. Also we're unsure when  
8                   DuPont actually received this document. It is a 3M, as you can  
9                   see, it is a restricted 3M internal document. It does bear a  
10                  Bates stamp from DuPont. But if they want to use it as notice,  
11                  they have to prove when they obtained it.

12                  THE COURT: Are you going to be able to tell that?

13                  MR. MACE: I will be able to tell that. But it's also  
14                  relevant on the state of the science, and it was one of the  
15                  reliance materials for several of the plaintiff's experts. This  
16                  is part of their backup data they were cross-examined about, and  
17                  it was admitted in the *Bartlett* case.

18                  THE COURT: It's a lot easier on what DuPont knew, we can  
19                  push it in that category, that's a simple issue. It's a little  
20                  harder when it comes to the general state of the science. But it  
21                  has got a DuPont number on it. It would be helpful if somebody  
22                  could testify as to when it was known to DuPont. But, otherwise,  
23                  at this the point I'm not going to exclude it. And I just note,  
24                  again, these were documents that were admitted in the last trial.

25                  All right. Then we get to 25. And this is a letter to

1 DuPont from the U.S. EPA. What's the issue here?

2 MR. PAULOS: All right. Your Honor, Chris Paulos for the  
3 plaintiff. This is a letter --

4 THE COURT: Let me break this -- There's a letter, and I  
5 noticed there was a press conference at the end. Is that the  
6 issue?

7 MR. PAULOS: Exactly. I believe this falls under the  
8 ruling that we had yesterday regarding press releases from public  
9 entities. There's also a --

10 MR. MACE: We have no problem with that, Your Honor. The  
11 letter itself is what was supposed to be --

12 THE COURT: The we'll delete the back part of this.

13 MR. PAULOS: The telephone conference -- or testimony,  
14 should I say, transcript that was provided we think --

15 THE COURT: One thing is that the jury would have no idea  
16 what an operator is on the telephone.

17 MR. MACE: So the document numbering doesn't get  
18 confused, judge, we may re-mark it with a -- I think it's already  
19 in the documents with just a letter, but we may refer to this as a  
20 different number at trial as just the letter.

21 THE COURT: All right. Okay.

22 MR. PAULOS: So the record is clear, I believe Your  
23 Honor's ruling is that what is marked as D.25, the only thing  
24 allowed in would be pages 25, 25 .2, 25.3.

25 THE COURT: Does that make sense?

1                   MR. MACE: I think it's just 25 and 25.1 is the letter,  
2 Your Honor. That's what -- we'll limit it to that.

3                   MR. PAULOS: Okay. We're fine with that.

4                   THE COURT: So the next document -- and correct me if I  
5 am wrong -- this is the case that resulted in the consent decree  
6 and the -- What are we calling it? We are at EPA? Penalty? It's  
7 in the consent decree language, but -- you can correct me if I'm  
8 wrong -- we're talking about the same matter, right?

9                   MR. MACE: It's related to the consent decree related to  
10 TSCA.

11                  THE COURT: So this is the order essentially denying  
12 summary judgment is the way it works out, right?

13                  MR. PAULOS: That's correct, Your Honor. We believe,  
14 based on your guidance at the MLI hearing, that this is an  
15 extraneous document. The only things coming in will be the  
16 memorandum and the consent order itself, and this would be the  
17 document secondary to those two documents that you said would be  
18 allowed in.

19                  THE COURT: What do you see as the probative value of  
20 this?

21                  MR. MACE: We believe that the plaintiffs are going to  
22 open the door to this with their experts because although you  
23 asked the parties to focus on the consent decree, you've already  
24 indicated you're going to let them talk about 558, although  
25 redacted, which is the government's internal consideration of

1           whether to enter into the settlement with DuPont. We believe the  
2 plaintiff's corporate conduct experts is anything similar to what  
3 they did in *Bartlett*, they're going to expand that farther and  
4 subject to cross --

5           THE COURT: I think you noticed, but the trouble this  
6 simply says this is disputed fact, and it's finding that the case  
7 has to go forward.

8           MR. MACE: But it's a disputed fact on the main -- what  
9 they're trying to argue is the main probative value of TSCA. They  
10 are saying that is not --

11           THE COURT: Right, but let me ask you this. Isn't this  
12 -- As I read this, this was DuPont's motion only.

13           MR. MACE: No, sir. There were cross motions.

14           THE COURT: There were cross motions. Everybody agrees  
15 to that?

16           MR. PAPANTONIO: Yes, sir.

17           THE COURT: So, in other words, the government was also  
18 denied -- in fact, that was the purpose of the summary judgment.

19           MR. MACE: That's true.

20           THE COURT: So your argument is it showed there was a  
21 disputed fact on both ends.

22           MR. PAPANTONIO: Judge, If I might be heard, what they  
23 want to do is retry whether or not the EPA's conduct was  
24 appropriate or not. That's not the issue of the consent decree.  
25 The consent decree order is a notice issued to tell them they are

1           doing things wrong; and as a result of them doing things, A,  
2           science has been stifled; and B, don't do it anymore.

3           And to go back and retry whether or not that's  
4           appropriate is a completely collateral issue.

5           THE COURT: There are couple ways this can be viewed. I  
6           want to drill down on that. I am concerned -- We have the same  
7           issue with the consent decree. I don't want to take the juror too  
8           far into another proceeding that isn't directly involved in this  
9           case but has some impact on it. And this takes us into having to  
10          explain to them what the notion of an accelerated decision means,  
11          summary judgment.

12          Are you thinking of using this primarily on cross?

13          MR. MACE: Yes, sir, primarily. And, again, it's going  
14          to depend on what the plaintiffs do with their experts. But we  
15          need to be able to rebut the fact. And Bartlett --

16          THE COURT: A simple issue, if an expert were to say,  
17          there is absolutely no basis and support for position X. And you  
18          could say, the judge said just the opposite. There was disputed  
19          issue of material fact.

20          MR. MACE: Well, we believe plaintiff's counsel is  
21          opening the door to this in opening statement. They are going to  
22          imply with the jury, and then with their experts, that the EPA  
23          believed that there was a reasonable support for the conclusion of  
24          a substantial risk for injury to health. That's exactly what at  
25          page 39 the ALJ determined was a genuine disputed issue of fact.

1           The jury is going to --

2           THE COURT: But the way you phrased that, the EPA didn't  
3 believe that because they served it.

4           MR. PAPANTONIO: That's right.

5           THE COURT: But there was no finding made to that effect.  
6 I want the jury to get this sort of in an unadulterated ruling.  
7 This was the claim of the EPA. It was not litigated to a final  
8 decision. And there was an agreement reached. That's sort of the  
9 long and the short of it, right?

10          MR. MACE: But the jury needs to be clear there was no  
11 finding of any material risk to health.

12          MR. BILOTT: This is addressed in the limiting  
13 instruction that you already agreed to before which outlined this  
14 was disputed, and it was resolved in this consent. Otherwise --

15          MR. PAPANTONIO: We're retrying --

16          THE COURT: What I mean is what you just said is pretty  
17 much what I just said. There was a proceeding. It was contested.  
18 It didn't go to a final decision. But there was a consent decree.

19          MR. BILOTT: Otherwise, if you allow in -- if we start  
20 allowing in this, then we would want the complaint in, and it's  
21 opening the door to all these documents.

22          MR. PAPANTONIO: Judge, and that's what they want, they  
23 want to retry --

24          THE COURT: I get it.

25          MR. PAPANTONIO: -- the EPA issue.

1                   MR. MACE: Only to the extent that they would want to  
2 present it to the jury as if they found against us.

3                   THE COURT: That isn't what happened. There was -- But  
4 what the EPA internally decided to bring this case, there is no  
5 question they will get to that part of it. This document can be  
6 used if the door is opened. We'll just leave it at that. We will  
7 have to see how the trial goes. And, you know, I want to be  
8 clear, move to use it before you do.

9                   MR. MACE: Yes, sir. Yes, sir.

10                  THE COURT: And then we get to the 64. What's the issue  
11 with 64?

12                  MR. PAULOS: Yes, Your Honor. This is a -- This is a  
13 letter to Mr. Stewart from Gary Viola. And there's some  
14 authentication issues with this, also Rule 106 issues. First,  
15 it's incomplete. It references a study that's not attached. It  
16 references a study we can't identify. And there's a lot of  
17 questions that are unanswered on the face of this document that  
18 cannot be answered by any other document that DuPont intends to  
19 introduce into evidence.

20                  THE COURT: So how do you see this document being  
21 offered?

22                  MR. MACE: Your Honor, it goes to government notice and  
23 that DuPont was speaking with the government agencies. Here the  
24 State of West Virginia, Department of Health and Human Resources,  
25 confirms the fact that they had a meeting with them. It's part of

1           the historical context of the context between DuPont --

2           THE COURT: To be precise, you're claiming this is a  
3           business record?

4           MR. MACE: Yes, sir.

5           THE COURT: I'm going to overrule. I let it in the last  
6           trial, so I'm going to be consistent and keep it in.

7           All right. And then D.92, this wasn't used, but it was  
8           submitted in the last trial.

9           MR. PAULOS: Yes, Your Honor. This is what appears to be  
10           3M lifetime drinking health advisory for PFOA, dated January 20 of  
11           2002. There is no author that's identified as to who wrote this.  
12           We don't know whether or not this is a draft. It also starts at  
13           page 2. So we don't know where page 1 is.

14           THE COURT: Do you have page 1?

15           MR. PAULOS: And there is no indication as to when DuPont  
16           came into receipt of this document.

17           MR. MACE: I do have page 1. I'm not sure why it doesn't  
18           appear there.

19           THE COURT: This is a summary?

20           MR. MACE: Page 1 has the signatures from 3M. This is a  
21           cover page.

22           MR. PAULOS: It was not produced to us.

23           MR. MACE: So I need to supplement. I'm not sure what  
24           happened with that, judge. But this is a document, Your Honor,  
25           that was considered by the plaintiff's expert. This was used in

1           cross-examination. It was used in --

2           THE COURT: If it's going to be used in cross, let me  
3           know. That's puts it into a different coloration. Is that how  
4           you see this document?

5           MR. MACE: Primarily, although Dr. Rickard will testify,  
6           as he did in the first trial, that he was aware of 3M's lifetime  
7           drinking water advisory.

8           THE COURT: So you do claim you have somebody with  
9           firsthand knowledge.

10          MR. MACE: Yes, sir.

11          THE COURT: As long as he testifies consistent with that,  
12         then this will be admitted it.

13          MR. BILOTT: Your Honor, I think this was subject to the  
14         limiting instruction --

15          THE COURT: Right. Anything that has -- I don't know how  
16         many times you want me to give the instruction. But any time that  
17         you have a report that's using a different standard than what the  
18         Science Panel found, I will consider giving that instruction.

19          MR. O'BRIEN: So, obviously, Your Honor, this will not be  
20         used in opening unless they know that Dr. Rickard is going to come  
21         and testify at trial.

22          MR. MACE: Well, we do know that.

23          THE COURT: He's your witness, so I am assuming. He'd be  
24         sure of that.

25          Let me go to the EPA fact sheet. That's Exhibit 101.

1           What's the issue here?

2           MR. PAULOS: Yes, Your Honor. We thinks this falls under  
3           your ruling regarding press releases from public agencies.

4           THE COURT: All right.

5           MR. MACE: This is a public document, Your Honor, on the  
6           EPA's website. It's not a press release. It's the facts as EPA  
7           saw them as of 2003.

8           THE COURT: We were calling the horse trade. If it's not  
9           traded here it may affect other exhibits. But it's probably right  
10          in between. It's not a Federal Register notice, but it doesn't  
11          have the flavor of a press release --

12          MR. PAPANTONIO: Judge, we will withdraw the objection to  
13          that document.

14          THE COURT: All right. So that will come in.

15          Then we get to 173. This is a letter from the --

16          MR. PAULOS: We're actually going to withdraw this -- our  
17          objections to this document as well, Your Honor.

18          THE COURT: That will come in without objection.

19          And we get to 180.

20          MR. PAULOS: Yes, Your Honor. This a letter from Walter  
21          Stewart -- apparently a letter from Walter Stewart to Gary T.  
22          Viola at the Department of Health and Human Services in West  
23          Virginia. It's missing enclosures that are specifically cited.  
24          It's an incomplete document. It's also -- This document does not  
25          show this was actually ever received by the Department of Health

1 and Human Services in West Virginia. This is a document that was  
2 produced by DuPont, but it doesn't appear to have actually been  
3 received by Health and Human Services. I think DuPont has to  
4 prove --

5 THE COURT: We have two exhibits, two attachments. Do  
6 you have those?

7 MR. MACE: We have the --

8 MR. LEBER: Yes, Your Honor, Nathan Leber for the  
9 defense. We do have a version with the attachments.

10 THE COURT: Okay have you seen those?

11 MR. PAULOS: We have not seen them. We were not  
12 produced -- or they were not produced to us.

13 MR. MACE: Actually, I think it's Defendant's Exhibit  
14 982.

15 THE COURT: Defense 982.

16 MR. MACE: Defense 982 had the attachments with it.

17 THE COURT: Let's hold that first issue, whether the  
18 attachments ought to be listed. We can address that when we get  
19 to the other exhibit.

20 Do you have any reason to think it wasn't received?

21 MR. PAULOS: Well, it's not produced with a WV DEP HHS  
22 Bates stamp. It's simply a letter that may have been sent or  
23 could have been sent, potentially a draft letter. We don't -- We  
24 don't know from this document.

25 THE COURT: You're not going to have a witness with

1 firsthand knowledge of the letter being sent, I'm going to guess?

2 MR. MACE: Well, it's in -- it's certainly a historical  
3 record. It comes from Mr. Playtis' file. He was involved in  
4 these issues. It was sent certified, return receipt requested.  
5 So this is not a draft.

6 THE COURT: I'm not inclined on that basis to exclude it,  
7 but we'll address the attachments when we get to the other  
8 exhibit.

9 MR. PAULOS: Would it be possible to get a limiting  
10 instruction to inform the jury that there is no evidence this was  
11 received by the WV DEP?

12 THE COURT: No, I don't think that that's warranted, but  
13 thank you.

14 MR. BILOTT: Just for clarification, when you say it's  
15 the same as 982, is 982 just the attachment or --

16 MR. MACE: No, Your Honor, 982 is the letter with the  
17 attachments.

18 THE COURT: Well, we're not going to put them in twice.  
19 So if I admit 928 with the attachments, we're going to delete the  
20 one we just went through.

21 MR. MACE: And I don't think 982 is in the stack of  
22 disputed exhibits because that issue did not come up. So we're  
23 not going to -- that will not come up later in the pile.

24 THE COURT: It's going to be admitted by agreement. We  
25 will strike the one we just went over.

1 MR. MACE: And we will make it 982.

2 MR. PAULOS: We would like to reserve our opportunity to  
3 object to the attachments once we're given the opportunity to  
4 observe them and evaluate them.

5 THE COURT: All right. Fair enough.

6 196, this is a DuPont memorandum. What's the issue here?

7 MR. PAULOS: Yes, Your Honor, it's titled DuPont  
8 Memorandum, October 26, 2006. There is no indication of who the  
9 author is. We believe that discusses the consent order and,  
10 therefore, falls under the Court's previous ruling regarding  
11 documents associated with the consent order or regarding the  
12 consent order. It's also an attack on general causation. And  
13 it's essentially an undisclosed expert report --

14 THE COURT: Well, the attack on general causation, we can  
15 pick it up with a limiting instruction again. Looking at this --  
16 Well, let me first ask: Are you going to have a witness who will  
17 testify as to the surrounding information, author, and so on, of  
18 the report?

19 MR. MACE: Yes, Your Honor, Dr. Rickard will have the  
20 background on this and the fact that he was involved in the  
21 preparation of it, summary of the --

22 THE COURT: That part disappears, all right.

23 MR. MACE: It goes to the state of the science as DuPont  
24 believed it as of this time in 2006.

25 THE COURT: So this is discussing matters with the EPA

1 and DuPont. I don't want this to go too far into negotiations or  
2 how either side viewed certain terms, just the science aspects of  
3 it.

4 MR. PAULOS: There are certainly sections of this  
5 document where DuPont is providing its opinion as to the terms of  
6 the consent order and how they feel about it. I think that should  
7 merit redaction.

8 THE COURT: On page 196.4 there is a reference to class  
9 action. That is also coming out.

10 MR. MACE: Your Honor, where were you at?

11 THE COURT: Under the header DuPont is already providing  
12 alternate water supply. The next section says class action.

13 MR. MACE: Okay.

14 THE COURT: But I'm assuming this would be consistent  
15 with Dr. Rickard's testimony anyway, and he would be able to say  
16 that he participated in the draft of this.

17 MR. MACE: Absolutely, Your Honor.

18 THE COURT: So it will be subject to the same --

19 MR. BILOTT: Your Honor, I'm sorry, actually the section  
20 about DuPont providing an alternate water supply, that is all  
21 about the class action settlement provision.

22 THE COURT: Where are you?

23 MR. BILOTT: On page 196.4.

24 THE COURT: So that that's the whole --

25 MR. BILOTT: .7.

1                   THE COURT: It talks about the settlement all throughout  
2 here. So at a minimum we take out anything involving the class  
3 action and settlement. Are you proposing anything more than that?

4                   MR. BILOTT: Providing the water at all was part of the  
5 settlement agreement.

6                   MR. O'BRIEN: That came in the trial the last time. The  
7 jury was notified by both evidence and the instruction of the  
8 Court that the efforts undertaken by DuPont with respect to the  
9 water supply filtration was because of and a result of the class  
10 action. So the jury was notified of that in the *Bartlett* trial.

11                  MR. MACE: Your Honor, you'll recall, I think it was a  
12 Friday ago, I had recommended that we enter into a stipulation,  
13 it's relevant for causation issues because Mr. Freeman started  
14 using the bottled water program at a point. And then his water  
15 was being filtered at a point. So he was having no further -- So  
16 it's highly relevant for the jury to know that fact.

17                  THE COURT: Yes, I mean I don't disagree. That's a fact  
18 that will bear on the issues of this case. But it will also be a  
19 fact that this was part of the settlement, right? So the question  
20 is how do we --

21                  MR. MACE: Actually, there were different issues there,  
22 Your Honor, because they had an earlier bottled water program --

23                  THE COURT: That was part of the settlement.

24                  MR. MACE: That was not part of the settlement.

25                  THE COURT: And he participated in that as far as you

1 know.

2 MR. MACE: I need to check the facts on this.

3 MR. PAPANTONIO: Judge, can I ask for this solution?

4 THE COURT: Sure.

5 MR. PAPANTONIO: Virtually every other paragraph begins  
6 with, for example human exposure, when DuPont entered into these  
7 discussions, etcetera, etcetera, it leads you to believe that  
8 something has been happening between the parties. Could we,  
9 rather than a ruling on this right now, have more time to really  
10 -- we needed to know what the Court's initial thought was. Our  
11 thought was that this was not tied up by anybody. Now it's  
12 represented that Rickard is going to do that. Having heard that,  
13 can we spend more time with this document, cleaning up that  
14 problem?

15 THE COURT: That, and you might also -- I don't know if  
16 this was on your list of proposed stipulations or not stipulations  
17 to this, but your proposed limiting instructions, this ought to be  
18 a topic as well.

19 And by the way, I understand there's going to be a few of  
20 these proposed limiting instructions you don't agree on?

21 MR. MACE: Yes, sir.

22 THE COURT: What I would like you to submit is what  
23 you've agreed on; and those that you haven't, give me plaintiff's  
24 version and defense version side by side, and we'll resolve them.

25 MR. MACE: I believe that was done Monday night, Your

1 Honor, in terms of the existing ones. Your Honor has referenced a  
2 few --

3 THE COURT: And I'm not accusing you, but I think I saw  
4 them on the docket.

5 MR. MACE: I thought you were just testing me again, Your  
6 Honor.

7 THE COURT: Conversation, not accusation.

8 MR. BROGDON: But we did get a mountain of exhibits, Your  
9 Honor. So --

10 THE COURT: All right.

11 MR. MACE: We have mentioned a few additional limiting  
12 instructions in the last couple of days, so there may be some  
13 additions to it. But I think there's about ten that have been  
14 submitted, most by agreement, but some that we've given you --

15 THE COURT: And I will resolve those before we start.

16 MR. PAPANTONIO: My thoughts are three quarters of that  
17 document we'll have to redact. So we just have to have time to do  
18 that.

19 THE COURT: That will be fine. We'll hold on this one.

20 MS. NIEHAUS: Let me just ask: Penny, did you get that  
21 e-mail that I sent this?

22 THE LAW CLERK: Yes. He was referring to the new ones  
23 that he had been talking about yesterday and today, the new  
24 limiting instructions that the parties have an opinion on.

25 MS. NIEHAUS: Okay. I just wanted to make sure it was

1 received.

2 THE LAW CLERK: Thank you, yes.

3 THE COURT: All right. Let's go to 200. And this is a  
4 letter from DuPont Safety Health and Environmental Manager to the,  
5 it looks like, Ohio Division of Drinking and Groundwater.

6 MR. PAULOS: And plaintiff is going to withdraw his  
7 objections to this document.

8 THE COURT: That will come in without objection.

9 Then we get to 209.

10 MR. PAULOS: Yes, Your Honor, this is a document we think  
11 has multiple problems that make it inadmissible, specifically  
12 hearsay within hearsay within hearsay that we think is incurable  
13 as well as self-serving hearsay regarding the results of the  
14 meeting between --

15 THE COURT: I can give you my heads up. I'm thinking the  
16 next-to-the-last paragraph on page 2, I have some serious problem  
17 with that. What else do you see as an issue?

18 MR. MACE: I am sorry, did you mention the last  
19 paragraph?

20 MR. LEBER: Next-to-the-last.

21 MR. PAULOS: Well, that's -- I believe Your Honor  
22 actually redacted that in the *Bartlett* trial in one of your  
23 previous rulings. So we would agree that that's a problematic  
24 paragraph and should be redacted.

25 There are statements that are unverifiable to the

1 plaintiff, including, the same information was also presented to  
2 Mr. William Packard, Manager, Lubeck Public Service District, on  
3 March 23.

4 THE COURT: I am sorry?

5 MR. PAULOS: That's the top paragraph on page 2.

6 Also it discusses charts that were used in the  
7 presentation, which are not attached to the document. So it's  
8 incomplete. We don't know what charts were provided to these  
9 people or if, in fact, they ever were.

10 THE COURT: So you are contending this is a business  
11 record, I assume?

12 MR. MACE: Yes, Your Honor, and there will be --

13 THE COURT: And you don't care about that  
14 next-to-the-last paragraph coming out? I'm going to order it  
15 anyway, but I thought I'd ask.

16 MR. MACE: Well, I preserve my objection because I think  
17 they could open the door to this, Your Honor, in terms of I have a  
18 witness testify to this with testimony, and they say, you're  
19 incorrect, you're mistaken and you're lying, I am entitled to get  
20 a contemporaneous document --

21 THE COURT: Again, if something like this comes up with  
22 something new at trial, you can always ask to revisit this. So  
23 that's always an option.

24 MR. MACE: So I will preserve my objection but note you  
25 are instructing us to redact it.

1                   THE COURT: Yes.

2                   And in terms of enclosures, were those exchanged?

3                   MR. LEBER: Your Honor, we found a version of 209 with  
4 attachments so we can provide those to the plaintiff.

5                   MR. PAULOS: Do you have a defense exhibit number?

6                   MR. LEBER: I'll have to check.

7                   THE COURT: Take a look at that. If you think that needs  
8 to be added, we can address that.

9                   MR. PAPANTONIO: Judge, especially the things with  
10 enclosures that we weren't provided the enclosures, we'd really  
11 like the time to look at those before we get a solid ruling on  
12 those. The enclosure itself could change the whole nature of the  
13 document.

14                  THE COURT: All right. I know you will do this, but make  
15 sure you get this resolved at least a few days before the trial.

16                  MR. PAULOS: Certainly. There are some other redactions  
17 that we will perhaps request or question --

18                  THE COURT: With this document that I have in front of  
19 me, I'd like to do these now.

20                  MR. PAULOS: All right. I'd call the Court's attention  
21 to the last paragraph on the first page, the last sentence, the  
22 presence off-site of very low concentrations of C-8 in the old and  
23 new Lubeck Public Service District Wells was also communicated to  
24 the regulatory agencies.

25                  Again, that's hearsay within hearsay that we are unable

1 to cross-examine a witness on as to whether that did in fact occur  
2 at this meeting, and it's a completely self serving statement to  
3 DuPont.

4 MR. MACE: Your Honor, I believe it's covered by the  
5 business records rule.

6 MR. PAULOS: That statement itself is not. The document  
7 is, but that statement contained in the document is not in a  
8 business record.

9 MR. BROGDON: I don't think it's relaying a statement of  
10 anyone else. It's a statement made in the document itself  
11 directly.

12 MR. PAULOS: It's talking about a statement that was made  
13 to Lubeck.

14 THE COURT: I get the issue. It's whether --

15 MR. MACE: It's just making a record of what happened at  
16 the meeting, Your Honor.

17 THE COURT: Right.

18 MR. MACE: It's not a hearsay statement. I mean that's  
19 the difference between the second -- the paragraph you have  
20 stricken that says, well received by the regulatory agency.

21 THE COURT: I get it. But this is laying right on the  
22 edge. If it's a matter of what happened at the meeting, but this  
23 also is talking about what happened outside of the meeting. So I  
24 don't think --

25 MR. MACE: Well, it is at the meeting.

1                   THE COURT: Here's what we're going to do. We're going  
2 to take out very low -- the very low language of this saying that  
3 -- take out the unfair prejudice by saying, the presence of  
4 off-site concentrations of C-8 were communicated. So the very low  
5 is coming out. Anybody who has personal knowledge of that, they  
6 can certainly testify to it.

7                   All right. That takes us over to 213. This is a letter  
8 from DuPont senior counsel to someone at GE Plastics. What's the  
9 issue here?

10                  MR. PAULOS: Your Honor, we believe that this is -- this  
11 has not been properly authenticated. Again, there is no evidence  
12 to suggest that it was indeed sent and received. It references  
13 the documents and e-mails that are not attached. And it is  
14 missing its attachments.

15                  THE COURT: All right. The response?

16                  MR. MACE: It's a business record, Your Honor, in terms  
17 of whether attachments are --

18                  MR. LEBER: We can provide those to the plaintiff. We  
19 have the attachments to 213.

20                  THE COURT: So the attachments, you'll take a look at and  
21 see if that changes anything. Otherwise, I am going to admit it  
22 as a regular business record.

23                  All right. 237.

24                  MR. MACE: This is similar to the one we just addressed,  
25 Your Honor. It was used in the last trial. It depends on what

1           they do with this whole consent decree with EPA regarding TSCA and  
2           how far they open the door to these things.

3           THE COURT: If you have any problem, we'll hold on  
4           this --

5           MR. PAPANTONIO: Judge, can I --

6           THE COURT: We'll see where the testimony goes. And if  
7           you intend to use it, we'll have a side-bar before you do.

8           MR. MACE: That's fine, Your Honor. I think that's  
9           right.

10          MR. PAPANTONIO: Judge, he's -- Mr. Mace has raised this  
11         a couple times; and since I'll be doing most of this, I think it  
12         would be very helpful for me to understand what he perceives as  
13         raising this issue or opening the door because the last time in  
14         trial, that was what we heard again and again. And I think it's  
15         helpful -- I'm not -- I am trying to think why I would ever open  
16         the door to the EPA -- or whether or not the EPA consent decree  
17         should be retried in this case. I simply -- I'm not going to do  
18         it. But I keep hearing that. And if there's something specific,  
19         I would like to know about because I think it will save the Court  
20         much time.

21          If you're saying to me, don't do this. If you do, I am  
22         going to do -- If you do A, I'm going to do B, that would spend a  
23         lot of time with the Court having to come down from the -- the  
24         judge having to come down from the bench and --

25          THE COURT: I'll tell you, my preference. Again, I want

1           the jury to know exactly what happened. There is a consent  
2        decree, and there was a complaint filed. But there was settlement  
3        in between. So we have all three steps that are important to a  
4        full understanding of what happened. DuPont didn't agree, but the  
5        EPA didn't make the accusations. The consent decree then says  
6        what it says.

7           MR. PAPANTONIO: Right, and that we dealt with in a  
8        limiting instruction. And I don't -- But I keep hearing this, if  
9        they open the door. I mean the simplicity of this presentation is  
10       overwhelming.

11          MR. MACE: Your Honor, you will see there is a dispute  
12        between the parties on the limiting instruction because you know I  
13        wasn't happy with it the last time, but we've tried to present it  
14        more clearly present this time what we think the issues were. And  
15        if you want --

16          THE COURT: Do you have a copy with you?

17          MR. MACE: I do have a copy because part of one of our  
18        objections on the limiting instruction as currently worded is that  
19        it's using language that is not in the consent decree.

20          MR. PAPANTONIO: Well, that gets at the issue --

21          THE COURT: Do you have a copy of the proposed --

22          MR. MACE: Oh, the limiters?

23          THE COURT: Of the limiters. That would be helpful if  
24        you have a copy of that by chance.

25          MS. NIEHAUS: I do. I'm going to warn you that it's

1 imprinted out funny on my copy because some of top cut off the  
2 letterhead. But I'm happy to share it.

3 THE COURT: Mr. Leber admitted that sort of language is  
4 on there.

5 MR. PAPANTONIO: So this, judge, does identify the  
6 problem here. And if we can clean up the limiting instruction,  
7 I'm fine with it. But this idea that some word is going to be  
8 spoken that, all of the sudden, is going to open up all this  
9 information, it is just not the case.

10 MR. MACE: Well, part of the issue, Your Honor --

11 MR. BILOTT: Just for clarification, is the judge being  
12 handed the --

13 THE COURT: The two versions are here. They are both  
14 here.

15 MR. MACE: Part of the issue, Your Honor --

16 THE COURT: Give me one second to skim this. I don't  
17 want to pretend I'm listening to you when I'm not. We'll see.

18 Well, you're not as far apart on this. There's a gulf  
19 here but not that wide. I am going to blend these two together.  
20 But substantively, they say the same thing. It's just really a  
21 matter of emphasis, how much detail would get into the complaint.  
22 I'll take a good hard look at it. But it still leaves us where we  
23 are in terms of opening the door and so on.

24 What I suggest is -- well, unless you're prepared to --

25 MR. MACE: We are. I don't think we've got chapter and

1           verse as to how he's going to do it. But clearly he did it in the  
2 last trial repeatedly, both he and his experts.

3           MR. PAPANTONIO: Your Honor, I have been doing this for  
4 35 years. I know when I open the door. I will be conscious of  
5 that.

6           THE COURT: What we will do, if anybody claims we have  
7 reached this point, we'll have a side-bar before anything changes  
8 on these preliminary rulings on evidence.

9           MR. MACE: Yes, sir.

10          THE COURT: All right. So that take us to 250, which is  
11 a transcript of a meeting.

12          MR. O'BRIEN: Right. This is an unsworn meeting  
13 transcript, and I agree that it can be used for impeachment and  
14 perhaps for purposes of eliciting it. So in impeaching  
15 Mr. Griffin, if they call Mr. Griffin, Mr. Hartten or Mr. Bossert  
16 if they call these gentlemen. But we can't send this back to the  
17 jury with this statement that is unsworn.

18          THE COURT: Is that how you intend to use this?

19          MR. MACE: That's primarily the use. I notice, by the  
20 way, Your Honor, it's listed on the Plaintiff's Exhibit list as  
21 well as P1.2257.

22          THE COURT: So potential cross-examination --

23          MR. O'BRIEN: Right.

24          THE COURT: -- and impeachment material, but that will be  
25 all at this point.

1                   So that takes us to 250.

2                   MR. PAULOS: I think that was 250.

3                   THE COURT: You're right. 295.

4                   MR. MACE: Finally got ahead of you.

5                   MR. O'BRIEN: Just so I'm clear on this, now --

6                   THE COURT: Which one are you talking about?

7                   MR. O'BRIEN: I'm sorry, on D.250, when I say -- I'm  
8 talking about cross-examination of the declarants, not  
9 cross-examination for all purposes. So it's cross-examination of  
10 the declarants --

11                  THE COURT: That's what I'm assuming --

12                  MR. O'BRIEN: Right.

13                  THE COURT: -- unless there's something that I am  
14 missing. But we'll have to take that as it goes.

15                  And 280.

16                  MR. PAULOS: Yes, Your Honor. This is another letter  
17 that is missing the attachments that are discussed in the body of  
18 the letter.

19                  THE COURT: All right. So you probably don't have those  
20 with you, but do you have the attachments?

21                  MR. LEBER: We do, Your Honor. We will provide those.

22                  THE COURT: So beyond that is there -- Are you going to  
23 -- You can reserve the final objection once you see the exhibits.  
24 But beyond that, is there anything in this document that we need  
25 to address now?

1                   MR. PAULOS: That was the predominant objection, to  
2 discussing work history with individuals.

3                   THE COURT: If there's no issue with the attachments, I'm  
4 going to admit it, but I'll let you take a look at the attachments  
5 first.

6                   MR. PAULOS: Thank you, Your Honor.

7                   THE COURT: And then we go to 295. This was admitted  
8 with some redactions last time.

9                   MR. PAULOS: That's correct, Your Honor. Again, this is  
10 -- This is a letter from DuPont to William Packard, the manager of  
11 the Lubeck Public Service District. There's no indication that it  
12 was actually received by Lubeck. It's got hearsay, multiple  
13 levels of hearsay, self-serving hearsay attachments that some are  
14 included.

15                  It also says on the bottom right-hand corner of the first  
16 page, it says, letter to GE Plastics Document 4, suggesting that  
17 this is a partial or a segment of a larger document --

18                  THE COURT: Refresh my memory, though. The Lubeck Public  
19 Service District had some wells. And didn't ultimately DuPont buy  
20 them?

21                  MR. PAULOS: That's correct, Your Honor.

22                  THE COURT: This letter would just indicate they're  
23 talking, right?

24                  MR. PAULOS: That's what this letter alleges.

25                  THE COURT: What do you see in here that you think ought

1 to be excluded? Because, otherwise, the fact of the negotiations  
2 and the purchase, that's not going to be in dispute.

3 MR. PAULOS: Well, in the second paragraph it says, we  
4 wish to point out that Jim Cox, the former Lubeck Public Service  
5 District Manager, made the initial contact late in 1986 to offer  
6 to sell the wells to DuPont.

7 We believe that is hearsay and should be excluded.

8 THE COURT: How do you feel about that, if it makes any  
9 difference?

10 MR. MACE: Well, Your Honor, it's a business record. It  
11 does have all the attachments. So on this specific point -- I  
12 mean that's a fact.

13 MR. LEBER: Your Honor, it's also an ancient document,  
14 1989.

15 THE COURT: What's -- I want to make sure if I am missing  
16 something. What does that do either way?

17 MR. PAULOS: Well, Your Honor, I would like to point out  
18 to the Court that this was redacted for Bartlett.

19 THE COURT: That line?

20 MR. PAULOS: The hearsay statements that were contained  
21 in this document were ordered to be redacted by the Court.

22 MR. MACE: I think that was for purposes of opening  
23 statement, and we never revisited it. I mean there were some  
24 things we did because we were on the fly right the afternoon  
25 before opening, but we do not think it should be redacted.

1                   MR. PAPANTONIO: Judge, to make it easy, with the  
2 redactions, we don't have objections on this if it comes in. But  
3 the hearsay issues have always been the type of self-serving  
4 material they want to get into the documents consistently, and  
5 this is one example.

6                   THE COURT: But this leads up to a deal between DuPont  
7 and the Lubeck Public System -- Public Service District. Again,  
8 if I'm missing something, tell me. Who's initiated the contact?  
9 Or it doesn't make any difference, does it?

10                  MR. PAULOS: Well, Your Honor, we think it's self-serving  
11 hearsay for DuPont to lay out -- or to create a document they  
12 simply put in their files. They can't prove it was ever sent or  
13 received by DuPont.

14                  THE COURT: Is it your contention that DuPont initiated  
15 this?

16                  MR. PAULOS: Initiated the contact with the Lubeck Public  
17 Service --

18                  THE COURT: To make the purchase of the wells?

19                  MR. PAULOS: No, I don't have any information to suggest  
20 that's what --

21                  THE COURT: I don't see any harm here. I'm not going to  
22 redact it. If I saw any, I would spend more time with it; but it  
23 will come in as is.

24                  So on to 301. It looks like minutes of a Health Advisory  
25 Board Meeting.

1                   MR. MACE: Yes, sir.

2                   THE COURT: What's the issue here?

3                   MR. PAULOS: Your Honor, it basically is an out-of-court  
4 statement by Chad Holliday, DuPont's CEO. We think it's hearsay,  
5 self-serving hearsay, and it should be excluded on those grounds  
6 alone. It doesn't appear to be a business document.

7                   MR. MACE: Well, it's a business record. We are going to  
8 use this with a witness that was at that meeting, Your Honor.

9                   MR. O'BRIEN: The problem is, Your Honor, it's like  
10 sending an expert report back to the jury. It's testimony back in  
11 the jury box.

12                  THE COURT: Here's what I recommend. Sometimes I think  
13 we stretch a little bit here. If you've got a witness who can go  
14 through all this independent of the document, you don't get to  
15 have them testify and get the document back summarizing what their  
16 actual in-court testimony is going to be. So why don't we leave  
17 it for that first. If the witness has a good recall of the  
18 meeting and it's something they can testify to, do you really need  
19 this?

20                  MR. MACE: Well, I guess, again, it would depend on what  
21 they try to do with that witness on cross-examination and whether  
22 we need to prove up that that did in fact happen with the  
23 contemporaneous documents.

24                  THE COURT: I'll put it in that category of redirect or  
25 rehabilitation. But I think we will just put that on hold, and

1           we'll see how the cross goes. So I am not excluding it yet, but  
2 I'm not admitting it yet.

3           All right. Exhibit 334.

4           Basically this last document tracks the principles that  
5 we have in a couple other exhibits, right?

6           MR. MACE: Well, to some degree, Your Honor. To some  
7 degree.

8           THE COURT: Then we get to 334.

9           MR. PAULOS: Yes, Your Honor, this is a letter to  
10 Mr. Bilott that we believe your ruling from the motion *in limine*  
11 hearing would exclude it.

12           MR. MACE: Well, Your Honor, what we heard your ruling to  
13 be is that we need to redact Mr. Bilott's name and leave the Taft  
14 name --

15           THE COURT: That's the short end of this. Now this is a  
16 point by point -- Well, it says -- This is a response to  
17 Mr. Bilott.

18           MR. MACE: Well, we can go through and wherever his name  
19 is --

20           THE COURT: That point is easy. We can take care of that  
21 without a whole lot -- In other words, what's left is a letter to  
22 the Taft, Stettinius & Hollister firm, but there's more than that.  
23 So that's the objection.

24           MR. PAULOS: That's correct. It's hearsay. We don't  
25 believe it fits any exception to the hearsay rule --

1                   THE COURT: So it's from the director of the Ohio EPA.

2                   Is that a record or statement of a public office?

3                   MR. PAULOS: Well, it's a letter to Mr. Bilott from the  
4                   director. This doesn't appear to be a report or does not appear  
5                   to be published anywhere publicly.

6                   THE COURT: You know, we were all kidding about the  
7                   ancient document rule. I think 803(8) needs some serious review.  
8                   But it says a record or statement.

9                   MR. O'BRIEN: Well, keep in mind the Ohio EPA and the CAT  
10                  Team were just an observer. They were not an active participant  
11                  as was the WV DEP. So they are a third-party observer to the CAT  
12                  Team report. So it's nothing they have undertaken. It's just  
13                  their local rank opinion about what the CAT Team did.

14                  MR. MACE: That's a total incomplete statement, Your  
15                  Honor.

16                  THE COURT: But I don't think their -- I want to get to  
17                  the rule. So the record or statement has to set out the office's  
18                  activities -- and these are all the -- they are connected by an  
19                  "or" -- or a matter observed while under a legal duty to report.  
20                  It excludes any criminal matters.

21                  Isn't that part of the office's activities?

22                  MR. O'BRIEN: But --

23                  THE COURT: It doesn't mean that they had to have done  
24                  anything.

25                  MR. O'BRIEN: It goes beyond that, it goes beyond what

1       they did, to: Here's what we think. Here's our opinion in  
2       response to a letter written by you, Mr. Bilott. And it's not  
3       being generated for the public. It's not. It's being generated  
4       for a very limited purpose. It's not fulfilling the obligation of  
5       the agency's office under 803(8). Instead, it's simply --

6                  THE COURT: Well, the trouble is one -- I mean there's --  
7       One of these parts, it says there has to be a legal duty to  
8       report. But it's connected by an "or."

9                  MR. O'BRIEN: Right.

10                 THE COURT: The other part is the office activities. And  
11       this would be an activity of the EPA, wouldn't it?

12                 MR. O'BRIEN: Not of the Ohio EPA. This is an  
13       observation. This is basically like they went and watched a  
14       movie. And they said, hey, this movie --

15                 THE COURT: They still have to report --

16                 MR. O'BRIEN: -- we thought it was a good movie.

17                 THE COURT: -- outlining their activities. The letter  
18       could say, we went to the movies today. That could be an activity  
19       arguably.

20                 MR. MACE: Well, the fact that the Ohio EPA did -- When  
21       they got letters from Taft challenging the CATT report, because  
22       we're going to come to another one that Your Honor let into the  
23       last trial as well --

24                 THE COURT: But the other problem is the Ohio River  
25       touches both states.

1                   MR. O'BRIEN: But I believe that it -- I may be wrong,  
2 maybe it's just Florida's version of the public records -- but  
3 isn't it imposed upon, a duty imposed upon, by law? They had no  
4 obligation. They had no regulatory requirement, per Mr. Stewart's  
5 deposition. Mr. Stewart said Ohio EPA had no regulatory purview  
6 over Washington Works.

7                   MR. MACE: That's because the air emissions came over  
8 into Ohio. The Ohio EPA did get involved, fully involved --

9                   MR. BROGDON: That's a separate subsection, Your Honor.  
10 The legal duty is a separate subsection.

11                  THE COURT: This is a fairly important document. So I  
12 don't know -- I know you have better things to do --

13                  MR. PAPANTONIO: We do.

14                  THE COURT: -- but a quick brief on this, if you don't  
15 mind? I don't think we need time for a reply, do we? So why  
16 don't we have simultaneous filings -- This is Wednesday. How  
17 about Monday?

18                  MR. MACE: By which day, Your Honor?

19                  THE COURT: Monday.

20                  MR. PAPANTONIO: We can do -- One thing that makes this  
21 particularly interesting is DuPont -- Ohio had no concept of what  
22 the CAT Team is about. If they brought an Ohio representative  
23 from right down the road to come testify about this, the  
24 cross-examination would be clear. It would be: You didn't know  
25 Staats, what she did with the CAT Team. You didn't know TERA.

1           You didn't know what she had actually been paid. All these are  
2           critical --

3           MR. MACE: And those are complete misrepresentations of  
4           what Ohio did because they were very actively involved in looking  
5           into the allegations that were being made and trying to protect  
6           the citizens of Ohio. These were all activities stated by a  
7           public office.

8           THE COURT: I am going to inject some Ohio history. Who  
9           owns the Ohio River? Is it Ohio or West Virginia?

10          MR. MACE: The line is pretty close to the Ohio side of  
11           the river.

12          THE COURT: Essentially the water side is all West  
13           Virginia. Do you want to know why?

14          MR. MACE: Not Aaron Burr, is it?

15          THE COURT: West Virginia was the state first, and they  
16           owned the river. When Ohio was created as a separate state, the  
17           river was already gone. So if you are going to go fishing when  
18           you're doing these trials in Wheeling, make sure you have a West  
19           Virginia license, not an Ohio license.

20          All right. 613. This is the CAT Team report.

21          MR. PAULOS: Correct, Your Honor, this is the final CAT  
22           Team report. We believe this requires a limiting instruction and  
23           also should not be going back to the jury under 803(18).

24          MR. MACE: Well, Your Honor, we don't mind the limiting  
25           instruction --

1                   THE COURT: The limiting instruction --

2                   MR. MACE: -- but when it was used, it was admitted in  
3                   the last case. It went back to the jury is my memory.

4                   MR. LEBER: It goes to notice, Your Honor,  
5                   reasonableness, conduct.

6                   MR. PAULOS: So does every 803(18) treatise ever cited.

7                   It doesn't mean it goes back to the jury. This is essentially an  
8                   undisclosed expert record, attack on general causation, as you  
9                   know, as corrected by a limiting instruction.

10                  THE COURT: Yes.

11                  MR. O'BRIEN: It's something that's beyond the ken of the  
12                  jury, and that's why it's treated, if at all, under 803 as opposed  
13                  to a substantive exhibit which goes back.

14                  MR. MACE: Your Honor, it's the facts regarding what  
15                  happened, what the activity of this committee was at the time. It  
16                  also rebuts their arguments that certain information wasn't  
17                  available. It has the notes from the committee and what their  
18                  deliberations were, and it goes through chapter and verse to rebut  
19                  these spurious allegations they're making.

20                  THE COURT: It's different than the learned treatise's  
21                  rule, the treatment of the science articles, because this is about  
22                  matters we're dealing with in this case. The other articles  
23                  wouldn't be like that.

24                  But it is not self evident to the jurors when they read  
25                  this. That's always my concern.

1                   MR. PAPANTONIO: Judge, here's the problem with that  
2 document. No limiting instruction overcomes that document being  
3 back there when one juror says, read this paragraph, and it looks  
4 like a causation issue. It looks like they are struggling with  
5 causation.

6                   THE COURT: I'm going to hold on this. I'm going to  
7 think about it.

8                   MR. MACE: Your Honor, you are holding whether it goes to  
9 the jury --

10                  THE COURT: Right --

11                  MR. MACE: -- not on whether it can be used.

12                  THE COURT: -- not as to testimony or admissibility.  
13 It's all going to be about whether it goes back to the jury or  
14 not.

15                  And then this is -- it is probably a little bit similar.  
16 You may want to wrap this into the briefing we're going to do with  
17 the next document, 614, is an inter-office communication also  
18 involving the Ohio EPA. It seems to me that would encompass what  
19 we just talked about, isn't it?

20                  MR. MACE: Well, it was submitted in the last trial, Your  
21 Honor. You will recall we actually gave you a copy -- actually  
22 gave you the original of the affidavit from the EPA saying that  
23 this was a true and accurate copy of the record within. We met  
24 all the elements for admissibility.

25                  MR. PAULOS: Actually, all this did was lay the

1           foundation for authentication. It did not clear up the hearsay  
2       issue, which this is internal documents --

3           THE COURT: You're going to brief this issue and this  
4       document, too. I don't think it's going to change the analysis,  
5       but it's going to be the same analysis as both.

6           Then we get to 615. This is a letter from Mr. Bilotto.  
7       We'll take his name out and leave Taft, Stettinius & Hollister.

8           MR. MACE: This was admitted in the last trial, Your  
9       Honor.

10          THE COURT: What's the issue here?

11          MR. PAULOS: Again, Your Honor, it's -- we think it  
12       contains hearsay statements and also contains Mr. Bilotto's name,  
13       is a letter directly to Mr. Bilotto.

14          MR. MACE: Your Honor, this was one that we have already  
15       agreed under Your Honor's ruling we will take Mr. Bilotto's name  
16       off. Look at the CC's. You will see this went to Ms. Heather  
17       Jones, who was another counsel representing DuPont. So this is  
18       notice and knowledge to DuPont and the fact that EPA -- I'm sorry,  
19       West Virginia DEP was standing behind the CATT report, was not  
20       making -- buying into the allegations being made, that this was  
21       somehow rigged or a conflict-of-interest proceeding, which is one  
22       of the plaintiff's main themes --

23          THE COURT: I understand the relevance. It's a bit  
24       argumentative, but I think it stands as a public document. This  
25       issue with the Ohio EPA doesn't arise here. This is the West

1                   Virginia DEP, and they obviously have jurisdiction over a village  
2                   of West Virginia.

3                   That takes us to 747. That means his name is coming out  
4                   of the document as well.

5                   MR. O'BRIEN: So we're clear on this redaction of  
6                   Mr. Bilotto's name, no argument can be made about a firm, in other  
7                   words, and Mr. Bilotto's firm received this letter.

8                   THE COURT: Yes. What I am trying to do is, consistent  
9                   with the motion *in limine*, to avoid any sort of connection that  
10                  was objected to in the motion. So the name comes off, but the  
11                  letters still comes in, unless there's some other issue with it.

12                  MR. O'BRIEN: No argument can be made to link up, oh,  
13                  that's Mr. Bilotto firm, and he's sitting right there at counsel's  
14                  table and he knows this.

15                  THE COURT: Actually, you're not planning on doing that,  
16                  are you?

17                  MR. MACE: Only if the plaintiffs open the door to it,  
18                  Your Honor.

19                  THE COURT: Well, that means to me the answer is no,  
20                  unless there's a side-bar or in advance of a jury discussion  
21                  before anybody does that. So I'm always satisfied with that.

22                  All right. 747.

23                  MR. O'BRIEN: Again, Your Honor, this is an incomplete  
24                  document. It also has a redaction that -- it redacts information  
25                  that DuPont in the letter itself says is relevant for notice to

1           public entities. So if anything, we would certainly like to see  
2           an un-redacted version of this document to determine its  
3           relevance.

4           MR. MACE: This is one, Your Honor, these issues were  
5           discussed, although I don't think it was offered to go back to the  
6           jury, it was used in the *Bartlett*, an ancient document, a business  
7           record, sent certified mail.

8           THE COURT: Well, I don't think that's the issue with the  
9           exhibit. The issue is the exhibit's redaction.

10          MR. PAULOS: The issue is there is no proof that it was  
11         actual was, if somebody typed "sent by certified mail" at the top  
12         doesn't mean it actually was put in the mail and was received by  
13         the person that it was addressed to.

14          THE COURT: I would be more focused, I would want to see  
15         the redaction before I make -- It's going to come in unless  
16         there's some redaction that you would like to address after you've  
17         seen the redaction.

18          MR. BILOTT: Your Honor, this is an issue that came up in  
19         the *Bartlett* case, and I think it is the same issue here, and that  
20         is this is not the complete attachment. And I believe that the  
21         Court had said that DuPont needed to attach a complete document  
22         that actually was attached to this letter if they wanted to use  
23         the letter, and that never happened in the *Bartlett* case. And  
24         that's the same document being presented again without the further  
25         attachment.

1                   MR. MACE: What your Honor's actually ruling was was that  
2 as long as we did not misrepresent, since things are displayed  
3 electronically anyway, as long we make clear any later part of the  
4 document, and we didn't misrepresent that it was only a two-page  
5 document.

6                   THE COURT: Right. But I don't remember -- Have not seen  
7 -- They've seen the attachments?

8                   MR. MACE: This one may be that this is the only version  
9 that exists now 25 years later.

10                  MR. BROGDON: Your Honor, we dealt with exhibits, I  
11 believe it was 1943 and 1937 the last time. I think that's what  
12 Mr. Bilotto is referring to. I don't know if it's the same one,  
13 but if it isn't, we can take a look and see that has been handled  
14 already.

15                  THE COURT: Find out as much as you can about this  
16 document.

17                  MR. BROGDON: We produced something the last time in  
18 *Bartlett*. I'm satisfied we can do the same thing this time.

19                  MR. BILOTT: The concern, Your Honor, was that this makes  
20 it appear as if this information was highlighted to the agency,  
21 when, in fact, this was within a very big document.

22                  THE COURT: I agree with that issue.

23                  MR. BROGDON: We gave them a more fulsome version that  
24 satisfied them the last time. We can do it again.

25                  THE COURT: I would recommend -- you know, I'm just

1 suggesting this, not ordering, this is a 100-page document. The  
2 jury knows that. I want them to know that. But whether you need  
3 to attach all 100 pages or not, I will leave that up to your  
4 judgment. That may be overkill.

5 All right. So that one, until you have seen the  
6 attachments, we're going to hold on that. That's 749.

7 750.

8 MR. BILOTT: I believe that was 747, Your Honor.

9 THE COURT: I am trying to just stay ahead of you here.

10 747.

11 MR. PAULOS: Your Honor, I believe this is hearsay.  
12 There's no evidence that this was in DuPont's possession. This is  
13 a letter from Amy Swann from the Public Service Commission in West  
14 Virginia to --

15 THE COURT: Wait a minute. Am I on the right --

16 MR. MACE: That's 749.

17 THE COURT: Now I'm on 749.

18 MR. PAULOS: It's a letter from a DuPont employee to a  
19 non-DuPont employee. It's not -- There's no indication that this  
20 was ever in DuPont's possession. And there's, again, no evidence  
21 that this was actually sent, received. There is no witness that  
22 we can ask to authenticate this or to examine as to the contents.

23 MR. O'BRIEN: And it's incomplete.

24 MR. LEBER: Your Honor, this is an ancient document. It  
25 shows that DuPont was communicating with the government regarding

1 C-8.

2 MR. PAULOS: Your Honor, the letter also references to  
3 test results that aren't appended to this document.

4 MR. PAPANTONIO: That aside, judge, this is a document  
5 floating out somewhere. That -- The idea of issues like what are  
6 we talking about, state of the art, what we're talking about is  
7 historical narratives, whatever, there has to be some connection  
8 up to have this arbitrary document floating around and say, well,  
9 gee, we want to use this document because it's ancient now we're  
10 in trial in 2016, that's not -- That is not the spirit of --

11 THE COURT: Let me ask you this. If this had with it a  
12 seal of a record keeper, does that allay the issue?

13 MR. PAPANTONIO: I don't think that this fixes it either,  
14 judge. This is not something that -- This is merely a  
15 conversation between -- an arbitrary conversation.

16 MR. O'BRIEN: Your Honor, the other issue --

17 THE COURT: Whether DuPont had it.

18 MR. O'BRIEN: Right. The other issue is Mr. Stewart, who  
19 was the environmental controller at DuPont, actually during this  
20 time frame, he testified in his deposition that C-8 was not  
21 regulated as a VOC, which is a volatile organic compound.

22 This document, I don't see C-8 anywhere on it. They talk  
23 about VOCs. And what they want to get to is the second page, that  
24 very first line reads, in view of the fact that there is no known  
25 health hazard --

1                   THE COURT: Let's go back. Does VOC include C-8?

2                   MR. O'BRIEN: No, it should include per Stewart because I  
3                   asked him that question about VOCs.

4                   THE COURT: Let's stay with that limited issue. There  
5                   are several issues here.

6                   MR. MACE: The fact is that C-8 is a VOC. It's not very  
7                   volatile, but it is a VOC. But more importantly it does refer to  
8                   FC-143 in the last paragraph, which is C-8.

9                   THE COURT: Let me back up. So there's some -- one or  
10                  two easy issues, and then they get harder. The first is -- I  
11                  guess the blunt question is how does -- If this were in DuPont's  
12                  file and they had notice of this letter, that would go to their  
13                  historical knowledge. But it doesn't sound to me that you can say  
14                  that on DuPont's side.

15                  MR. MACE: I can't say that sitting here.

16                  THE COURT: All right. So then the second question would  
17                  be: Is it a public record and --

18                  MR. MACE: Which the Lubeck Public Service District is a  
19                  state entity. Unlike Little Hocking, which is a separate,  
20                  incorporated company, this is a --

21                  THE COURT: So this is guarantied by a record keeper or  
22                  at least get it under seal of the public body. I assume you can  
23                  do that. That solves that issue.

24                  Then the question becomes: What's the relevance?

25                  MR. MACE: Although we say, Your Honor, because it's on

1           the letterhead of the organization, it's self authenticating  
2           because of the letterhead and it has got the right people on it,  
3           there's no genuine issue raised --

4           MR. O'BRIEN: It does because --

5           MR. MACE: I'm still speaking, counsel. Ancient document  
6           takes care of both.

7           THE COURT: A letter and a seal does makes it nice and  
8           clear. That issue is fixable. That's not really the question.  
9           The question is relevance.

10          MR. O'BRIEN: Right, relevance and how do you link it up?

11          THE COURT: I'm talking about authentication. Now  
12          relevance.

13          MR. O'BRIEN: The relevance is what is it? It's a  
14          conversation between two people. It was never in the public's  
15          sphere. It was never in the ken or the knowledge of DuPont. So  
16          how is it relevant? Particularly since it contains opinion  
17          testimony -- or opinion statements.

18          MR. MACE: It rebuts the allegation claim being made by  
19          plaintiff's counsel and their experts that DuPont did not have any  
20          contact with the government entities or the water suppliers, never  
21          told them anything. Here's a contemporaneous document that comes  
22          up in June of '89. There were such disclosures.

23          MR. O'BRIEN: But the problem is in this document,  
24          they're referring to documents that is not in this document.

25          THE COURT: Let me back up. So I think there's a bit of

1 stretch here. This is not a document from a DuPont file. It is  
2 not addressed to DuPont. I'm going to assume -- For example,  
3 there are attachments that the letter said they were received from  
4 DuPont. That's an easy way to get at what DuPont sent to them,  
5 rather than to a document that they didn't receive, didn't author  
6 and didn't have in their files.

7 MR. PAPANTONIO: Judge, there are just -- This is a class  
8 of documents that they want to get in. It's broader than this  
9 one. It is to suggest that they can simply grab a document that  
10 has somehow surfaced in history and say, we move that in --

11 THE COURT: I'm taking a broad view about the historical  
12 knowledge of DuPont. That -- we have already dealt with that.  
13 But that isn't in that category. At this point I am going to  
14 exclude this document. I also want to know this is not the same  
15 water district that the plaintiff is involved with either. So,  
16 again, if DuPont had been CC'd on that, I would probably have a  
17 different view.

18 All right. Now we are to 750.

19 MR. PAULOS: Yes, Your Honor, this is another internal  
20 memorandum from DuPont that summarizes meetings that they've had  
21 with regulators and contains basically a summary of hearsay  
22 statements that were made to the regulators.

23 If you look at page 2 and 3, you'll see that there's  
24 statements attributed to a gentleman named Chaney and McCoy and  
25 other members that were alleged to have been at this meeting

1           between WV DNR and DuPont, and it summarizes statements that were  
2           made at that meeting, and that makes this hearsay within hearsay.  
3           And there's no witness that we will be able to examine as to the  
4           accuracy of DuPont's reflections in this document.

5           MR. MACE: Your Honor, it's a business record. It's also  
6           -- It was admitted in the *Bartlett* trial without any redactions.

7           THE COURT: Well, let's start with it's a summary of a  
8           meeting. I would start with the idea that that is a business  
9           record.

10          But the real question is whether there's hearsay within  
11         hearsay. The first hearsay is the exception for a business  
12         record. And do you want to point to me what your contention is  
13         the hearsay within the hearsay is saying?

14          MR. PAULOS: Well, there's, first of all, there are  
15         self-serving statements in here. First of all, the first page at  
16         the bottom, we felt that the technical data presented was strong  
17         enough that Dr. McCoy is considering re-evaluation of the WRS  
18         position on the Letart Landfill and that a five year permit is  
19         possible for the facility.

20          And is rank speculation about what a non-DuPont employee  
21         may or may not be thinking.

22          Look at page 2, top paragraph, it says, our long history  
23         of complying with surface water and solid waste regulations and  
24         making timely permit applications and modifications was  
25         recognized.

1                   By who? And how was it recognized? The recognition  
2                   itself is hearsay.

3                   They also state that they derived comfort -- some comfort  
4                   from this. Again, speculation as to what other people are feeling  
5                   or how they reacted to the representation.

6                   It also references MSDS sheets for Teflon and FC-143 were  
7                   reviewed in detail. This is not appended to this, and we have no  
8                   opportunity to determine what MSDS sheets or complete MSDS sheets  
9                   were presented.

10                  Further on down in the last paragraph it says, the WV-DNR  
11                  representatives agreed that treatment was not necessary. That is  
12                  hearsay. It's not curable.

13                  THE COURT: Where is that?

14                  MR. PAULOS: This is the last paragraph on page 2. The  
15                  WV-DNR representatives agreed that treatment was not necessary.  
16                  One ppm FC-143 was not an issue. One ppm is equivalent to  
17                  discharge of about 140 ppy FC-143 from the sedimentation basin to  
18                  the Ohio River.

19                  THE COURT: All right.

20                  MR. MACE: Your Honor, this is a classic business record  
21                  reporting a meeting that was conducted between DuPont and these  
22                  representatives of a public agency. It's an ancient document as  
23                  well. It's reporting on what happened at the meeting.

24                  THE COURT: Well --

25                  MR. MACE: It came in in *Bartlett* without any redactions.

1                   THE COURT: Here's my view. It starts with this is a  
2 business record. In addition, it's an ancient document. But that  
3 gets by the first of several gates here.

4                   Within that, I think we all understand from evidence  
5 class that some of this within this to say, and then she told me  
6 X. That's hearsay within hearsay. That's going to be out.

7                   There are actually several of these, and there are a  
8 couple of opinions in here that need to come out. The first page,  
9 the last paragraph, is going to come out. That's the opinion.  
10 The first paragraph on the second page comes out.

11                  MR. MACE: Your Honor, the point that counsel made was to  
12 "was recognized." If we could limit the redaction to the "was  
13 recognized"?

14                  THE COURT: It's all going to come out.

15                  Then the last paragraph of the second page, what was said  
16 by -- Now this I want to be specific on. WV-DRN --

17                  MR. MACE: Where are you at, Your Honor? Okay. WV-DRN.

18                  THE COURT: Agreed that treatment was not necessary. All  
19 right. That is probably hearsay within hearsay. But what it also  
20 is is some sort of notice to DuPont or knowledge of DuPont. So  
21 that's stays in. That's a statement that's reported, which  
22 otherwise would be hearsay. But when it comes to the issue of  
23 notice, that a different rule applies. All right. So that takes  
24 us through 750.

25                  We will go to 758.

1                   MR. PAULOS: Your Honor, real quickly, on page 2 of the  
2 paragraph regarding MSDS sheets, the statement, all important  
3 issues, including biopersistence and the accumulation of FC-143 in  
4 the blood of humans were mentioned.

5                   THE COURT: Back me up for a second. I think there are  
6 several of these. Are you back on the --

7                   MR. PAULOS: This is page 2. It's the center --

8                   MR. PAPANTONIO: He's on the prior document.

9                   MR. PAULOS: The sixth bullet point, page 2 of 750.

10                  MR. MACE: They are describing what they did, Your Honor.  
11 They are not describing what anybody else is saying.

12                  THE COURT: I think that's going to stay in.

13                  MR. PAULOS: And on page 3, there's an entire section of  
14 things, Mr. Chaney contributed the following comments. All of  
15 that is hearsay within hearsay.

16                  THE COURT: He is --

17                  MR. PAULOS: On the first page, David Chaney is a permit  
18 writer, a geologist.

19                  THE COURT: Department of Natural Resources.

20                  MR. MACE: We don't need that bullet point, Your Honor.

21                  THE COURT: So that will all come out. All right.

22                  MR. PAULOS: Last -- I'm sorry, Your Honor, the last  
23 bullet point on page 3, the meeting was adjourned on a friendly  
24 basis with the permit writer saying, quote, when he prepared our  
25 permit, unquote. He was already thinking of the fact sheets --

1 MR. MACE: We don't need that bullet point, Your Honor.

2 THE COURT: Where was that?

3 MR. MACE: The very last bullet before path forward.

4 THE COURT: That's out, too.

5 MR. MACE: Yes, sir.

6 THE COURT: All right. Then we get to 758, C-8

7 investigation reports.

8 MR. PAULOS: We believe this falls under the purview of  
9 your ruling or of the trade horse -- or the horse trading  
10 agreement about press releases and statements about public  
11 entities websites.

12 MR. MACE: This is not a press release. This is  
13 information that's posted on the West Virginia website. Self  
14 authenticating. It's not a press release.

15 THE COURT: Here's the only -- Are you -- It lists  
16 documents here.

17 MR. MACE: We don't need those listed, Your Honor.

18 THE COURT: I was afraid they would make the jury guess.

19 MR. MACE: We don't need the documents.

20 THE COURT: How about also consider deleting the  
21 documents of the reports?

22 MR. MACE: Yes, sir.

23 THE COURT: So if we are -- All right. This will have a  
24 date on it, of course, right? It's somewhere on here.

25 MR. MACE: It's up at the upper left corner, Your Honor.

1           8-25-13. Okay. It got cut off of that one. That's part of the  
2 copying.

3           THE COURT: Put the date in.

4           MR. MACE: Okay.

5           THE COURT: Otherwise, I'm inclined to admit it. It will  
6 be admitted.

7           Now we get to the Responsible Care Team. Refresh my  
8 memory what that group is.

9           MR. MACE: Your Honor, starting in the 1990s, DuPont had  
10 two different organizations that it set up. One was the Employee  
11 Responsible Care Team, where different employees of the plant met  
12 with management, expressed any concern that were addressed but  
13 they were separate.

14           But at the same time they had the Community Responsible  
15 Care Team that had a representative of Lubeck and various other  
16 community members on the team. They are given tours of the plant.  
17 They are free to raise whatever issues they wanted to, any  
18 concerns they had. Information was given to them about what was  
19 going on at the plant.

20           But the relevance of this particular document is in  
21 January of '00, they discussed C-8 with this Community Responsible  
22 Care Team. So this is long before Mr. Bilott ever filed the *Leach*  
23 lawsuit, long before he wrote to any of the agencies. The fact  
24 that DuPont was in fact communicating with community members about  
25 C-8 long before the lawsuits is highly relevant. That's over,

1           Your Honor, at page .5 with the C-8 update, an update being that  
2           it was discussed before.

3           THE COURT: Well, I mean to skin this a little bit back.  
4           I take this to mean that they were involved with the community as  
5           far as C-8. That's really the long and short of what this goes  
6           to.

7           MR. PAPANTONIO: We are going to withdraw our objection.

8           MR. PAULOS: We are withdrawing our objections to 768 and  
9           767.

10          THE COURT: So the jury will hear about the turkey  
11           population increasing.

12          MR. PAULOS: We thought this was important for them to  
13           know.

14          THE COURT: All right. That will all come in.

15          MR. BILOTT: The lawsuit was in 1999. It was after the  
16           lawsuit.

17          THE COURT: I actually caught that. You're educating me  
18           as we go.

19          768 this is another --

20          MR. MACE: They withdrew that.

21          THE COURT: -- in response to the turkey. That's in.  
22           Then we get to 852.

23          MR. PAULOS: This, Your Honor, is a power point that was  
24           prepared by Dr. Rickard for the Epidemiology Review Board. It  
25           contains multiple levels of hearsay. It has 23 plus citations to

1           803(18) documents, treatises, studies that were either published,  
2           not published, that were in progress. Basically it represents  
3           Dr. Rickard's cherry picked toxicology studies summarized and  
4           cited. We think if anything, if the Court is inclined to admit  
5           this, it certainly should not go back to the jury. Basically it's  
6           a demonstrative exhibit for Dr. Rickard's testimony.

7           MR. O'BRIEN: As a power point, it was --

8           THE COURT: Well, this was back in '06. And I assume you  
9           offered this, so you're going to use this in his direct testimony.  
10          Is that the plan?

11          MR. MACE: Yes, Your Honor. I will point out it was  
12          admitted in *Bartlett*. It's one of the plaintiff's exhibits. It's  
13          in the backup materials for Petty, Ampter and Siegel. It's a  
14          document used by the plaintiff's experts in coming up with their  
15          opinions. I do intend to use it with Dr. Rickard and potentially  
16          on cross of the plaintiff's experts.

17          THE COURT: He's going to come in and talk about the  
18          history and what DuPont knew and so on. He's going to -- Do you  
19          expect him to go through every page -- pretty close to every page  
20          of this?

21          MR. MACE: Not every page, but there's -- the plaintiffs  
22          are making some arguments about the Epi Review Board, not being  
23          properly informed about C-8. The fact that Dr. Rickard met with  
24          the Epi Review Board and did go over the information is highly  
25          relevant --

1                   THE COURT: I'm of the view that this -- specifically we  
2 need to talk about this. Let me give a general ruling first. He  
3 can testify to this assuming all the proper foundation is laid.  
4 I'm not sure that's not going to be a problem.

5                   Sending it back to the jury, are you proposing that?  
6 Because my concern is this does start to feel like an expert  
7 report. And with the other experts -- He is testifying as an  
8 expert, right? He did at the last trial.

9                   MR. MACE: He's both a fact and expert.

10                  THE COURT: He's both. This has the feel of an expert  
11 report. The jurors can see all this. But I'm not inclined at  
12 this point to send it back.

13                  Anything else on this document from the plaintiff's side?

14                  MR. PAULOS: Nothing else, Your Honor.

15                  THE COURT: All right. Let's jump over to 858. What's  
16 the issue here?

17                  MR. PAULOS: Your Honor this is -- It's an e-mail that  
18 attaches two documents. And the version that was provided to us  
19 includes only one of the attachments that's sent attached to that  
20 e-mail. The attachment that is included is the Epidemiology  
21 Research Plan Regarding PFOA, dated April 21, 2006, and revised on  
22 April 28.

23                  What is not included is the agenda for the meeting that  
24 was going to discuss this particular document. And therefore,  
25 it's an incomplete version of the exhibit.

1                   MR. MACE: They didn't object to it on that ground, so we  
2 haven't been able to investigate that yet. But we will  
3 investigate for the second attachment.

4                   MR. PAPANTONIO: Then we'll just reserve our objection  
5 once we're able to --

6                   THE COURT: Until you see the attachments. All right.

7                   MR. MACE: Again, I would note this in its current format  
8 was in the expert's files of the plaintiffs. And it was admitted  
9 at the *Bartlett* trial.

10                  THE COURT: All right. That takes us to 879. I do note  
11 with a smile you both have objected to the other objections to  
12 other exhibits admitted in the last trial. So we are kind of  
13 evening this out as we go.

14                  Again, I'm of the view we don't want to do this ten  
15 trials into this with this many documents. But we went through  
16 one trial. You've had a chance to take a step back and see what  
17 you didn't like or want to do differently. This is -- I assume  
18 with each trial this should get a little bit narrower, the number  
19 of documents, as we do this. But now we are going through each.

20                  MR. PAULOS: Your Honor, Exhibit D.879 we are going to  
21 withdraw our objections to that.

22                  THE COURT: That will come in without objection.

23                  Now 886.

24                  MR. PAULOS: We are also going to withdraw our objections  
25 to this document.

1                   THE COURT: That will come in then.

2                   893.

3                   MR. PAULOS: This document is a mish-mash of two  
4 documents, Your Honor. The first two pages appear to be maybe  
5 part of the same document. They are part of the same document --  
6 excuse me, the first four pages. And then the last four pages are  
7 an entirely different document. That is an e-mail dated March 13,  
8 1991. As you'll see, it has a Dr. Playtis Bates stamp, which does  
9 not match the Bates stamp, the EID Bates stamp, on the front page.

10                  THE COURT: So the first four pages you are not objecting  
11 to?

12                  MR. O'BRIEN: Well, I still, as with the other one that  
13 went yesterday, there was simply a graph without the referenced  
14 document.

15                  MR. MACE: Let me clear this up, Your Honor, because this  
16 is obviously to me a clerical issue. My document, which is  
17 supposed to be 893, is a three-page document which appears to be  
18 an 893.5, 6 and 7 in the current version. Maybe it's a four page  
19 because it carries over. But it's -- So 893 should appear as what  
20 is currently being given to the Court as mistakenly as 893.5, 6, 7  
21 and 8. That's the only thing we are requesting prescreened --

22                  THE COURT: So you're offering 5, 6, 7 and 8. Not the  
23 first four pages?

24                  MR. MACE: We will renumber it as just 893.1, 2, and 3.

25                  THE COURT: All right. So the first four pages we should

1 disregard.

2 MR. MACE: Are withdrawn.

3 THE COURT: Now we're on .5 of 893.5, 6 and 7, which will  
4 become 1, 2, 3 and 4.

5 MR. MACE: Yes, sir.

6 THE COURT: So what do we have here?

7 MR. PAULOS: With that correction, we will withdraw our  
8 objection to what will be the new 893 exhibit, beginning with  
9 893.5.

10 THE COURT: New and improved.

11 MR. MACE: I apologize, Your Honor.

12 THE COURT: All right. That's not a problem.

13 902.

14 MR. PAULOS: Again, Your Honor, this is a document that  
15 references documents that are not attached. It also contains  
16 hearsay within hearsay regarding the statements made by Bill Gibbs  
17 about the LPSD wells.

18 THE COURT: So Gibbs is -- Who is he, again?

19 MR. PAULOS: I'm not sure who Bill Gibbs is. That is one  
20 of the problems with this document, Your Honor. We also have  
21 statements about Jim Cox from the Lubeck Public Service  
22 department.

23 MR. MACE: Your Honor, this is a business record that is  
24 -- that needed the discussions or reports on between DuPont and  
25 Lubeck. Mr. Gibbs was a Lubeck employee. That's clarified in the

1 second e-mail at the bottom. It mentions that, Bill is the Lubeck  
2 employee who sat in my discussion.

3 THE COURT: Anything in here particularly harmful that  
4 you want to address my attention to?

5 MR. PAULOS: Well, Your Honor, without knowing what was  
6 attached to it, we would simply want to see what was attached.

7 You will see the first --

8 MR. MACE: We have looked for that, and there is no -- We  
9 can't --

10 MR. PAULOS: A development with respect to Lubeck water  
11 system. See attached.

12 THE COURT: What year was this -- the wells purchased?

13 MR. MACE: It was in that '89 time frame, Your Honor, and  
14 then -- yeah.

15 THE COURT: This is 2000, though.

16 MR. BROGDON: Ten years later.

17 THE COURT: So it wouldn't be -- it wouldn't be for the  
18 purchase.

19 MR. MACE: No, sir.

20 THE COURT: So what do you see is the probative value of  
21 this document?

22 MR. MACE: Well, Your Honor, with regard to the fact that  
23 Lubeck sat in on this meeting, several -- two employees, I think,  
24 of Lubeck sat in on the meeting where they discussed the primate  
25 study, the monkey study. So plaintiffs have made an argument that

1           DuPont was hiding this monkey study --

2           THE COURT: Let me ask you a blunt question. You will  
3           have some live testimony about the meeting itself?

4           MR. MACE: I believe so, Your Honor. But this is a  
5           business record that was recorded contemporaneously.

6           THE COURT: That would confirm what you want to show is  
7           this would confirm that people from that water district were at  
8           the meeting.

9           MR. PAPANTONIO: From Lubeck. This is Little Hocking.  
10          That's what -- They keep coming back to Lubeck and other  
11          districts --

12          MR. MACE: But that's important, Your Honor, because  
13          Lubeck was the only water district in which DuPont had any  
14          knowledge prior to 2002 that there was C-8.

15          MR. PAPANTONIO: That is not true at all.

16          THE COURT: I want to make a simple point. You're not  
17          sure you have a witness who can say who was at the meeting?  
18          Because they would pick this up with the live testimony.

19          MR. MACE: Right. I'm not sure sitting here. So it's a  
20          business record that reflects the fact that the meeting took place  
21          and who was there.

22          THE COURT: Your contention that it's a business record  
23          comes from the fact it's sent by Robert Ritchey, who is a DuPont  
24          employee?

25          MR. MACE: Yes, Your Honor.

1                   MR. PAPANTONIO: Judge, it's about Lubeck -- They're  
2 making this giant leap that this took place. Therefore, this is  
3 somehow notice, I suppose, to Little Hocking I guess is what they  
4 are --

5                   MR. O'BRIEN: Your Honor, copied on this e-mail is Andrew  
6 Hartten, who DuPont has listed as a will call witness. So we need  
7 to know if they're taking him down from the will call list because  
8 that may obviate the need --

9                   MR. MACE: Dr. Playtis is on here. I mean we have  
10 several witnesses --

11                  THE COURT: Let me be clear. It's notice of DuPont and  
12 conduct of DuPont. It's not notice necessarily to a water  
13 district. But in the abstract, a notice to an unrelated water  
14 district doesn't have any probative value unless it has some  
15 bearing on how the jury might view the conduct of DuPont. So that  
16 has got to be brought back that way somehow.

17                  MR. MACE: Which we intend to do.

18                  THE COURT: Why don't you check with your witnesses. I  
19 would like to avoid this. I think this is a close call. If we  
20 need to address it, you will let me know.

21                  MR. MACE: Okay.

22                  THE COURT: All right. Then we have the Tennant Farm  
23 Herd Health Investigation. Is this going to be offered in your  
24 case-in-chief or do you see this more as a --

25                  MR. MACE: That's going to depend on what they do, Your

1 Honor. I think it's relevant for cross-examination. It was  
2 certainly part of the materials that the plaintiff's experts  
3 considered before coming to their opinions. It was admitted into  
4 the --

5 THE COURT: Just for my edification, do you expect the  
6 jury in your case-in-chief to hear about the Cattle Team report?

7 MR. PAULOS: Well, Your Honor, we were just frankly  
8 surprised that this was on the defense's exhibit list because they  
9 didn't want any mention of the *Tennant* lawsuit, and this is  
10 directly derived from the *Tennant* lawsuit.

11 THE COURT: Right, but I'm hearing you say, Mr. Mace,  
12 that you are not going to use this if it doesn't come up in the  
13 plaintiff's case.

14 MR. MACE: Right, but they made it a big part of their  
15 last case with --

16 MR. PAPANTONIO: Your Honor, we don't intend to make it a  
17 major part of the case.

18 THE COURT: So this will on hold. If you need this, let  
19 me know, and we will address it at the time.

20 That takes us to 896.

21 MR. O'BRIEN: I believe it's 986.

22 THE COURT: I got it backwards. All right. What's the  
23 issue here.

24 MR. PAULOS: Your Honor, it's another incomplete  
25 document. It's an internal letter from William Vogler to Y. L.

1 Power at Washington Works Plant. It says, please find attached  
2 charts of data developed from reviewing medical records on 51  
3 employees with the highest measured levels of C-8 in their blood.  
4 Those aren't attached. It talks about what their opinions are  
5 from having -- having reviewed that information that would have  
6 been appended to this document. We think without the attachments,  
7 this document is worthless as far as evidence.

8 THE COURT: All right. Well, I want to focus on -- what  
9 caught my eye is the second paragraph, in my opinion, very little  
10 evidence of disease due to C-8 was found.

11 That is pure opinion testimony.

12 MR. MACE: But it's the state of the knowledge of what  
13 the belief was at the time.

14 MR. PAPANTONIO: Well, somebody's opinion --

15 MR. MACE: The historical fact.

16 THE COURT: Who is William Vogler? He is listed as CR&D.  
17 Do you have any idea what that stands for?

18 MR. MACE: He was part of Haskell Lab. I am trying to  
19 remember. He was, I think, a physician's assistant. And  
20 Dr. Power, Y. L. Power, is the medical doctor at the Washington  
21 Works Plant for 36 years.

22 MR. PAPANTONIO: Judge, the reason -- the reason those  
23 types of terms are so important, very little evidence of disease,  
24 what does that mean? It's the jury -- It's put out there as this  
25 is some type of colloquialism, and everything is okay with C-8.

1                   THE COURT: Well, I would need a lot more foundation for  
2 him to say. He can describe what was shown in the studies, and I  
3 think the rest of that paragraph does that. But that first  
4 sentence of the second paragraph has to come out.

5                   And your other complaint is that you don't have the  
6 attachments. Do we have a way to locate the attachments?

7                   MR. MACE: We'll look into it, Your Honor.

8                   THE COURT: All right. So that first part of the ruling  
9 is definite. The second part, we'll wait and see if we can find  
10 the attachments.

11                  MR. MACE: And I guess we have to take out the first  
12 clause of the next sentence, too, if you're taking out that first  
13 sentence because it's referring back.

14                  MR. BILOTT: Your Honor, also the --

15                  THE COURT: Let me address this one at a time.

16                  So you're talking about the, we did find several  
17 employees?

18                  MR. MACE: No, perhaps C-8, it's referring back to the  
19 sentence you just struck.

20                  THE COURT: Well, that comes close to an admission, but  
21 on the other hand, it's still a part of an opinion. So they both  
22 come out. All right.

23                  MR. BILOTT: Your Honor, also it would seem that the  
24 second sentence in the first paragraph also was an opinion of the  
25 medical doctor.

1                   THE COURT: Yes. Without any credentials or other way of  
2 knowing what this person's background is, that's going to come  
3 out, too.

4                   MR. MACE: So the entire second paragraph?

5                   THE COURT: No, this would be the first -- the second  
6 sentence of the first paragraph. The first --

7                   MR. BROGDON: It would be logical.

8                   THE COURT: The first sentence of the second paragraph  
9 and the third sentence of the third paragraph will come out. And  
10 we're going to check on the attachments that are a part of this.

11                  MR. MACE: So in terms of the, it would be logical,  
12 you're striking that, Your Honor?

13                  THE COURT: Yes.

14                  1019.

15                  MR. PAULOS: We are going to withdraw our objections to  
16 this document, Your Honor.

17                  THE COURT: That will be admitted without objection.

18                  1035. What exactly is this? It looks like it's -- the  
19 Bates stamp looks like it's from the West Virginia Department of  
20 Environmental Protection. What exactly is this document?

21                  MR. MACE: This is similar to the other transcript, Your  
22 Honor, that we would use as potentially in cross-examination of  
23 witnesses, but we would not intend at this point to offer it as a  
24 stand alone exhibit that would go back to the jury.

25                  THE COURT: Who authored this, do you know?

1 MR. MACE: Well, it's a transcript.

2 THE COURT: Oh, no, the other one. You're on -- You  
3 jumped ahead. 1035 is a --

4 MR. PAULOS: 1035 appears to be a power point potentially  
5 created and presented by Pam Nixon of the WV DEP. We don't -- We  
6 don't know that for sure. It's a WV DEP document, but it doesn't  
7 -- There's no indication this was ever in DuPont's possession or  
8 when DuPont came into possession of it or what the foundations for  
9 the opinions are that are presented in this power point. And Pam  
10 Nixon's credentials to render those opinions are -- are not  
11 available to us either.

12 MR. MACE: Your Honor, you will recall, I think maybe,  
13 that this was an exhibit at Dr. Staats's deposition. It was used  
14 and admitted at the first trial. And it's also Plaintiff's  
15 Exhibit 4867.

16 THE COURT: She testified to this --

17 MR. MACE: And it says Staats C-8 presentation. It's not  
18 Nixon.

19 THE COURT: So she's -- but to refresh my memory -- You  
20 probably think my memory is perfect in this case, but it's very  
21 close -- she testified to this document that she prepared it?

22 MR. MACE: Right, and it's in the designations for trial.

23 MR. O'BRIEN: But just so we're clear, in the deposition  
24 of Dr. Staats, she was not asked anything about this document  
25 other than to identify it. She was not asked about the opinions

1 contained. She's obviously not an expert in this case. She has  
2 not been listed as an expert. And so there's nothing that -- They  
3 have published nothing from this through Dr. Staats. So this was  
4 something that she created.

5 MR. MACE: She's testified, Your Honor, that these were  
6 the slides that she prepared and presented to a meeting. We will  
7 also have witnesses who were at the meeting that saw the slides.  
8 That goes to the notice and knowledge that DuPont had back in '02.

9 There were also DuPont's representatives at her  
10 deposition. These were statement --

11 THE COURT: At this meeting where she presented this?

12 MR. MACE: Both at the meeting and at her deposition,  
13 which was held in 2002. And so in terms of -- If they want a  
14 limiting instruction, fine. But in terms of what DuPont was being  
15 told by a representative of West Virginia DEP back in 2002, it's  
16 part and parcel of the historical knowledge.

17 MR. O'BRIEN: Your Honor, if you look at 1035.4, there's  
18 opinion testimony which has been excluded by the Court in her  
19 transcript, which is, oh, the cancer in rodent's mechanisms is not  
20 relevant to humans. That is expert opinion.

21 THE COURT: Let's go through --

22 MR. PAPANTONIO: Blood levels and toxicity --

23 THE COURT: Well, let's go through this page by page.  
24 Let's start with 1035 -- I'm sorry, again, this is what I'm  
25 hearing. DuPont said she testified she prepared this.

1 MR. MACE: Yes, sir.

2 THE COURT: There will be a lot of other testimony that  
3 she prepared this and presented it to a meeting.

4 MR. MACE: Yes, sir.

5 THE COURT: And there were DuPont employees who were at  
6 the meeting?

7 MR. MACE: Yes, sir.

8 THE COURT: And testified to that and saw this  
9 presentation?

10 MR. MACE: Both then, Your Honor, when she presented it  
11 and at the deposition because it was an exhibit used at the  
12 deposition.

13 MR. O'BRIEN: But, Your Honor, it was not used. It was  
14 just identified at the deposition. And I believe the person from  
15 DuPont -- and correct me if I am wrong, Mr. Mace -- was  
16 Mr. Kennedy, who I am sure you are not going to call at trial. So  
17 it's not simply: Was there a DuPonter there? It has to be  
18 somebody who can lay that foundation who was in fact there.

19 THE COURT: The key here is what DuPont knew. So all  
20 right. Step one is she prepared it. So we know who the author  
21 is. Step two, how do you show DuPont knew about this?

22 MR. MACE: Because we are going to show that somebody was  
23 at the meeting -- both two ways. One, that somebody was at the  
24 meeting where she presented it at the public meeting.

25 THE COURT: And your witness will say that?

1           MR. MACE: Yes. And that they were at -- we had a DuPont  
2 representative at the deposition who got a second copy of it.

3           THE COURT: So this was notice in --

4           MR. MACE: 2002.

5           THE COURT: 2002. That's why you keep saying --  
6 Normally, notice in a deposition wouldn't count for notice. In  
7 this case you are saying it's so old --

8           MR. MACE: Right.

9           MR. PAULOS: I just want to be clear. We're going to  
10 attribute DuPont's knowledge to the lawyers that are present at  
11 the deposition where these documents were used?

12           THE COURT: That's an alternative that I hear, that there  
13 was somebody at the meeting where this was presented, as opposed  
14 to just -- A deposition I think is a little more of a stretch.  
15 But you represented that there was someone who will say that?

16           MR. MACE: Yes, sir.

17           THE COURT: Let's just assume -- That's the condition for  
18 this being used. All right? I'm assuming Staats' testimony has  
19 been given so you know that. We will have to deal with somebody  
20 from DuPont who saw the presentation.

21           MR. PAPANTONIO: Judge, who will say that? That's --  
22 Because, otherwise, we're going to wait, and it's going to pop up  
23 in trial, just like it did the last time. Well, judge, it's all  
24 on the fly. It puts us on the fly. It puts the Court on the fly.  
25 Who is going to say they were at the meeting, and they'd heard

1           these opinions by Dr. Staats?

2           MR. MACE: And I don't know that sitting here. I know  
3           there were people, and I have to go back and look at that.

4           THE COURT: Well, I will give you the opportunity. And,  
5           again, for this to be used, that has to be met.

6           MR. BILOTT: Just to be clear, no portion of Dr. Staats'  
7           deposition was read in the last trial.

8           MR. O'BRIEN: Right.

9           MR. MACE: But the document was still admitted to the  
10          jury, and it's been used by the plaintiff's experts, considered by  
11          them.

12          MR. O'BRIEN: Of course plaintiff's experts can rely on  
13          any of this that's not evidence.

14          MR. MACE: And they can be cross-examined on it.

15          THE COURT: Well, then we start splitting hairs because  
16          the jury will hear a lot about this. It may not be coming into  
17          evidence. All right.

18          Well, there are a couple things in here I think I have  
19          already ruled on. She's not an expert. So is there anything  
20          before the fourth page of this we need to talk about that we  
21          haven't already addressed?

22          MR. O'BRIEN: Your Honor, so at 1035.3?

23          THE COURT: Yes.

24          MR. O'BRIEN: What is the current level of C-8 in the  
25          Lubeck water. And then the second part of that is, blood levels

1           in workers with no signs of toxicity 1,000 to 10,000 ppb, that's  
2 either an expert opinion or it's hearsay being repeated, something  
3 that DuPont told Dr. Staats.

4           MR. MACE: But this is not -- Again, this goes to notice  
5 to DuPont. It is not for the truth. None of these are for the  
6 truth of the matter asserted. It's for what DuPont was being  
7 informed by this representative of West Virginia DEP in terms to  
8 what they believed at the time.

9           MR. O'BRIEN: But DuPont would already have that  
10 knowledge. So you can't say, we were on notice since we gave this  
11 information to Dr. Staats, and then she repeated it back to us in  
12 a power point.

13           THE COURT: The thing is this case is not about the  
14 workers. So that second part is going to come out.

15           MR. PAPANTONIO: Judge, it is not about Lubeck either.

16           MR. MACE: Actually, it is Your Honor.

17           THE COURT: It's at least some two different districts  
18 close to each other.

19           But -- Now if I let her talk about a how toxic C-8 is,  
20 isn't that pure opinion?

21           MR. PAPANTONIO: Every bit of it is, judge. That's the  
22 problem here. This is -- Again, the problem with Dr. Staats, not  
23 being able to take her deposition --

24           THE COURT: And what they would know is two things: What  
25 she presented and what her background is.

1 MR. MACE: Right.

2 THE COURT: This is beyond the scope of her expertise,  
3 isn't it?

4 MR. MACE: No, it's not, Your Honor. She's a Ph.D.,  
5 toxicologist.

6 MR. PAPANTONIO: She's not --

7 MR. MACE: Absolutely a Ph.D. toxicologist --

8 THE COURT: We need to slow down for a second.

9 MR. O'BRIEN: She has not been listed as an expert. So  
10 she is a fact witness, and that is all she is, and the Court has  
11 ruled that previously.

12 MR. MACE: And we're using this for the facts of what  
13 DuPont was informed back in '02.

14 THE COURT: You agree or disagree that she -- this is  
15 within her area of expertise?

16 MR. PAPANTONIO: It is not. It is not. As a matter of  
17 fact, the problem that we have with this, this all ties into the  
18 manufacturing of evidence for the CAT Team. The double whammy  
19 here is the stuff she's relying on she has manufactured. She  
20 hired TERA to manufacture it. She met with DuPont and got paid to  
21 manufacture it. She worked for them. Judge, this is why we must  
22 take her deposition again. This type of thing is going to come up  
23 in the next 40 trials. We're going to hear the same thing.  
24 They're splitting hairs about Staats. We can solve all this whole  
25 thing by taking her deposition, which we're willing to do.

1                   MR. MACE: A couple of points, Your Honor. One, they  
2 never addressed your question. She's a Ph.D. toxicologist. These  
3 are toxicology statements. We're bringing this in for the facts  
4 of what was said regardless of the truth, and --

5                   THE COURT: I get your position.

6                   MR. MACE: -- and if you look at the analogy to what you  
7 are looking in on TSCA, because you are letting in statements that  
8 EPA believed something, well, these are statements that the West  
9 Virginia DEP believed something.

10                  THE COURT: What is your position on a deposition?

11                  MR. MACE: I don't believe she's going to cooperate. We  
12 have no control over her, unless she's going to cooperate with her  
13 deposition.

14                  THE COURT: But --

15                  MR. MACE: I think we're far past the rule for --

16                  THE COURT: -- if she doesn't --

17                  MR. MACE: She was deposed for two days. And Your Honor  
18 had an order two years ago that if anybody wanted to re-depose  
19 somebody they had to show good cause back then, not now. So to  
20 get it --

21                  THE COURT: In a nutshell, that's your position.

22                  MR. MACE: Yes. We're opposed to on the eve of trial  
23 doing this.

24                  MR. PAPANTONIO: We are seeing good cause develop right  
25 before our eyes, judge. This is good cause. Because what they're

1           trying to do is split hairs with this witness. She's right --  
2           She's an hour away -- two hours away from us in Pensacola.

3           THE COURT: I mean this is the classic -- This is  
4           admissible on the issue of notice. I don't doubt that. But it's  
5           not admissible with regard to opinions given. She's not an  
6           expert. She has not been designated. And a lot what's in here,  
7           of course, contradicts the Science Panel. So we have this mixed  
8           issue. It's admissible for one purpose but not admissible for  
9           another.

10          MR. O'BRIEN: And that's the problem --

11          THE COURT: I am reluctant, though -- She is an important  
12           witness in this case.

13          MR. PAPANTONIO: She's critical.

14          THE COURT: That cuts two ways. One is a deposition on  
15           the eve of trial is disruptive. The other is her deposition  
16           testimony comes all the way from 2002, and so many things have  
17           happened since then, and I am not saying that she's necessarily a  
18           part of that. But I suppose, though, I think in the final  
19           analysis, whatever she says is not going to change the issue  
20           before me right now.

21          MR. MACE: True.

22          THE COURT: You're still going to offer it --

23          MR. BROGDON: Your Honor, it seems a limiting instruction  
24           here could solve the problem. As you said --

25          MR. PAPANTONIO: No --

1                   MR. BROGDON: -- it's clearly admissible for notice, but  
2 a limiting instruction as to what it's not admissible for covers  
3 the issue.

4                   THE COURT: Sometimes that works, not always.

5                   MR. O'BRIEN: The problem is this. So DuPont chose in  
6 the deposition of Dr. Staats not to go through this or how she  
7 came to this and whether this is her opinions or something that  
8 she is simply repeating from what DuPont told her because DuPont  
9 was on the CAT Team. So it's not notice. It's simply parroting  
10 what DuPont told them.

11                  THE COURT: Well, you weren't in the case in 2002, I'm  
12 assuming.

13                  MR. O'BRIEN: I was not in the case, but I read those  
14 pages --

15                  MR. BROGDON: Your Honor, this goes to credibility issues  
16 and issues of fact where they can dispute where she got her  
17 information, but it doesn't change what she told DuPont, and  
18 that's a fact.

19                  THE COURT: I don't want to -- listen. I enjoy everyone  
20 in the room, but at a certain point you need a decision. I think  
21 what weighs on my mind is there was an opportunity to depose her.  
22 Now before the next trial, you may want to do that. I will  
23 certainly make that opportunity available. As far this trial  
24 goes, we are too close in time to do that.

25                  Now let's go through this document page by page and see

1       where we are. So, again, this is all premised on somebody from  
2       DuPont being at a meeting where this presentation was made. There  
3       are going to be some exclusions, though. I have already mentioned  
4       on page 3, the last part about blood levels in workers is coming  
5       out. How toxic is C-8, I would suggest to the plaintiff's side  
6       this is the sort of thing where you want me to continue to give  
7       the limiting instruction about the Science Panel.

8                   MR. O'BRIEN: I think it's out as opinion. I think it's  
9       expert opinion.

10          MR. PAPANTONIO: It is totally opinion.

11          THE COURT: It is that, but it also goes to knowledge of  
12       DuPont. It cuts in two different directions.

13          MR. O'BRIEN: But it doesn't. It's simply repeating what  
14       DuPont told her.

15          THE COURT: But, again, that could have been asked in a  
16       deposition, and it wasn't. So I can't fill that in at this point.  
17       You can do that in the next case.

18          MR. O'BRIEN: But DuPont is a proponent of the evidence,  
19       and they should lay the foundation. They chose not to for this  
20       evidence.

21          THE COURT: I think at this point I have ruled.

22          Now the Lubeck water comparison is out. This case isn't  
23       about Lubeck. So page 5 is out.

24          MR. BROGDON: The whole page, Your Honor?

25          THE COURT: Yes.

1 MR. BROGDON: Okay.

2 MR. MACE: And when we say okay, that means we understand  
3 what you are saying, but we're preserving our objections.

4 THE COURT: Understood. Well, this is what I will call  
5 scientifically wrong from the way this case was being tried -- I'm  
6 looking at page 6 -- but it goes to the knowledge of DuPont. So  
7 that will stay in.

8 The: What actions have been taken, I'm going to find  
9 this is, first of all, we're getting into the consent decree is  
10 problematic. We have sort of capped that as much as we could.

11 MR. MACE: Understand that as you rule, Your Honor, this  
12 is the November 15, 2001, consent decree between West Virginia and  
13 DuPont, not TSCA.

14 THE COURT: Not the second one.

15 MR. MACE: Yes.

16 THE COURT: But all of this is going to come from other  
17 witnesses. So what's on page 7 is going to be excluded.

18 And likewise everything on page 8.

19 Page 9 will stay in.

20 And page 10.

21 All right. 1038 is another transcript. Should I assume  
22 this is available if you see the need for cross-examination only?

23 MR. MACE: Yes, sir.

24 THE COURT: We'll hold on that.

25 MR. MACE: Could I plead with the Court within about 15

1 minutes for a restroom break?

2 THE COURT: Sure. Well, we're going to take a lunch  
3 break here. So why don't we plan on being back here at 20 after  
4 1:00.

5 MR. O'BRIEN: Just so -- I'm sorry to be pedantic, that  
6 transcript is the same ruling as the prior one, which is you can  
7 cross-examine the declarant with it?

8 THE COURT: That's what I understand so far. You will  
9 let us know if there is something else at side-bar. But that's  
10 what I'm assuming.

11 MR. PAPANTONIO: Judge, one other thing. Would it be  
12 appropriate if we start trying to get the deposition of  
13 Mrs. Staats --

14 THE COURT: Since you are all here, you can probably  
15 schedule it at a convenient time for everybody.

16 MR. PAPANTONIO: Okay.

17 THE COURT: If you can persuade DuPont to do it now, I  
18 wouldn't discourage you.

19 MR. PAPANTONIO: I don't think --

20 THE COURT: I know everyone in the room is pretty  
21 persuasive.

22 MR. PAPANTONIO: I don't agree --

23 THE COURT: But there has been no violence in the room  
24 either. Very good. We will see you at 20 after 1:00.

25 (Recess from 12:00 p.m. to 1:20 p.m.)

1 Wednesday Afternoon Session.

2 | May 18, 2016

— — — — —

4 THE COURT: All right. Where we left off, we disposed of  
5 1038. We were going to use that only if appropriate on cross.

6 MR. MACE: Yes, Your Honor.

7 THE COURT: And then we get to 1060.

8 MR. PAULOS: Chris Paulos for the plaintiffs.

9                   Real quickly, I wanted to let you know over the lunch  
10 break I endeavored to go through these documents; and based on  
11 your previous ruling from the morning, I think there's going to be  
12 some documents we will be pulling down.

13 THE COURT: All right.

14 MR. PAULOS: So as we get to that, I will let the Court  
15 know that based on the rulings that you provided, the guidance the  
16 Court has provided us today, that we -- that we understand those  
17 rulings we will be -- we'll be withdrawing our objection and  
18 pulling those objections down to certain documents.

19 THE COURT: All right.

20 MR. PAULOS: Also I wanted to clarify with the Court,  
21 too, that as we get into documents this afternoon, we are going to  
22 start seeing documents that we saw earlier this morning that  
23 redactions have been applied to. I just wanted to confirm the  
24 Court's redaction rulings will -- well be across the board. For  
25 any iteration of those particular documents that the Court has

1 redacted, those redactions will be applied to -- to any version of  
2 that document.

3 THE COURT: That will be my understanding.

4 MR. PAULOS: Thank you. This first document here,  
5 D.1060, is another internal memorandum from -- from Walt Stewart  
6 to e-mail addresses on a DuPont distribution list. It's -- Again,  
7 it's -- it's a -- it's basically hearsay within hearsay. It's a  
8 rendition of a meeting that occurred where a summary of hearsay  
9 statements is being provided to --

10 THE COURT: So in terms of -- This is a DuPont employee.

11 MR. PAULOS: That's correct.

12 THE COURT: An internal document. But your argument is  
13 that there are things within this are not going to be covered by  
14 the hearsay exception.

15 MR. PAULOS: That's correct, Your Honor.

16 THE COURT: Let's go right to those then.

17 MR. PAULOS: The first -- the section of the document I  
18 would like the Court to look at is the second paragraph where  
19 there's an assessment of how the -- the meetings and presentations  
20 were received, that they were well received and appreciated by  
21 both audiences. There's also a statement that meeting questions  
22 and comments by the regulatory personnel were of good depth and  
23 quality --

24 THE COURT: That's the whole second part of the second  
25 paragraph is what you're objecting to.

1                   MR. PAULOS: That's correct.

2                   MR. MACE: Our position, Your Honor, these are a  
3                   description of what happened at the meeting. It's a business  
4                   record and an ancient document, a present sense impression in  
5                   terms of the DuPont attendees impression was of what was going on.  
6                   It doesn't contain any statements of hearsay. Also, this is in  
7                   terms of notice and knowledge historic, not for the truth of the  
8                   matters being asserted. It contains historical knowledge of  
9                   DuPont.

10                  MR. PAULOS: Your Honor, at present sense impression,  
11                  that is made at the immediate moment that something is being  
12                  perceived. This document is created daily after this meeting.

13                  THE COURT: As a business record, it has to have some  
14                  connection to the activity. That is beyond that. So that second  
15                  part of the second paragraph will be excluded.

16                  Anything else that you are objecting to?

17                  MR. MACE: Your Honor, so we're clear, you're taking out:  
18                  Meeting questions.

19                  THE COURT: Yes, to the end of the paragraph.

20                  MR. MACE: Okay.

21                  MR. PAULOS: The next section, I believe should be  
22                  adapted --

23                  THE COURT: Now you can have a witness testify to that.  
24                  But in terms of a cold document, that's the problem.

25                  MR. MACE: And then, again, there would be the potential

1           to use it in redirect if there's a claims made where: You are  
2           inaccurate about that. That never really happened.

3           THE COURT: Sure. All of these are provisional. So you  
4           can come back and ask me to reconsider this based on what I have  
5           heard in the trial.

6           MR. MACE: Yes, sir.

7           MR. PAULOS: The next section we believe should be  
8           redacted, the last sentence in the third paragraph where it say,  
9           LPSD personnel were most grateful for our assistance in this  
10          matter.

11          THE COURT: Same ruling. That will come out, too.

12          MR. PAULOS: And then the fourth -- or, excuse me, in the  
13          fifth paragraph it says, Ed Hamrick, WV DNR Director, summarized  
14          the meeting with him by thanking us for coming to his office and  
15          reviewing this information. He stated that a continued dialogue  
16          with Dupont and his office in this manner would be highly  
17          desirable.

18          THE COURT: That takes out the second sentence, not  
19          necessarily the first. In fact, not the first.

20          MR. PAULOS: And then the last thing about this document,  
21          Your Honor, is that it references meeting charts that were used at  
22          this meeting that were going to be sent to all the recipients in  
23          brief summary, that we were not provided with this summary to us  
24          in production.

25          THE COURT: Do you know if you have those?

1                   MR. MACE: A, they were not attachments to this; and, B,  
2 we are going to come to them in a little while.

3                   THE COURT: If they're coming up, I think we can wait on  
4 this.

5                   MR. PAULOS: And I think we will see this summary, again,  
6 in some of the documents Mr. Mace is referring to.

7                   THE COURT: We will address it at that point.

8                   Then we get to 1126.

9                   MR. PAULOS: Your Honor, this is a just another e-mail  
10 that we believe contains hearsay within hearsay that can't be  
11 cured with any hearsay exception.

12                  THE COURT: I know who Dr. Playtis is. Who is -- and  
13 Dawn Jackson that's a familiar name.

14                  MR. MACE: Yes, she is government affairs/public  
15 affairs/public relations at the plant, Your Honor.

16                  THE COURT: So let's see this.

17                  MR. PAULOS: And, Your Honor, I think one of the issues  
18 with this document, we're now starting to see repeated e-mails  
19 about the same meetings, the same public entities, over and over  
20 and over. It is very cumulative. And it gives the false  
21 impression they are routine meetings over and over again --

22                  THE COURT: Walk me through this. I'm -- Starting with  
23 this, there's an aspect, so this is a business record. But the  
24 C-8 primate study, there's going to be testimony on that, right?  
25 That's nothing new.

1                   MR. MACE: Well, the fact is it exists, Your Honor. But  
2 the plaintiffs are trying to leave the jury with the impression  
3 that nobody outside of DuPont and 3M knew about it, which isn't  
4 the case.

5                   THE COURT: Well, I'm just looking -- I have a pretty  
6 narrow focus here. The first sentence I get. The second  
7 sentence, Dawn Jackson delivered to them, meaning, I suppose, Jim  
8 Cox and Lubeck and Bill Gibbs from LPSD, a copy of the C-8 primate  
9 study. There is going to be testimony about the C-8 primate  
10 study. This would add they were delivered to other people.

11                  MR. MACE: Right, and it gets into -- because what she is  
12 delivering is the communication to the employees. You will recall  
13 Dr. Siegel's testimony that DuPont did a great job --

14                  THE COURT: Let me interrupt you here --

15                  MR. MACE: I'm sorry.

16                  THE COURT: -- but you're winning here. I am going to  
17 rule in your favor. I think this stays in. And, again, it's a  
18 study we're going to get into in some detail, I assume.

19                  Then we get to 1173. This is a --

20                  MR. PAULOS: Your Honor, this is a document purports to  
21 be from the CDC. However, there is no identifying mark aside from  
22 this emblem. And we don't know what the date that this was  
23 created, when this was created --

24                  THE COURT: Isn't there a date on the back of it?

25                  MR. MACE: Yes, sir.

1                   MR. PAULOS: There's a date up here -- down here, but we  
2 don't know whether it's the date of this document, when it was  
3 pulled off a website, when it was obtained by DuPont. There is no  
4 DuPont Bates stamp. There is no indication that this was in  
5 DuPont's file materials.

6                   MR. MACE: My understanding is that this is a public  
7 document posted on the CDC website as of that time, 2009.

8                   MR. PAULOS: There is no indication that this came off  
9 the worldwide web.

10                  THE COURT: Do you know how you received it? You're just  
11 looking at it cold, you don't know.

12                  MR. MACE: I'm just looking at it cold. Maybe it's self  
13 authenticating. There is the CDC symbol. There is no credible  
14 statement or showing that it's not --

15                  THE COURT: I mean you can, I am sure Google this, and  
16 tell me if you think there's some question of authenticity.  
17 Otherwise, it's a statement of a public agency. If you find  
18 anything else you want to bring to my attention, I will give you  
19 that opportunity. Otherwise, it's going to come in.

20                  MR. PAULOS: Thank you, Your Honor.

21                  THE COURT: Now 1375.

22                  MR. PAULOS: 1375 is a document that based on the Court's  
23 prior ruling this morning, we will be withdrawing our objection.

24                  THE COURT: All right. That takes us to 1414.

25                  MR. PAULOS: And this is another one that we will be

1            withdrawing our objections to based on the Court's guidance.

2            THE COURT: Thank you. 1428 then.

3            MR. PAULOS: 1428 is another document that we will be  
4            withdrawing our objections to.

5            THE COURT: All right. 1455.

6            MR. PAULOS: We're on a role. We will be withdrawing  
7            that as well.

8            THE COURT: All right. You are making me a happy judge.

9            So 1631 is --

10          MR. PAULOS: 1673?

11          MR. O'BRIEN: 1631, that's mine.

12          THE COURT: Another power point presentation more or  
13          less?

14          MR. O'BRIEN: Well, it's a little bit different because  
15          this one was not used in the deposition of Dee Ann Staats, it was  
16          not marked, and no foundation was laid for it. And so it contains  
17          -- It's much like the other one where it contains opinion  
18          testimony, but the foundation hasn't been laid for it.

19          THE COURT: Well, let me start. Your argument -- and I  
20          am going to hear from Mr. Mace -- it's not a DuPont document, not  
21          in DuPont's file as far as you know from discovery. So this is a  
22          presentation made by the West Virginia Department of Environmental  
23          Protection to Blennerhassett Junior High School.

24          MR. MACE: It was made at the junior high school, Your  
25          Honor. It was a public --

1                   THE COURT: Not a junior high school. I was reading too  
2 much into the description of the location.

3                   MR. MACE: So it's a presentation made in a public  
4 meeting that DuPont representatives were at on May 15 '02.

5                   THE COURT: You have witnesses who say they attended?

6                   MR. MACE: Yes.

7                   THE COURT: Where does this take us?

8                   MR. PAPANTONIO: Well, I think, if there were witnesses,  
9 I think it's just Mr. Bossert and Mr. Hartten. So they would have  
10 to lay the foundation. So it couldn't be Rickard saying, I know  
11 that Bossert went there because that would be relying on a hearsay  
12 statement from Bossert or Hartten.

13                  THE COURT: And correct me, Bossert is coming?

14                  MR. MACE: Bossert is coming, yes, sir.

15                  THE COURT: Would he be the one among others who --

16                  MR. MACE: Among others, he would be able to, yes.

17                  THE COURT: Again, as long as DuPont had particularly  
18 someone at his level present, heard this, then this will have to  
19 do with DuPont's historical knowledge. So it will be admitted.

20                  MR. O'BRIEN: Your Honor --

21                  MR. DOUGLAS: Well, there are redactions you want to talk  
22 about.

23                  MR. O'BRIEN: That's right. If you direct your attention  
24 to the 1631.12, there's pure opinion testimony. Pure opinions  
25 here, talking about high degree of confidence, methodology used --

1                   THE COURT: All right. So that high degree of  
2 confidence, that comes out.

3                   MR. O'BRIEN: The unanimous decision, which is  
4 bolstering --

5                   THE COURT: The screening level for water, I assume  
6 DuPont wants to use that for historical knowledge. Of course that  
7 was not in sync with the Science Panel. But you would be entitled  
8 to a limiting instruction.

9                   MR. MACE: But even in the high degree of confidence,  
10 this is the West Virginia Health and Human Resources and the DEP  
11 making that statement of meeting DuPont's status.

12                  THE COURT: It's predicting the future. It's  
13 speculative. It's --

14                  MR. BROGDON: Unanimous decisions is back. And that's a  
15 number of --

16                  THE COURT: I'm not -- I'm not taking that out. That  
17 will stay. It's the second paragraph, high decree of confidence  
18 that won't change in the future, that will come out.

19                  MR. O'BRIEN: And the third bullet point about the  
20 methodology? That just smacks of expert opinion.

21                  THE COURT: Well --

22                  MR. MACE: It's a fact, Your Honor.

23                  THE COURT: As I'm reading this, I take this to mean this  
24 was a threshold that they established?

25                  MR. MACE: Yes, sir.

1                   MR. O'BRIEN: Right. And they have got that through a  
2 CAT Team report itself, which Your Honor has already ruled upon.  
3 So, again, we're getting into some cumulative issues, some things  
4 they don't even need because now this is basically going beyond  
5 the report and explaining a little bit better, perhaps, than the  
6 report itself does, which is --

7                   MR. MACE: It goes beyond that, Your Honor. They're  
8 saying, well, that may have been done behind closed doors in this  
9 CAT Team meeting, but you didn't tell the public.

10                  THE COURT: Right.

11                  MR. MACE: This shows that the public --

12                  THE COURT: What the jury will see and what the public  
13 heard are two different things. All right.

14                  The screening levels, I will give the instruction again,  
15 that this is not the standards that are going to apply.

16                  And the oral risk factor, I don't see how the jury can  
17 use that in any helpful way. You are going from parts per billion  
18 to kilograms per day unless somebody is going to give some -- and  
19 we don't have a witness to explain what this all means. I think  
20 that's going to come out just to avoid confusion. I don't think  
21 it adds anything either.

22                  MR. MACE: Well, the fact they used EPA methodology --

23                  THE COURT: I'm just talking about the second line, oral  
24 risk factor with the numbers that follow.

25                  MR. MACE: I see, Your Honor. I understand your ruling.

1                   THE COURT: I don't think that is a plus or a minus for  
2 either side. That's going to confuse people. So that will come  
3 out. So on that page, two lines come out, the oral risk factor  
4 line and the high degree of confidence line.

5                   MR. O'BRIEN: Then on page 1631.13, this is all expert  
6 data. I mean this is really not notice without an expert  
7 explaining who was there to explain what this all means. It's for  
8 the same reason as Your Honor was talking about the oral risk  
9 factor.

10                  MR. MACE: But it was part of the presentation, Your  
11 Honor, and the fact that these studies were disclosed to the  
12 public --

13                  THE COURT: Do you think they were really discussed with  
14 the public as listed on here?

15                  MR. MACE: Yes, sir. I think this slide was shown at the  
16 meeting.

17                  MR. O'BRIEN: Your Honor, this is backdoor expert  
18 opinion.

19                  MR. MACE: No, it's not.

20                  MR. O'BRIEN: I mean it's --

21                  MR. MACE: I mean all these studies are coming in through  
22 the plaintiff's experts and DuPont's experts anyway. But this is  
23 the fact that they were presented to the public. They were made  
24 aware of these things.

25                  MR. O'BRIEN: Your Honor, this is getting into

1       methodology. It's not getting into notice. It's getting into  
2       reliance materials. It's getting into an expert foundation. And  
3       if the jury doesn't see this, what are they going to make of this  
4       standing on its own in terms of notice?

5           THE COURT: By the way, there's language in here, this  
6       meeting -- that the CAT Team meeting was pursuant to a consent  
7       order.

8           MR. MACE: What page?

9           THE COURT: That's on .7. I'm not overlooking your  
10      objection to that page.

11          MR. MACE: That's the separate consent order, Your Honor,  
12      the November of --

13          THE COURT: Right. But I'm wondering if the jury will  
14      confuse that.

15          MR. O'BRIEN: Your Honor, we have no problem with that.  
16      We're not asking that to be redacted.

17          MR. PAPANTONIO: Excuse me, either way, I think it's  
18      confusing for the jury.

19          THE COURT: Yes.

20          MR. MACE: I have no objection if Your Honor wants to  
21      strike that --

22          THE COURT: Take the whole line out.

23          MR. MACE: Yes. So those two lines, meeting held and  
24      action --

25          THE COURT: Meeting held pursuant to consent order, part

1           of the enforcement action -- only applies to DuPont in West  
2           Virginia.

3           MR. MACE: Yes, Your Honor.

4           THE COURT: And the rest of that will stay in.

5           Well, you know, I'm of two minds of this document.  
6           Assuming that the public heard it, that would lean towards  
7           admissibility. What the jury could do with this, that's a whole  
8           other matter.

9           My concern is it's not being offered through an expert.  
10          So it will be offered to show what DuPont knew. But if the jury  
11          can't really interpret all this data, then it just adds to  
12          confusion. It doesn't -- It doesn't add to a proven fact.

13          How much memory does your witness have to all this? Do  
14          they recall this document being used or is that too specific?

15          MR. MACE: I don't know without checking.

16          THE COURT: Probably too specific.

17          MR. O'BRIEN: And, judge, you will recall Mr. Bossert on  
18          redirect in the last trial really couldn't recall the public  
19          meeting at which this was presented. When Mr. Woods tried to  
20          rehabilitate, his recollection could not refreshed.

21          MR. MACE: That's why there is a need for it, Your Honor.

22          THE COURT: Yeah. Well, again, it's not going to the  
23          truth of the matter. It's going to what was disclosed to the  
24          public and what DuPont heard. But it still comes down to what  
25          this jury can do with it, though. That can't be forgotten either.

1           And, you know, the numbers here, the -- just the top line, with  
2           the breakdown in categories, I have no idea what they mean.

3           MR. O'BRIEN: And I don't think Mr. Bossert will either.

4           THE COURT: Right now I'm going to exclude this. If  
5           something changes in his testimony or anywhere else in the case, I  
6           will revisit this. But, again, I want to be clear, the reason  
7           that I am excluding, it's not self explanatory --

8           MR. BROGDON: When you say this, you mean that page?

9           THE COURT: Just that page, that's coming out. But I  
10          will review it if things change.

11          MR. MACE: Because I think there will be explanations for  
12          this because this is the same page that was used at the CAT Team.

13          THE COURT: Well, is the CAT Team going to explain it?

14          MR. MACE: It's actually in 613, I believe. It's one of  
15          the exhibits we have already addressed. It was a page that was  
16          taken out of the part analysis that was done by the CAT Team.

17          THE COURT: Well, if it comes in in a different way,  
18          remind me, and we will revisit this.

19          MR. MACE: Yes, sir.

20          MR. O'BRIEN: Then on page 1631.14, the question is: Why  
21          the difference in water screening level? In general -- I don't  
22          think this goes to notice at all. And it really -- particularly  
23          question no. 2, that's really bolstering. It doesn't give DuPont  
24          notice of anything since they are a part of the CAT Team.

25          THE COURT: So -- But they're advising the public that

1           there has been a change in the water screening level.

2           MR. O'BRIEN: There really hasn't been. I mean --

3           THE COURT: But it says what it says. I'm inclined to  
4 take out the second line but leave everything else in.

5           MR. MACE: But, Your Honor, again that goes to what  
6 DuPont and the public were being told by officials from the State  
7 of West Virginia.

8           THE COURT: I mean you will be able to cross on all that.  
9 We have had a lot of testimony about how the CAT Team operated.  
10 So I'm going to leave that in.

11           So we get back to this -- I don't know is this is  
12 milligrams dash -- oh, mg-Kg, I assume that's milligrams/kilograms  
13 per day.

14           MR. MACE: Milligram per kilogram per day.

15           MR. O'BRIEN: We're looking at 1631.15?

16           THE COURT: It's milligram per kilogram.

17           MR. MACE: Right, it's milligrams per kilogram of body  
18 weight per day.

19           THE COURT: I see. Okay. There are two measurements.  
20 The milligram dosage of C-8 --

21           MR. MACE: In relation --

22           THE COURT: Kilogram per day of the --

23           MR. MACE: The person or the animal being exposed to it.

24           THE COURT: The weight of the person compared to the  
25 dosage of C-8.

1                   MR. MACE: Yes, sir.

2                   THE COURT: You're all good at converting pounds to  
3 kilograms to get to this.

4                   MR. MACE: Sure.

5                   THE COURT: Just checking.

6                   MR. O'BRIEN: Your Honor, in this, this particular page,  
7 1631.15, is so rife with problems because it's -- it's really the  
8 notice to the people hearing it. This is not saying anything new  
9 to DuPont. And it's pure opinion that, therefore, C-8's risk  
10 factor is far more conservative or health protective than that for  
11 the average chemical.

12                  THE COURT: Right. There's general knowledge of DuPont,  
13 notice to them. That's one issue. And notice to the public might  
14 be an issue, but not notice by West Virginia DEP. By DuPont,  
15 perhaps, but not by -- this is not a DuPont document.

16                  MR. BROGDON: Well, Your Honor, by any means, the public,  
17 would rebut the argument that DuPont was somehow hiding things.

18                  MR. MACE: That the public wasn't informed, and that  
19 DuPont should have been saying something else when the government  
20 agencies are telling the public --

21                  THE COURT: All right. As long as you can establish --  
22 and the witness you're talking about is the plant manager, right?

23                  MR. MACE: Among others, too.

24                  THE COURT: And he was there.

25                  MR. MACE: I believe so, yes.

1                   MR. O'BRIEN: So Mr. Bossert has to lay the foundation.  
2 If he does not recall this being --

3                   THE COURT: Well, he has to recall the meeting, and he --  
4 He doesn't have to recall every paragraph. He's not going to be  
5 used to -- I am assuming nobody is offering him to verify every  
6 paragraph in here, just that he was the meeting where this was  
7 presented in public.

8                   MR. O'BRIEN: But I think he does still have to --

9                   MR. MACE: It is consistent with his memory of the  
10 meeting.

11                  MR. O'BRIEN: I would permit -- I would ask that the  
12 judge, because of this, I don't think Mr. Bossert is going to  
13 recall this, I will permit -- I would ask that the Court permit  
14 *voir dire* on this document --

15                  MR. PAPANTONIO: We do --

16                  MR. O'BRIEN: -- before it is used.

17                  THE COURT: Why don't we do -- Let's do that. But I  
18 don't want to necessarily run the jury out of the courtroom. Why  
19 don't you -- You're going to have to lay a foundation for that.

20                  MR. MACE: Yes, Your Honor.

21                  THE COURT: We will do that and then have a side-bar.

22                  MR. PAPANTONIO: One further note, I don't know if you  
23 remember the witness that started off his testimony with top of  
24 the morning, it was Mr. Dourson. That's --

25                  MR. MACE: That's unforgettable.

1                   MR. PAPANTONIO: This is the type of thing that they used  
2 for Dourson. Now if Mr. Dourson is coming, this is very clear.  
3 But, otherwise, they are just walking around the edges of this  
4 with arbitrary witnesses. I think it's going to be a difficult  
5 issue, but I hear the Court on it. I just wanted the Court to  
6 understand that this document takes special attention.

7                   THE COURT: Well, what I want to explain with 15, again,  
8 is really just more of a: What will the jury make of this? That  
9 second paragraph, just to explain that the measurement system is  
10 going to take a few minutes. I just don't want them giving --  
11 given documents as exhibits they don't understand.

12                  So who would you have to explain milligrams-kilograms per  
13 day, for example?

14                  MR. MACE: I can do it through their experts. I can do  
15 it through Dr. Rickard.

16                  THE COURT: If that's through an expert, that becomes a  
17 lot easier. But in terms of having the plant manager verify this,  
18 it's going to take more to get some of that type of evidence in.

19                  MR. O'BRIEN: Your Honor, he can't with our expert  
20 because with this document, that a foundation will not have been  
21 laid for the document.

22                  THE COURT: But he can ask for a preliminary ruling, that  
23 it's going to be laid later, and we can treat that as provisional  
24 testimony.

25                  All right. Anything else in this document that we

1 haven't talked about?

2 All right. Let's go to 1673.

3 MR. PAULOS: Your Honor, this is another document that  
4 plaintiff will be withdrawing their objection on in light of the  
5 Court's previous ruling.

6 THE COURT: All right. 1674.

7 MR. PAULOS: Your Honor, this is a letter from DuPont's  
8 corporate counsel to Mr. Hefter of the U.S. EPA. It's regarding  
9 the consent order. It's an actual response to the -- DuPont's  
10 initial response to the EPA in terms -- in response to the  
11 allegations that are contained in --

12 THE COURT: So this sort of goes to how far we wade into  
13 -- In other words, from DuPont's end, you want to minimize the use  
14 of the language in the complaint. And this is -- the response to  
15 the complaint essentially?

16 MR. MACE: No, sir. This was before even the complaint.  
17 You notice the date of June of '03.

18 THE COURT: But there's an exchange going back and forth,  
19 we're investigating this, and this is DuPont's response? Right?

20 MR. PAULOS: That's correct, Your Honor.

21 MR. MACE: I believe that's the context.

22 THE COURT: We're going to discuss this because this  
23 begets either a widening or narrowing process. So this whole  
24 process winds up with the consent decree at the end. Right?

25 MR. MACE: That's correct, Your Honor.

1                   THE COURT: The question becomes: How much of the back  
2 and forth? There's a dispute as each side looked at this. EPA  
3 had one view. DuPont had another. It results in a consent  
4 decree.

5                   I'm assuming you don't know how much is coming in yet,  
6 but you are putting a lot of this stuff up. But maybe we should  
7 have a more general discussion about how much or how little can  
8 come in -- You know the consent decree is going to come in. The  
9 complaint is going to come in in part. I guess beyond that, what  
10 else are you proposing? If a lot of it comes in, this will come  
11 in with it.

12                  MR. MACE: That's the problem, Your Honor. Some of this  
13 is going to depend on what you end up doing with the TSCA limiting  
14 instruction, which we were extremely concerned about in the first  
15 trial and, frankly, thought that was contrary to what the  
16 discussions had been prior to the trial.

17                  But in any event, Your Honor's prior statements were that  
18 in the limiting instructions, you try to tell the jury how they  
19 should consider evidence, not repeat the factual statements of the  
20 evidence. So that was one of the big issues there. But in any  
21 event, you've indicated already that you're going to let the  
22 plaintiffs go beyond the language in the consent agreement into  
23 this 558, P1.558 --

24                  THE COURT: You're going to have to refresh my memory.  
25 What is that?

1                   MR. MACE: That's the internal deliberations of EPA,  
2 whether they were going to enter into the settlement or not. And,  
3 frankly, we can live with the statements in the consent decree.  
4 But the salacious 403 issues are heightened by this 558. And if  
5 they are going to be allowed to get into that and get into  
6 repeatedly stating what the EPA believed, we need to be able to  
7 rebut that with what DuPont believed contemporaneously.

8                   MR. PAPANTONIO: They hate -- they hate 558 because it  
9 says -- I will show it to Your Honor. It lays out specifically  
10 what they have done wrong. They really don't like it because they  
11 spend the entire trial talking about what they have done right.  
12 And all of sudden, 558 says, you lied to us about toxicity. And  
13 all these -- it's a list, the same list we used all through the  
14 last trial. I understand they don't like it. But the point is  
15 this is what the EPA told them, and they still took no action. As  
16 a matter of fact, after the EPA told them, they continued to cover  
17 it up and spin it.

18                   MR. MACE: We don't like it because the plaintiff's  
19 counsel is misusing it contrary to what Your Honor's ruling have  
20 been, and we need to be able to rebut it because counsel is  
21 presenting these things as if they're governmental findings made.  
22 And we are allowed -- we should be allowed to rebut. There were  
23 not governmental findings made. And if you are letting it in to  
24 show what the government believed, the distinction, I don't think  
25 the jury is going to pick up the difference. P1.558.

1                   MR. PAULOS: And, Your Honor, there were extensive  
2 redactions to 558 in the *Bartlett* trial --

3                   MR. MACE: That's because they didn't identify it among  
4 their 300, Your Honor. So it's not even been ruled on for this  
5 trial because it's not in the prescreened pile for this trial.

6                   MR. PAPANTONIO: Judge, just --

7                   THE COURT: I am confused. Has that been offered?

8                   MR. MACE: Your Honor, this is what happened. So on  
9 DuPont's -- each party agreed to identify 300 prescreened  
10 exhibits. That's what we've been taking up Your Honor's time  
11 with.

12                  MR. PAULOS: Which have been --

13                  MR. MACE: If I could finish my statement. So we  
14 identified to 300, which are largely duplicative, overlapping,  
15 with what was used in *Bartlett*. They largely did not identify in  
16 their 300 what they used in *Bartlett*. They're different exhibits.  
17 Nowhere in their 300 prescreened exhibits is 558. So that's why  
18 it's not in your pile.

19                  MR. PAULOS: The reason that 558 was not in the 300 was  
20 that the agreement amongst the parties is that we did not need to  
21 include the actual exhibit that was referenced deposition  
22 designations. And 558 is prominently featured in many of the  
23 depositions, and that's why it wasn't included in here.

24                  THE COURT: I need to see a copy of it.

25                  MR. PAPANTONIO: This is -- This is the portion we're

1           getting a copy right now -- This is the portion that you may  
2       recall from the first trial, where it says the EPA is saying, this  
3       is what you have done wrong. And the reason it became so  
4       important is even after they were told this, they continued the  
5       same course of conduct. Almost --

6           THE COURT: Here is my question. If I let you go into  
7       the allegations of the EPA that this is what DuPont did wrong, how  
8       could I possibly exclude DuPont's response?

9           MR. PAPANTONIO: Because here's the difference. What  
10       they are trying to do is they are trying to retry the elements of  
11       how the EPA came up with their decision. They want to retry the  
12       case. They want to second guess the EPA and create an entire new  
13       trial --

14           THE COURT: But to be fair, the EPA did not -- In the  
15       end, they have an administrative process. It did not run its  
16       course. So there was not a hearing with a decision. There was a  
17       consent decree instead.

18           MR. BROGDON: There is reference to the decision, the  
19       only ultimate document is the consent decree. Your Honor is  
20       exactly right.

21           THE COURT: My current way --

22           MR. MACE: What he is trying to do, just like he  
23       portrayed to the jury, that these were findings made by the EPA,  
24       which they weren't.

25           THE COURT: Well, let's be blunt. Quick lesson in

1        administrative law, which you all know. So we have got the  
2        litigating side of the EPA. They bring this. This is what they  
3        concluded. But, in turn, have to offer you a right to a hearing  
4        in front of ALJ, and that ALJ -- all the ALJ did was find that  
5        there was no basis for a summary judgment for either side. The  
6        case would have gone to a full blown hearing. Instead, there was  
7        a consent decree. I want the jury to know all of that if we're  
8        going to get into the weeds here.

9              But then we get back to that side of the EPA that brings  
10      the complaint, has reasons for bringing the complaints, these are  
11      essentially a prosecutor's accusations that haven't been  
12      resolved it -- It would be sort of if I let an indictment in but  
13      not the defense.

14             MR. BROGDON: Your Honor, if I may, I think you have hit  
15      on a key point. I don't think a jury will appreciate there are  
16      distinct duties of the EPA. They'll think that if EPA says it,  
17      it's the law.

18             MR. MACE: Nor will they appreciate the difference  
19      between what Your Honor had characterized, well, this is just what  
20      the EPA or part of the EPA believed at the time, versus a finding.  
21      They are not going to see a difference like that, and they're not  
22      going to understand there are two different parts of the EPA.

23             THE COURT: Well, I mean I think we all -- I certainly  
24      let in the last time the complaint. That can come in. But if you  
25      do that, then, of course, DuPont gets to say, we completely

1           disagreed with that. We demanded a hearing. And in the process  
2           of all of this, we entered a consent decree.

3           MR. PAPANTONIO: Judge --

4           MR. BILOTT: Your Honor --

5           MR. PAPANTONIO: Just one second. By the time this was  
6           all over, the conclusion was they had done nothing wrong. And I  
7           think the problem was then we weren't able to talk about the  
8           penalties. We weren't able to talk about --

9           THE COURT: Well, I changed --

10          MR. PAPANTONIO: That solved -- that may solve that  
11          problem.

12          But the point is the way that this digressed into a he  
13          said/she said, and the -- and really a mini administrative hearing  
14          is what they wanted, was that we almost walked away thinking, we  
15          did fine. The EPA said we did fine. Nobody said this was a  
16          settlement. They had to pay their way out of that.

17          THE COURT: That was a big deal at the trial, but, you  
18          know, there are two ways to look at this, and that's what the  
19          trial is about. So I'm going to let you to take the gloves off  
20          and go at this, but I want the jury to get the full picture.  
21          That's the important thing.

22          MR. BILOTT: Your Honor, this was -- I don't know how  
23          many times, and DuPont just keeps rearguing --

24          MR. PAPANTONIO: The same issue.

25          MR. BILOTT: But it was raised in the *Bartlett* case, and

1           Your Honor crafted a limiting instruction that walked the line  
2           between these issues, which we agreed was the appropriate limiting  
3           instruction. This was briefed again, DuPont raised it again, with  
4           another motion *in limine*.

5           Your Honor, you know, we have got -- This has been  
6           raised. It has been briefed. We've submitted that we believe  
7           that the same limiting instruction should be used because it did  
8           balance that. And we didn't --

9           THE COURT: You have the limiting instruction handy?

10          MR. BILOTT: Those were submitted again this morning,  
11          Your Honor.

12          THE COURT: Let me get back to this.

13          MR. BILOTT: And the aspect --

14          THE COURT: Neither of these are what I gave the last  
15          time. These are the new iterations, right?

16          MR. BILOTT: Well, Your Honor, I believe that the version  
17          we're asking for is the same. We are asking for you to give the  
18          same instruction that was provided in the *Bartlett* case.

19          DuPont wants to take out the portion of that limiting  
20          instruction which repeated the language from U.S. EPA about their  
21          concern that if the information had been provided sooner, it could  
22          have acted sooner --

23          MR. MACE: And then --

24          MR. BILOTT: -- which is exactly from -- Those were the  
25          allegations.

1                   And what Your Honor did was to lay out: Here's what was  
2                   alleged. Here's how it was resolved. The parties disagreed on  
3                   it. It was resolved in the consent order.

4                   MR. MACE: In fairness to Your Honor, we pushed this out  
5                   a lot more since your initial rulings in Mrs. Bartlett. When you  
6                   go back and look at the consent decree, you will see that  
7                   paragraph 4 is nowhere to be seen in there. In fact, none of  
8                   those four paragraphs that are in here are in the consent decree.

9                   What they had persuaded you to do for *Bartlett* is to  
10                  excise some of the allegations that were made in the complaint,  
11                  but completely excise from what you repeatedly told the jury --

12                  THE COURT: No offense, but I'm looking at it. It was  
13                  described as what the EPA claimed. It didn't say it came from the  
14                  consent decree.

15                  MR. MACE: Understood. But what you did in the *Bartlett*  
16                  case was you gave various allegations from the complaint without  
17                  giving the detail of the denials of these. You say, well, here's  
18                  what they said. All these things. And, by the way, DuPont denied  
19                  it. It short shrifted us on our side of the whole story --

20                  THE COURT: I would call that truthfully a legal nuance.  
21                  I told them DuPont denied the claims. That was as clear as day.

22                  Now what I want to get to -- We're really arguing the  
23                  case here. We're not making much headway. Here's what I want to  
24                  talk about. Perhaps we need another paragraph to explain very  
25                  briefly but succinctly and effectively, hopefully, how the

1 administrative process works.

2 MR. PAPANTONIO: That would be fine. That solves the  
3 problem. Because otherwise we're having to -- the jury is having  
4 to get the nuance of the administrative. I think it solves the  
5 problem. It is probably the safest thing to do. I hear your  
6 concern. I just want to solve this to where it doesn't -- This is  
7 about the fifth time this has been brought up. They are so  
8 concerned about what the EPA said. And the reason they are is  
9 because it does not allow them to say, we complied with government  
10 agencies. It's a problem for them. No question.

11 THE COURT: That's the first issue. There is another  
12 issue here's what I really want to get to.

13 We had the complaint and we -- the denials is the issue  
14 what we are talking about. The complaint lays out the  
15 allegations. The consent decree lays out the party's ultimate  
16 result. It's what in between. And that has to do with the answer  
17 of DuPont -- By the way, did you offer that as one of the  
18 exhibits?

19 MR. MACE: I think that's coming up, Your Honor.

20 THE COURT: Let's just go ahead. Are you objecting to  
21 the use of the answer that the EPA -- that DuPont filed to the  
22 EPA?

23 MR. MACE: I believe I misspoke. I believe we addressed  
24 that this morning.

25 THE COURT: It's in.

1                   MR. MACE: It's conditionally in based on how far they go  
2 in getting into this and what kind of impressions they leave.

3                   THE COURT: Here's what is going to happen. If we get in  
4 these kinds of documents, we are going to get into -- I assume  
5 DuPont has some documents to respond to. How far do we get into  
6 this? It's either going to be bilateral, or it's going to be out.

7                   MR. BILOTT: Judge, the very things we used the first  
8 time is what is all we're asking for. They're making it sound  
9 like we're making some expansion. The reason they are making this  
10 argument is to lead the Court to believe there is something is  
11 different now. There is nothing different about what they are  
12 saying now and what they said three other times.

13                  But, judge, here is what -- Just to make this clear, if  
14 the Court wants it in a draft whatever kind of limiting  
15 instruction -- obviously, we will agree to any limiting  
16 instruction -- that explains what happened, I'm fine with that.  
17 But, otherwise, we are going to get a mini trial, and they're  
18 going to make it sound like almost they almost got a scout badge  
19 for their conduct.

20                  MR. MACE: In addition to the point that you raised --  
21 and in fairness I know that you haven't had a chance to study the  
22 two parties' two proposals, and you said that you were going to do  
23 that, but let me just highlight as you do that. So you raised the  
24 one that we probably need to add a paragraph or few sentences on  
25 process. Our two other huge issues is one in paragraph 4, which

1       there was a specific motion *in limine* on, which talks about --  
2       reasonably support the conclusion that there was a substantial  
3       risk of injury to health. They want to misuse that --

4            MR. PAPANTONIO: No, we don't --

5            MR. MACE: -- to make it a finding of the EPA.

6            And we also, as Your Honor had discussed, nobody can  
7       infer that the EPA would have done anything different, that it  
8       would have had any effect on Mr. Freeman. So we also included a  
9       paragraph 3 in our proposed which mimics the words you said last  
10      Friday, that they are not allowed to make those types of  
11      inferences.

12           But in addition to that, we have a strenuous objection to  
13      paragraph 4 in theirs, that is focusing the jury on this  
14      misleading statement that reasonably supported a conclusion of  
15      substantial risk of injury when that was the key finding -- We  
16      have referred to this ALJ several times. That was the key  
17      disputed issue of fact that prevented either side from getting  
18      summary judgment.

19           THE COURT: All right. I get it.

20           So back to this document that we started this discussion  
21      with, 1674, is going to, to some extent, depend on what else is  
22      coming in.

23           MR. MACE: I agree with that, Your Honor.

24           THE COURT: So if we limit this to the complaint and the  
25      answer and the consent decree, what's wrong with that?

1                   MR. MACE: We can live with that, Your Honor.

2                   MR. PAPANTONIO: Well, we would want -- For example, he  
3                   wants to already -- The paragraph that he is talking about trying  
4                   to remove here is the paragraph that says, had you given us this  
5                   information, science would not be behind. That became a major  
6                   feature of the trial because what they then do is they stand up in  
7                   2014 and 2012 and say, gee whiz. In 2012, nobody knew anything.  
8                   The key factor there is they are being told, your conduct, by  
9                   hiding this stuff, has cost the progress of science. They want to  
10                  keep that out. We will live with what the Court does. But to  
11                  remove that is patently unjust. We would rather everything come  
12                  in.

13                  MR. MACE: His very statement, Your Honor, shows that he  
14                  wants the jury to assume the truth of this statement when it  
15                  wasn't true. It was never proved to be true. In fact an ALJ  
16                  ruled there was a hotly disputed issue on this.

17                  THE COURT: Right. But it was true it was also the EPA's  
18                  litigating side's position.

19                  MR. MACE: In the complaint. Not in the consent decree.

20                  THE COURT: Understood. But I mean those statements are  
21                  true. There was no resolution, but there was an accusation by the  
22                  EPA.

23                  MR. MACE: But it has got heightened for the reasons in  
24                  our MIL 2, I think it was, heightened trying to have the jury  
25                  inferring anything would have been difficult.

1                   THE COURT: As far as the plaintiff goes, that's right.

2                   But what about the general state of science?

3                   MR. PAPANTONIO: That's the weight of the evidence.

4                   That's what the jury can conclude, judge.

5                   THE COURT: Well, no, you can't -- I don't want -- I  
6                   don't think any way to take their accusation with regard to  
7                   Mr. Freeman's injuries. As far as DuPont's conduct maybe.

8                   MR. PAPANTONIO: Yes, that's correct.

9                   THE COURT: If they went in that --

10                  MR. PAPANTONIO: That's correct. That's correct.

11                  MR. MACE: We had given you the case law in our motion *in*  
12                  *limine*, judge, that's says that's an improper inference that is  
13                  allowing the jury to speculate, and there's numerous cases on  
14                  that.

15                  THE COURT: I will take a look at that.

16                  But I want to go back. In terms of documents we are  
17                  going to put into this universe, this is December 14, 2005, this  
18                  is PX 558, this is -- I assume this is from the same section that  
19                  -- yes, this is the Office of Enforcement of the EPA. This is  
20                  their recommendation to higher ups in the EPA to approve the  
21                  consent decree.

22                  MR. PAULOS: That's correct, Your Honor.

23                  THE COURT: You still insist on offering this?

24                  MR. PAULOS: That's absolutely correct, Your Honor.

25                  THE COURT: That's going to open up for DuPont to put

1           their side in of why --

2           MR. PAPANTONIO: Judge, we're fine with that. I think  
3           the Court will see what is happening when it plays itself out in  
4           court.

5           THE COURT: So to make sure I don't -- thank you. So  
6           that's already coming in. And you're saying that this really --  
7           it's a different time frame. This was before the complaint, but  
8           it is still sort of what each side was positing before this thing  
9           became litigated.

10          MR. MACE: Yes, sir.

11          THE COURT: Now assuming that I buy that, there's still  
12         some -- Are there any other issues that you would like me to  
13         address? I have some concern about the newspaper articles.

14          MR. PAULOS: I was going to point the Court as to the  
15         attachments of this, some of which you have already redacted, and  
16         we have already had rulings on this morning, our communications  
17         that are appended to this letter.

18          THE COURT: To be clear, the newspaper articles -- To  
19         make this easier, the reassignment of 50 women, that came into the  
20         testimony the last time.

21          MR. MACE: Your Honor, but the reason it's relevant here,  
22         and, frankly --

23          THE COURT: Just so you're clear, what I am saying,  
24         that's certainly within the type of evidence that's going to come  
25         in in this case.

1 MR. MACE: Right, DuPont's conduct.

2 THE COURT: From firsthand witnesses, first of all.

3 MR. MACE: Yes, sir.

4 THE COURT: And it's probably in this letter, too, isn't  
5 this they just used -- all through the letter.

6 MR. MACE: These new --

7 THE COURT: This narrow issue of the newspaper article.

8 The information is, I'm saying, certainly relevant. It is the use  
9 of the newspaper article that concerns me.

10 MR. MACE: I think we entered separately as individual  
11 exhibits on the newspaper articles. But the reason they are  
12 relevant -- and we can address it then or now -- is that it gets  
13 into the fact that this was widely publicized. Plaintiff's whole  
14 spiel is that DuPont was hiding these things, sweeping it under  
15 the carpet. This was widely in the media by *The New York Times*,  
16 *The Wall Street Journal*, everybody under the sun was highly  
17 interested in this chemical back in 1981. I mean this was not  
18 some big secret.

19 THE COURT: All right.

20 MR. PAULOS: Your Honor, DuPont's arguments against our  
21 newspaper articles that we tried to proffer yesterday should --  
22 should carry over to their -- their own evidence. These are  
23 newspaper articles that are clearly hearsay. They have --

24 THE COURT: Well --

25 MR. PAULOS: -- plenty --

1                   THE COURT: But if there is some evidence that the  
2 DuPont's press evidence what the allegations would be, then what  
3 was public becomes relevant, particularly information they made  
4 public. But there is no counterclaim like that against your  
5 client where he's -- In other words, he's not accused of  
6 suppressing anything. So showing what other newspaper articles  
7 published had nothing do with this issue that DuPont has raised.  
8 I don't get the -- why one begets the other.

9                   MR. PAULOS: Well, Your Honor, I think to quote DuPont's  
10 arguments yesterday, the newspaper article are per se hearsay and  
11 shouldn't be included or allowed into evidence. There's plenty of  
12 testimony from firsthand witnesses that will discuss DuPont's  
13 conduct surrounding the removal of the female Teflon workers from  
14 the plant line. From what I recall in the *Bartlett* trial, we did  
15 not make any assertion that they hid that fact from the public.  
16 And so to suggest that we did and to allow them to have evidence  
17 on hand to introduce or to rebut something that we have not --

18                   THE COURT: I guess I do see that a little bit. This is  
19 sort of rebuttal. If you get a taste in the case, you know, that  
20 there is a claim put in a position that nobody could know about it  
21 and certainly someone can testify, if they have firsthand  
22 knowledge, this was widely disseminated to the press, that's a  
23 fact. It's, again, the articles. I did see this more as rebuttal  
24 at this point.

25                   So the document, unless there are other issues, will come

1           in without the newspaper articles, again subject to restrictions  
2       if the case takes a different turn.

3           MR. MACE: Yes, sir.

4           MR. PAULOS: Your Honor, there is the letters that are  
5       appended to this document are letters that have been subject to  
6       redaction and other rulings that have occurred today. So I would  
7       request that --

8           THE COURT: Well, this is where -- In this case, are we  
9       looking at what the EPA received?

10          MR. MACE: Yes, sir.

11          THE COURT: But they were redacted to the EPA. We want  
12       the jury to see what was sent to the EPA. Right?

13          MR. PAULOS: We're just going to eliminate the redactions  
14       that we -- that applied to the -- to the other documents. It's  
15       just a way to backdoor the documents without redactions.

16          MR. O'BRIEN: Right, because there were other documents  
17       that we were the proponent of the evidence that went to the EPA --

18          THE COURT: I thought I ordered them to give those to  
19       you. In other words, these redactions in the other -- These are  
20       copies of other exhibits. When we went through the other  
21       exhibits, I thought we had a discussion that you would give to  
22       them what had been redacted, and you would review it.

23          MR. MACE: Yes, sir.

24          MR. O'BRIEN: There are two separate issues. There's one  
25       that was a pre-litigation redaction or a redaction that on the

1 face of the document that wasn't ordered by the Court for trial  
2 purposes. And so that's not an issue. Obviously, there's a lot  
3 of correspondence or information that we're the proponent of the  
4 evidence, one, that for whatever reason had to be redacted, such  
5 as the Little Hocking letter to EPA. So it's not so much an issue  
6 that we have to see everything that the EPA says because the rules  
7 of evidence still apply because that was applied by the Court.  
8 And we're talking --

9 THE COURT: I mean to the extent we redacted anything  
10 from these letters that were attached --

11 MR. PAPANTONIO: They should be redacted.

12 THE COURT: -- they should be redacted here.

13 MR. PAPANTONIO: That's all --

14 MR. MACE: But the jury would need to be told that those  
15 redactions in this, when this was used, they would have to be told  
16 those items were not redacted when they were sent to the EPA. We  
17 don't want the jury thinking that the EPA was given --

18 MR. PAPANTONIO: That's fine.

19 MR. PAULOS: And the other thing, too, Your Honor --

20 THE COURT: Remind me of that, but I will give an  
21 instruction that redacted in this case, not in the letters that  
22 the EPA received.

23 MR. PAULOS: The letters that were appended to this are  
24 also the documents that were created for trial or for the purposes  
25 of exhibits that are excerpts of larger documents. And so you

1 will recall Mr. Bilotte was informing the Court there was one  
2 document where they -- the alleged disclosure of the public entity  
3 about FC-143 surfactant being in the water was actually buried in  
4 the document and that it had been excerpted and was made to appear  
5 it was a two-page document. That is, again, appended to this  
6 letter. And this is exactly what they were trying to show the  
7 EPA. Look at we told you years ago that this -- that this was an  
8 issue. And -- But what they didn't tell the EPA when they  
9 submitted this very letter that it was buried in a 100-page  
10 document and made it appear it was a two-page document. It a --

11 THE COURT: That's cross examination, though. You're  
12 going to have to use it that way. But that was what was sent.

13 MR. MACE: Yes, sir.

14 THE COURT: So we'll start with this. Anything omitted.  
15 You can certainly delve into.

16 All right. That takes us through volume 1. I don't  
17 think this is using the same system.

18 MR. MACE: I have a red one.

19 THE COURT: This one is a little smaller. All right.  
20 Let's get to 1695.

21 MR. PAULOS: Your Honor, this is a list of drinking water  
22 standards for the Ohio public water system, and it's irrelevant.

23 THE COURT: Well, here's what with this, you know, it  
24 would otherwise -- It's a public record, but that doesn't solve  
25 the relevance issue. How can a jury compare arsenic to C-8? I

1 mean there is not going to be any testimony about these chemicals.

2 MR. MACE: You will recall, Your Honor, on a couple  
3 occasions both plaintiff's counsel and plaintiff's expert misled  
4 the jury, that C-8 was on the MCL list or there had been a draft  
5 MCL, both of which were patently false and untrue.

6 THE COURT: So you want to use this for impeachment  
7 basically?

8 MR. MACE: Primarily, yes.

9 THE COURT: So if somebody says, it's on this list. And  
10 this is a list of all the regulated chemicals, it's not on there.  
11 You can use the list for that purpose.

12 MR. MACE: Yes, sir.

13 THE COURT: But it won't be admitted for this. Use it  
14 for cross, and we'll take it from there.

15 MR. MACE: Yes, sir.

16 THE COURT: All right. 1673. Does that have to do with  
17 names?

18 MR. PAULOS: I think it's 1763, Your Honor. And we're  
19 prepared to withdraw our objection to this. However, it does  
20 include a document -- The first two pages of this document are a  
21 document that the Court redacted earlier today, and I mean we  
22 would simply ask those same redactions apply here.

23 THE COURT: All right. You see it that way. Is that  
24 agreeable?

25 MR. MACE: We are not agreeable, but we will do what the

1 Court ordered.

2 THE COURT: There are no additional objections. We will  
3 preserve your earlier objection.

4 MR. MACE: Thank you, sir.

5 THE COURT: Does that take care of the whole document?

6 MR. MACE: Yes, sir.

7 THE COURT: All right. 1767.

8 MR. MACE: And I think, Your Honor, this is the --  
9 remember the earlier document that said enclosures will be  
10 separately circulated. So these were the enclosures for that  
11 meeting between the state and DuPont that was discussed in this  
12 earlier document. We said we would get to the separate  
13 circulation of the attachments.

14 THE COURT: So these are the attachments. Any objection?

15 MR. PAULOS: Your Honor, again, this is page 1767.23  
16 contains the summary of the meeting with the WV DNR --

17 THE COURT: Before we get to that, I'm actually smiling  
18 here, all that time we spent yesterday with the numbers, operating  
19 expenses and so on --

20 MR. PAPANTONIO: It's being offered.

21 MR. O'BRIEN: This is how it came in. This is actually  
22 how it came in.

23 MR. PAPANTONIO: This is being offered.

24 THE COURT: Right. I mean do we want to redact that?

25 MR. O'BRIEN: No, no. The Court has ruled that it's in.

1                   THE COURT: Well, we're not playing checkers. Nobody has  
2 taken their finger off yet.

3                   MR. MACE: I'm sorry, what page were we on, sir?

4                   THE COURT: 1767.2. You probably know it by heart. You  
5 don't need the actual page in front of you.

6                   MR. MACE: Yes, sir.

7                   THE COURT: But it has got the payroll -- I don't know  
8 what year this is, '92 --

9                   MR. MACE: Yes, sir.

10                  THE COURT: Operating costs, \$600 million, everything we  
11 agreed to.

12                  MR. MACE: You had asked to look into those and come up  
13 with a way that would be agreeable --

14                  MR. O'BRIEN: We drilled down. What you said yesterday  
15 was that you can use \$600 million. There would be representation  
16 of what percentage --

17                  THE COURT: Of the C-8 operations information.

18                  MR. O'BRIEN: Right. That was the resolution. I have no  
19 problem with taking the payroll out and the other numbers out.  
20 But we fashioned a compromise on that 600 million.

21                  THE COURT: All right. So they are going to hear about  
22 the 600 million which the 25 percent applied to it. All right.

23                  But we will take out the payroll --

24                  MR. MACE: Your Honor, frankly, I mean that's part of the  
25 operating costs, so it's part of putting that into context.

1                   THE COURT: So you want to leave that in?

2                   MR. MACE: Yes, sir.

3                   THE COURT: I assume you have no objection.

4                   MR. O'BRIEN: Well, what they're doing that for is to  
5 tell the jury, we contribute --

6                   MR. PAPANTONIO: Judge, it's either one thing or the  
7 other. It's either we take it out or we just put the entire thing  
8 in.

9                   MR. MACE: Well, if we take it out --

10                  MR. PAPANTONIO: They didn't talk about it yesterday. We  
11 knew it was coming down the pike. We said, well, okay. Let's do  
12 a compromise. So today it shows up they want everything in.

13                  MR. MACE: If they want everything out, then you take the  
14 600 million out. But we should be able to be put it in context.

15                  THE COURT: Well, the 600 million is coming in anyway.  
16 The 110 million, not necessarily.

17                  MR. MACE: Why is that?

18                  MR. O'BRIEN: It's not relevant to anything.

19                  THE COURT: I thought you had an agreement that we would  
20 use the operating cost --

21                  MR. PAPANTONIO: We did, judge.

22                  THE COURT: -- and we should tell them 25 percent was  
23 related to C-8.

24                  MR. MACE: And they should be told the same percentage  
25 applies to the payroll.

1                   MR. O'BRIEN: But what is that relevant to?

2                   MR. MACE: Because it puts -- they want to make the jury  
3                   think that there's \$600 million sitting around in Bossert's desk  
4                   that he can spend it on whatever he wants to spend it on. It's  
5                   actually tied with all these other required expenses to operate a  
6                   plant.

7                   MR. O'BRIEN: Your Honor, it's pandering to the jury, to  
8                   the jury pool --

9                   THE COURT: I'm not sure I agree with that. They are a  
10                  million -- The more numbers you put out like this, the more chance  
11                  of speculation. A juror can look at this and say, all that money  
12                  spent and only one sixth gets to the employees. Somebody might  
13                  say that. And on the other hand, somebody else might say, gee,  
14                  it's really helping the local economy. It can go anywhere. If  
15                  you want a game analysis, it's like a billiard ball. You don't  
16                  know where it is going to bounce.

17                  I think the payroll -- Really I think we ought to exclude  
18                  everything from that except the date the plant began operation and  
19                  the annual operating manufacturing costs. And that's it.

20                  MR. O'BRIEN: Okay.

21                  MR. PAPANTONIO: Okay.

22                  THE COURT: That's one thing. If we go to into second  
23                  phase, it's all a different analysis. That takes care of that  
24                  exhibit, right?

25                  MR. PAULOS: One moment, Your Honor. Again, it's just

1           the -- On page 1767.23, we just like the redactions that Your  
2           Honor applied to this summary of the meeting to apply to this --  
3           this version.

4           THE COURT: Subject to your earlier objection, nothing  
5           new, right?

6           MR. MACE: Yes, Your Honor.

7           THE COURT: It will come out again.

8           Now we get to 1837.

9           MR. PAULOS: Your Honor, this is another document. That  
10          is actually one of the attachments that was on U.S. EPA letter  
11          that we were just discussing, and it's a document that is an  
12          excerpt of a much larger document.

13          MR. BROGDON: Your Honor, we dealt with 1837 and 1943  
14          again in the *Bartlett* trial. Mr. Bilotto and I conferred. We were  
15          able to supply the fulsome document and met their satisfaction.  
16          We can do the same thing here.

17          THE COURT: That sounds agreeable.

18          MR. BILOTT: Yes, Your Honor.

19          THE COURT: Very good. It will be admitted subject to  
20          you working the details out.

21          MR. PAULOS: And, also, Your Honor, subject to notifying  
22          the jury, if this is shown visually on a screen where you can't  
23          tell how many pages to this document there are, the document  
24          appears to be a much larger document, that this is simply an  
25          excerpt of it.

1                   THE COURT: All right. I think that takes us to 1854.

2                   MR. O'BRIEN: Your Honor, 1006 is an exhibit offered by  
3                   the defendant, and here's the problem. The problem is they have  
4                   never -- When we produced our 1006 summary for the emissions data,  
5                   we had all the references in the tab of the index which  
6                   immediately followed the voluminous record summary, and we also  
7                   provided all of those supporting data documents so that the  
8                   veracity of the documents can be reviewed and confirmed by the  
9                   opponent of the evidence.

10                  Here we have not received the documents. We have not  
11                  received the underlying documents. The second sentence of 1006  
12                  requires, as follows, the proponent must make the originals or  
13                  duplicates available for examination or copying or both by other  
14                  parties --

15                  THE COURT: Your contention is this is a summary exhibit,  
16                  and the backup document wasn't provided.

17                  MR. O'BRIEN: Right. What we did in the last trial, and  
18                  I think it got mooted because it never got tendered as a 1006,  
19                  they then produced -- We said, where are the data? And they  
20                  produced another spreadsheet. Well, the spreadsheet is not the  
21                  data. The spreadsheet is a summary of the data, and then they  
22                  excerpt the portion they like out of the spreadsheet. So we get  
23                  to review the actual data to show whether folks had kidney cancer  
24                  or whether they worked in Teflon or whether they worked in  
25                  Beauticide.

1                   MR. MACE: Yes, Your Honor. There were documents Your  
2 Honor had ruled could come in the last trial.

3                   You will recall what happened was -- We gave them all the  
4 information on a CD. We produced the CD to them. Your Honor took  
5 an extended lunch hour to let them review it with regard --

6                   THE COURT: Only because of the CD. But go ahead.

7                   MR. MACE: Yes. But, you know, they have known about  
8 these summaries. These are the same summaries that were prepared  
9 for that trial. They have the data.

10                  THE COURT: That's my question.

11                  MR. MACE: I am trusting Mr. O'Brien's statement --

12                  MR. PAPANTONIO: No, we don't have the data.

13                  MR. MACE: They've had it since September.

14                  MR. PAPANTONIO: That's not true.

15                  MR. O'BRIEN: We got the spreadsheet summarizing the  
16 data, a larger spreadsheet summarizing the data, and then a  
17 excerpt of that spreadsheet/ we don't have the underlying data  
18 itself. We are completely unable to determine whether the facts  
19 represented on either of the two spreadsheets are correct.

20                  MR. MACE: The data is the CD. That is the data, and  
21 they were given -- They were given it again during the *Bartlett*  
22 trial. They had it since 2004 when it was produced as discovery.

23                  MR. PAPANTONIO: Judge, this is far different from us  
24 saying, how much poison was put in the river every year? Well, we  
25 can show this year this much poison was put in. This year there

1           was this much. And we have the data to do it.

2           Here there is -- What they are talking about data is --  
3           are conclusions in and of themselves. The conclusions are not  
4           going to --

5           THE COURT: We need to drill down. So let's just take  
6           the first person on here, age 52 in 1971. If we go to the  
7           spreadsheet, tell me what would be on there about this person?

8           MR. BROGDON: The spreadsheet is kept by Haskell  
9           Laboratories, the epidemiologists who record the data. This is  
10           the business record where this information is kept. And it tracks  
11           the doses. It tracks the dates. It tracks all the screening that  
12           was done over the years.

13           THE COURT: That's all on the spreadsheet.

14           MR. BROGDON: It was in the spreadsheet that was produced  
15           in '04.

16           THE COURT: How many years worked?

17           MR. BROGDON: Yes.

18           THE COURT: Years of water.

19           MR. BROGDON: All the information columned in the  
20           spreadsheet, where they worked, the positions, all those things.

21           THE COURT: My assumption this was -- well, the person  
22           was diagnosed in 1971. What year would you expect that document  
23           to be created?

24           MR. PAPANTONIO: More importantly, what is the diagnosis,  
25           what is the underlying elements of the diagnosis, judge? We don't

1 have the --

2 MR. O'BRIEN: We don't have the raw data.

3 MR. PAPANTONIO: They're jumping to the conclusion that a  
4 particular diagnosis took place without any supporting data.

5 THE COURT: I haven't seen it. I am trying to figure out  
6 what's there. On the spreadsheet --

7 MR. MACE: Your Honor, if I can have ten more seconds on  
8 the objection background, what this goes to is rebuttal of their  
9 misuse of the surveillance. The plant every five years or so  
10 would do surveillance where they would compare: What types of  
11 diseases are we are seeing in the overall plant? And you have  
12 heard other testimony about going to check: Were this people in  
13 the Teflon area or another area? This gets to: What did DuPont  
14 know back at the time regarding the people that were showing up  
15 with diseases?

16 THE COURT: I get that. But now we get into the weeds  
17 under 1006. So were there backup documents that are not the  
18 spreadsheet? I guess that's the question.

19 MR. PAPANTONIO: Judge, if there were a disease. We  
20 ought to be able to see who made the -- how the determination was  
21 made of the disease? Simply because somebody says they have this  
22 type of cancer, we have the right, under 1006, to understand:  
23 What is that?

24 THE COURT: What you are really getting into is broader  
25 than 1006. How did the company know when somebody did or didn't

1 get renal cell carcinoma?

2 MR. O'BRIEN: It is tied up in there. In other words, we  
3 have an unknown scrivener --

4 THE COURT: There may be an answer to this. So there's a  
5 medical department at the plant. Would these be the people who  
6 collected the data?

7 MR. BROGDON: It is likely have come from them. They  
8 worked with the people in Wilmington with this. But it's  
9 important to note that the spreadsheet itself is a business record  
10 that's been kept now -- over a decade ago it was produced. It was  
11 provided in 2004. That data was recorded in the due course of  
12 operations of Haskell Labs.

13 THE COURT: And that could very well come in as a  
14 business record. But when we get a summary, it might take us into  
15 a different field.

16 For some of those, I don't know what years. When we look  
17 at the diagnosis here, we're going pretty far back, are the paper  
18 backups to this gone?

19 MR. MACE: That's my understanding, Your Honor.

20 MR. BROGDON: I believe that's the case for most of  
21 the --

22 THE COURT: Wait, wait, wait.

23 MR. BROGDON: What DuPont captured is the business  
24 record. That's the way they are kept.

25 THE COURT: What is left is on the spreadsheet?

1                   MR. BROGDON: It's a record that's kept, yes.

2                   MR. O'BRIEN: And then there's some spoliation of  
3 evidence.

4                   MR. PAPANTONIO: Exactly.

5                   THE COURT: This is -- The first person on here is 1971.  
6 If they were destroyed ten years later, it would be well beyond  
7 the lawsuit.

8                   MR. O'BRIEN: Right, but the data were actually collected  
9 not in 1971 they were collected in the 2000s. Is that right, Mr.  
10 Bilott?

11                  MR. BILOTT: If I can clarify for a moment, this data  
12 that DuPont's referring to, one of the reasons we have great  
13 concern about seeing what the backup information is that was the  
14 same data that was supplied to the Science Panel. The Science  
15 Panel said, we don't understand where these tallies are coming  
16 from. They had to redo it.

17                  So in some sense -- I mean what we are trying to do is  
18 put in their version of the Science Panel data. The Science Panel  
19 redid this and looked at the worker data again.

20                  THE COURT: When you say redid, what did you mean?

21                  MR. BILOTT: They did their own study and analysis of the  
22 workers because we looked at DuPont -- whatever DuPont gave  
23 them --

24                  THE COURT: What did they use?

25                  MR. BILOTT: They did it themselves.

1                   THE COURT: They dug out from the treating physician the  
2 information?

3                   MR. BILOTT: I don't know exactly what sort of raw data  
4 they were given access to, but they ended up redoing --

5                   THE COURT: I think this is bigger than 1006. The  
6 question is: How do you know? That's the question.

7                   MR. BILOTT: Exactly.

8                   MR. MACE: Your Honor, again, it's for this record that's  
9 kept by Haskell. It's the basis for what DuPont was making its  
10 decisions on.

11                  THE COURT: This would be prepared for litigation. This  
12 is not a business record. The backup document very well might be.

13                  MR. BROGDON: But the backup documentation is thousands  
14 of pages of spreadsheet. That's why we have the 1006 summary of  
15 that document, which is a business record.

16                  MR. MACE: Which they have had for twelve years.

17                  THE COURT: I disagree. The backup documentation that is  
18 kept in the regular course is the business record.

19                  MR. BROGDON: You're right, Your Honor. I'm not saying  
20 this is. The backup document is the business record. It's to  
21 thousands of pages of spreadsheet --

22                  THE COURT: To make it easy, I get it.

23                  MR. BROGDON: Thus the brief 1006 of a voluminous  
24 document.

25                  MR. PAPANTONIO: At the end of the day, who said this is

1           a malignant neoplasm of the kidney? Those documents are the very  
2           essence of these conclusions.

3           THE COURT: So, in other words, if we look -- if we look  
4           at the backup document, it will say this. But it won't say who  
5           made the diagnosis. Would that be accurate?

6           MR. MACE: I think that's accurate. But, again, this  
7           data that's coming from the voluminous records, that was the  
8           business record, is the basis on which DuPont was making its  
9           decision. Now that's where -- When you come up with the nine  
10          cases or whatever, they want to use the summary document from '89,  
11          '97, there are several of these, where they said, oh, you had  
12          seven cases of kidney cases. Well, these are the seven cases. So  
13          it's their diagnosis. But it's the other information that DuPont  
14          also had. So it looked back at, not only what the job history --

15           THE COURT: Is it on here?

16           MR. MACE: I am sorry?

17           THE COURT: The other information that you are referring  
18          to?

19           MR. MACE: This information along with other information  
20          about each of these individuals is in this voluminous record.

21           MR. O'BRIEN: But we don't know who authored this  
22          voluminous record. There's no indicia of reliability other than  
23          it's a spreadsheet, it's an excel spreadsheet. We can't  
24          cross-examine. We are in an impossible -- We don't accept this at  
25          face value.

1                   THE COURT: Well, you can't cross-examine about the  
2 limitation of the information behind it.

3                   MR. O'BRIEN: The underlying information behind where  
4 there's no way of us knowing that's true other than some unknown  
5 declarant entered it into an excel spreadsheet.

6                   MR. PAPANTONIO: We are cross-examining -- For example,  
7 if we're cross-examining a differential diagnosis, we would  
8 understand how to cross-examine of this differential diagnosis,  
9 what are the parts of what that doctor did when he said, well,  
10 this is neoplasm kidney disease. We have no information about  
11 this disease. They have it. If they can get it to us, fine. But  
12 to simply say --

13                  THE COURT: What do you think they have that you don't  
14 have?

15                  MR. O'BRIEN: They should have it. If they are  
16 extracting this information and putting it into a spreadsheet,  
17 they should have that information, the actual information, whether  
18 it's a questionnaire of the worker or whether it's records from  
19 the worker's comp doctor or whether it's from the plant doc, such  
20 as Dr. Powell or Dr. Karrh. They should have the underlying data  
21 because they are representing it as true, and we have no way to  
22 confirm that. We have no way to even cross-examine --

23                  MR. MACE: Your Honor, that's --

24                  MR. O'BRIEN: May I finish, please? May I finish,  
25 please? We have no way to cross-examine this unknown scrivener --

1                   THE COURT: I get it.

2                   MR. MACE: It is no different than a database that is  
3                   kept of the billing records for your light bill. I am sure AEP or  
4                   whomever doesn't keep every monthly bill they send to you. But  
5                   they have a record --

6                   THE COURT: I think, you know, what I was billed in 1980  
7                   is different than a diagnosis of informing me I have cancer. One  
8                   is a perfunctory act. The other is something that requires  
9                   judgment and expertise and so on.

10                  But having said that, how are you going to use it? How  
11                  do you so as a defense exhibit?

12                  MR. MACE: This is going to be used in rebuttal when they  
13                  are trying to mischaracterize -- They're going from another  
14                  summary, this '89 summary report of surveillance data from the  
15                  plant, which lists seven kidney cancer cases. I'm not sure about  
16                  the numbers exactly. But so many kidney cancer and so many  
17                  testicular cancer. But at the same time, DuPont had the data on  
18                  those individuals, whether they worked in Teflon or not, whether  
19                  they had tobacco exposure, which is a risk factor for kidney  
20                  cancer, the various data that made -- allowed them to investigate:  
21                  What does this mean with respect to C-8? Which they did.

22                  THE COURT: There is an employee ID number, which is I  
23                  assume the first number at the left, on each of these people.  
24                  You're confident that if you went back and looked at their file,  
25                  this information would all be gone?

1                   MR. MACE: We actually walked through this, Mr. Brogdon  
2 did over the lunch hour, I thought it was with Mr. O'Brien --

3                   MR. BROGDON: McWilliams.

4                   MR. MACE: Mr. McWilliams in detail to show him this is  
5 where it comes from, the column --

6                   MR. PAPANTONIO: We are -- Judge, we have the same  
7 problem, if I might --

8                   THE COURT: What I want to do is clear this up. The  
9 information you are confident doesn't exist in any --

10                  MR. MACE: Any form other than kept business record.

11                  MR. BROGDON: This record has existed in some form for  
12 many years. So, yes, the underlying documents from the '70s,  
13 '80s, as far as we can tell aren't there because they were  
14 captured in this method of reporting which is what the corporation  
15 uses. This is the spreadsheet, the record it uses --

16                  THE COURT: Now let me go back. I know I'm jumping  
17 around here, but I'm trying to get my arms around this issue. Are  
18 any of the experts going to use this list?

19                  MR. MACE: Well --

20                  MR. PAPANTONIO: We are not because our experts are going  
21 to say, well, in order to diagnose malignant neoplasm, is it oat  
22 cell carcinoma? Where did it initially metastasize? How long did  
23 it take it to develop? All --

24                  THE COURT: The reason that I ask, this is a defense  
25 exhibit. What I'm getting at is what do you need this for?

1                   MR. MACE: Dr. Rickard would use this because he went  
2 back into the database with the in-house epidemiologist and made  
3 sure he was interpreting this right. He was involved in helping  
4 to create the summary and make sure it was an accurate summary.

5                   And you will recall that we used one of these -- I mean  
6 we have got several of these from different years. We used at  
7 least one of at least type of them in the first trial. And  
8 Rickard was the witness to say this is a true and accurate.

9                   MR. O'BRIEN: May I speak to something here?

10                  THE COURT: Hang on a second. So Rickard has a high  
11 level role. And he's not a medical doctor?

12                  MR. MACE: He's a toxicologist.

13                  THE COURT: What I am asking -- First of all, the -- tell  
14 me if I am missing this -- so DuPont every so many years do  
15 surveys to see if they have big jump in certain types of medical  
16 conditions? That's the whole point of this, right?

17                  MR. MACE: Right. There's a little more to it than that.

18                  THE COURT: You know, that's something that goes to their  
19 conduct. That's all admissible. Assuming you have somebody with  
20 the right knowledge and credentials.

21                  But these small groups, over a period of years,  
22 scientists and epidemiologists couldn't do much with this. This  
23 is a fairly small group of people.

24                  MR. MACE: This not an epidemiology study. It's a  
25 surveillance. But at most it is an identifier is there more to

1           look at or not. But what they did was looked back at the  
2         individuals to see: Where did they work? Is that something that  
3         we need to look into?

4           THE COURT: And that goes to corporate conduct.

5           MR. MACE: Which is what they were looking at.

6           THE COURT: This doesn't rule out anything in a medical  
7         sense. You're not going to make that argument, are you?

8           MR. MACE: No, sir.

9           THE COURT: That's why I think we're kind of chasing our  
10       tail here.

11          MR. O'BRIEN: If I may speak to a couple things. I  
12       disagree that it is a business record because a business record  
13       has a contemporaneity requirement.

14          THE COURT: This particular document, I am sure is.

15          MR. O'BRIEN: Right. But the underlying data, there is a  
16       contemporaneity requirement.

17          THE COURT: I get it. But here's my question. Do we  
18       need any of these, showing what happened to people at the plant?

19          MR. O'BRIEN: The issue is not whether these are correct  
20       so much as to whether they missed a bunch, and they under  
21       reported. That's --

22          THE COURT: But no expert in the case is going to look at  
23       -- These are all employees, right?

24          MR. MACE: These are employees, Your Honor.

25          THE COURT: There is no particular study about employees,

1           is there?

2           MR. PAPANTONIO: There is one, judge. But it wasn't done  
3       by us. We didn't put the documents together. Scientists did.  
4       And their own people were involved --

5           MR. MACE: We need to rebut it, Your Honor, because  
6       they're using this '89 surveillance report with Dr. Siegel,  
7       perhaps Petty, with their experts to say, ah-ha. These terrible  
8       people, they saw an excess of kidney cancer in their plant, and  
9       they didn't do anything about it. They did do something about it.

10          THE COURT: Are you expecting that?

11          MR. PAPANTONIO: Yes, that will happen. It's not that  
12       they didn't do anything. They can say we did something about.  
13       But to say that what we're doing, we're now telling the jury that  
14       based on completely guesswork, that this person, 1890 had kidney  
15       neoplasm, judge, this is a huge leap.

16          We have no trouble saying they had a monitoring process.  
17       Our is not anything -- The document we offer is nothing like this.

18          MR. O'BRIEN: The other issue here is not so much what  
19       did they use it as. Number one, they tried to use it on cross  
20       with our folks, which, obviously, they can't do because they  
21       haven't established a foundation for it. Number two, it's not so  
22       much -- the issue about whether they misdiagnosed is a huge issue.  
23       The more important issue is where these folks worked. Did they  
24       work in Teflon or did they ever work in testify? Because what  
25       they say is, hey, when we looked at the spot where the Teflon was,

1           we didn't find such a signal. We didn't find the numbers. They  
2       came from outside the Teflon group.

3           The point is the data came from a claims database, and  
4       that that evidence should never be destroyed because it is  
5       insurance information. It should never be destroyed.

6           MR. PAPANTONIO: It's not there.

7           MR. O'BRIEN: And if it was destroyed, particularly at  
8       the time these records were created, the underlying spreadsheet  
9       for the data, that's a destruction of evidence from which they  
10      should not profit.

11          MR. BILOTT: And an important point here is that the  
12       documents plaintiffs have used are documents that were prepared by  
13       DuPont's corporate epidemiologist as part of their routine  
14       business, and it was actually prepared by the DuPont  
15       epidemiologist. We used them with our experts who are  
16       epidemiologists to review that data.

17          What DuPont is saying they are going to do is to give  
18       what in essence an epidemiology results to non-epidemiologists,  
19       Dr. Rickard is not an epidemiologist. Mr. Playtis is not an  
20       epidemiologist. They don't have an epidemiologist.

21          MR. PAPANTONIO: Not even a medical doctor.

22          MR. MACE: This is not epidemiology evidence. This is:  
23       What was the significance, if any, when they saw seven kidney  
24       cancers? They looked back at -- The testimony was in *Bartlett* --  
25       they looked back at: Where did these people work? Was there a

1           cluster around the people working in C-8? No. Were there other  
2           things these were exposed to like tobacco that could explain it?  
3           Yes. And this is why -- it rebuts their statement: You saw a  
4           excess of kidney cancer at the plant. You should have done more.  
5           It should have alerted you to do more. We did more. We went and  
6           investigated it.

7           MR. DOUGLAS: If you're looking at cluster, you're  
8           talking about epidemiology.

9           THE COURT: Well, you know what? Way -- I am guessing  
10          this sounds like a fairly important document.

11          MR. PAPANTONIO: It is, judge.

12          THE COURT: You are going to brief this. I don't feel  
13          comfortable doing this on the fly. I do see a lot of different  
14          issues. Are you satisfied if we do simultaneous filings, in that  
15          sufficient. Is that by Monday?

16          MR. O'BRIEN: Yes, Your Honor, there are several  
17          documents to which they apply so I can announce those so we can --  
18          we don't want to rehash this this afternoon. I think that this  
19          would -- the common objection would apply this common objection  
20          would apply to D.1854, D.1858, D.1860, D.1857, D.1861 and D.1863  
21          and D.2453 and D.2452.

22          MR. PAPANTONIO: Judge, just to ease this, our  
23          fundamental complaint is the inability to cross-examine is the  
24          most essential part of our right. It just removes our possibility  
25          of cross-examination entirely.

1                   MR. O'BRIEN: So it goes to unfair notice, there are  
2 really two avenues of records which should have been kept. One is  
3 the medical records. Two is the employment records. It is  
4 inconceivable a pension company, such as DuPont, has destroyed  
5 employment records, and here's why this is important.

6                   THE COURT: Well, you can address this in the brief. I  
7 don't want to decide this on the fly.

8                   So is the --

9                   MR. O'BRIEN: And all I'm doing is giving them fair  
10 notice as to what to brief since we're doing contemporaneous  
11 briefing, Your Honor, is that we're going to make the  
12 representation at that time employment records were destroyed, and  
13 we would like them to know that.

14                  THE COURT: So there are a number of these. That are the  
15 next exhibit is covered by what we just discussed, right.

16                  MR. MACE: Right. This is one of the type -- one of  
17 these types. I think the one from '89 instead of '97, which was  
18 expressly admitted in *Bartlett*.

19                  THE COURT: Just so I'm clear on 1857, it says kidney  
20 work history. It doesn't have a condition listed. What do I make  
21 of that?

22                  MR. MACE: Yes, sir. So you see the employee numbers in  
23 the left column.

24                  THE COURT: Right.

25                  MR. MACE: So you see the shading separates individuals.

1           So it shows their work history over time and what different jobs  
2       they had at the plant.

3           THE COURT: But it doesn't show the conditions. Are  
4       these all people with kidney issues?

5           MR. MACE: Exactly, kidney, work history. So the people  
6       that showed up with an observed case of this kidney cancer in  
7       1997, when you went back and looked at their employee records,  
8       which was done at the time, what was their job history, did they  
9       work in Teflon or not.

10          THE COURT: And how about when we get to --

11          MR. LEBER: I believe 1874, Your Honor, is the next  
12       document at issue.

13          MR. PAULOS: Your Honor, this is a document that has a  
14       date of September 20, 2000. And it is simply a list of certain  
15       CEGs and AELs that developed over time at DuPont. We believe that  
16       at a minimum this would require the Court to give a limiting  
17       instruction regarding those values.

18          MR. MACE: And this is one of the documents in the  
19       plaintiff's experts' backup. We have the author on the back of --  
20       the second page of the bottom the date this was created. But  
21       there is no contention this isn't an accurate list of the various  
22       AEL --

23          THE COURT: You want a limiting instruction with this?

24          MR. PAULOS: Right, Your Honor.

25          THE COURT: Otherwise, you are satisfied with this?

1                   MR. PAULOS: Yeah, we have no objection aside from the  
2 Court providing its limiting instruction regarding AELs and CEGs.

3                   THE COURT: Then we get to 1927.

4                   MR. PAULOS: Your Honor, we're going to go ahead and  
5 withdraw our objection to this in light of the Court's guidance  
6 this morning.

7                   THE COURT: 1936?

8                   MR. PAULOS: 1936 is a list of known uses of chemicals of  
9 carcinogenic potential. It appears to be a list of chemicals I  
10 believe at use at the Washington Works Plant. It's not clear. We  
11 believe that this has no relevance to any issues in the case.

12                  THE COURT: What's the issue here?

13                  MR. MACE: Two, Your Honor. Again, with this cancer  
14 surveillance reports, so they're saying, my goodness. You had  
15 cancer cases showing up in your plant. And they want the jury to  
16 think that the only chemical being used at the plant was C-8 --

17                  THE COURT: We got into this before.

18                  MR. MACE: In fact all these other chemicals that are  
19 capable of causing cancer. So just because somebody --

20                  THE COURT: Isn't that dangerous on your end to --

21                  MR. MACE: But that's my choice.

22                  THE COURT: It is. But that's -- that's really going to  
23 rebuttal, right?

24                  MR. MACE: Yes, sir.

25                  THE COURT: Let's see how this plays out. If that

1           becomes an issue -- Well, at the plant these would have to be --  
2           We're not talking about an employee. It's the plaintiff.

3           MR. MACE: We are for these surveillance reports. Again,  
4           they are trying to say, you are on notice, big, bad DuPont --

5           THE COURT: Right. But then for people who are not in  
6           this case, we're going to be using them. And then we're going to  
7           be using what other causal factors -- I mean we are getting a  
8           little -- two steps removed from what's at trial in the case. I  
9           want to be careful this doesn't turn out to be a trial about  
10          employees who aren't even parties in this case.

11          MR. MACE: But to the extent they're going to use  
12          employee data to attack my client --

13          THE COURT: I mean we're only going to go so far with  
14          this --

15          MR. PAPANTONIO: Judge, we don't intend to use employees  
16          data unless we're given the employees data.

17          THE COURT: Your experts aren't going to --

18          MR. PAULOS: We are going to use the cancer incidence  
19          registry.

20          MR. PAPANTONIO: Well, cancer incidence registry --  
21          that's what I'm saying. They're going to be tied up to the cancer  
22          incidence registry.

23          THE COURT: The cancer?

24          MR. O'BRIEN: The cancer incidence registry.

25          THE COURT: You are planning on using that.

1                   MR. O'BRIEN: Right, and both sides unless --

2                   THE COURT: This is all going to be in play. It's not  
3                   going to go away.

4                   MR. PAPANTONIO: No, I don't see it going away, judge.

5                   THE COURT: All right. In looking at my watch, I have  
6                   it's five until three. I have to take a break in five minutes. I  
7                   have another matter at three.

8                   MR. BROGDON: The next one is 1943. I think we can move  
9                   on. Again, that is Mr. Bilotte and I will work to correct with  
10                  1837.

11                  THE COURT: Very good.

12                  MR. PAULOS: That is the record of another excerpt of a  
13                  much larger document.

14                  THE COURT: And 1947.

15                  MR. PAULOS: Your Honor, our only objection to this  
16                  document is the fact that it's labeled page 10 of what appears to  
17                  be in fact it's incomplete. Other than that, if DuPont could  
18                  produce the complete document that this is part of, we would  
19                  withdraw our objection.

20                  MR. MACE: We can check into it, judge, but it is a  
21                  standing alone document. The fact that it may be faxed to  
22                  somebody else with something else, it is a single-page document  
23                  that Dr. Playtis will be one of the witnesses at the trial. It's  
24                  his document.

25                  MR. PAPANTONIO: The reason we keep coming back to this

1           arbitrary numbering system is what we saw them do already. Taking  
2           one page out of a 160-page document, we don't know if we're  
3           getting into the same thing here.

4           THE COURT: Well, I'm not going to guess. There is no  
5           other page number on here. There might be some other indication.  
6           But take a look and see what else went with this. If they are  
7           unrelated, let the plaintiff's side know. If they are related,  
8           meet and --

9           MR. BROGDON: If I may, the past reference, these 1837  
10          and 1943, we have talked about which are -- we've talked about as  
11          smaller documents out of larger ones, these are as kept. They are  
12          in multiple places in the production. So to the extent they said  
13          they were found and pulled out, it wasn't an intentional parsing  
14          out of pages from a larger document. They are larger documents  
15          that are together --

16           THE COURT: But they are related --

17           MR. BROGDON: I don't want to give the impression that we  
18          were parsing them out for this purpose.

19           THE COURT: Understood. All right. 1947 -- 1974, excuse  
20          me.

21           MR. PAULOS: We're going to -- plaintiff is going to  
22          withdraw its objection to document 1974.

23           THE COURT: 2129. This is -- So we have a series of --  
24          actually articles in, and we're going to use the same 803(18)  
25          process with these. These will be testified to by experts, I

1 assume?

2 MR. MACE: Yes, sir.

3 MR. PAULOS: That's certainly true for D.2129, Your  
4 Honor. On D.2136, this is the actual Emmett study that has Mr.  
5 Freeman's name and the author --

6 MR. MACE: You were going to give an opinion.

7 THE COURT: That's going to be on hold. You are going to  
8 get a decision from me in writing on that one.

9 And then we get to 2338.

10 MR. PAULOS: Yes is the Science Panel study, Your Honor.

11 THE COURT: We had talked about this the last time.

12 MR. PAULOS: That's correct.

13 THE COURT: Refresh my memory. The ruling was that you  
14 can refer to three eminent epidemiologists --

15 MR. MACE: Yes, sir.

16 THE COURT: But not name them by names.

17 MR. PAULOS: The names of -- and this particular document  
18 my recollection of Bartlett is the names or reference to the  
19 specific authors were redacted from this document.

20 MR. MACE: Actually, what you had done, Your Honor, you  
21 had asked us to redact the lower right-hand under the line  
22 there --

23 THE COURT: This research was funded by, that sort of  
24 thing?

25 MR. MACE: The trial copy of this has that redacted. But

1 did not have us redact the names. You just had us refer to them

2 --

3 THE COURT: Right, I -- The jurors wouldn't know the  
4 names.

5 MR. MACE: Right.

6 THE COURT: But we don't want them -- I don't want them  
7 to know essentially the Science Panel.

8 MR. PAULOS: That's correct. Our position is the  
9 *Bartlett* ruling should apply.

10 THE COURT: That's what I did in *Bartlett*, so we will do  
11 the same thing.

12 MR. MACE: Yes, sir.

13 THE COURT: All right. You know we're going to take a  
14 break at this point for about 15 minutes now. We still have  
15 probably 80 exhibits. I assume you would like to wrap it up  
16 today.

17 MR. MACE: Yes, sir.

18 THE COURT: So it will probably take me about 15 minutes,  
19 and then we'll come back to this.

20 MR. MACE: Yes, sir.

21 (Recess from 3:05 p.m. to 3:20 p.m.)

22 THE COURT: I think that we made it through 2338. So now  
23 we are at 2423.

24 MR. PAULOS: Your Honor, Chris Paulos for the plaintiffs.  
25 This is an e-mail, an internal e-mail, between Anthony Playtis and

1           a DuPont employee communicating from overseas regarding blood  
2        levels found in employees at the plant. We believe that this  
3        document has some 403 issues with it that would require its  
4        exclusion from evidence, particularly along the same lines as this  
5        Court's prior ruling with personal use.

6           THE COURT: What's the position -- This is Dr. Playtis?

7           MR. MACE: Yes, Your Honor.

8           THE COURT: What's his position?

9           MR. MACE: He's the Occupational Health Coordinator for  
10      the Washington Works Plant.

11           THE COURT: On site?

12           MR. MACE: Yes, at the plant. And he's corresponding  
13      with his colleague at a similar -- a plant overseas that also  
14      deals with C-8.

15           THE COURT: Your concern with 403 -- and he's -- He's  
16      also basically giving an opinion.

17           MR. PAULOS: That's correct. There is improper opinions  
18      being rendered in regard to blood levels and safety associated  
19      with high blood levels of C-8. And it implies to the jury these  
20      sort of levels are safe and would not result in injury. And we  
21      think that is misleading. We also think it's contrary to the  
22      Science Panel's findings --

23           THE COURT: We have a lot of that in here. That would  
24      beget an instruction. All right.

25           MR. MACE: This goes to the state of knowledge of DuPont.

1           Mr. Playtis was one of the principal people involved in  
2 investigating the C-8 issues and --

3           THE COURT: So it goes to what he believes.

4           MR. MACE: Exactly.

5           THE COURT: That's a bit different than DuPont's  
6 knowledge, isn't it?

7           MR. MACE: But he's one of the primary people, key  
8 people, at DuPont charged with looking into these issues.

9           THE COURT: A decision maker --

10          MR. MACE: Yes.

11          THE COURT: -- in what regard?

12          MR. MACE: He's deciding what follow up needs to be done  
13 in terms of further conduct.

14          THE COURT: Well, I have a problem with the second  
15 paragraph. I think we can fix it. The second sentence and the  
16 first sentence say the same thing. The first sentence is probably  
17 more prejudicial in an unfair way. He says, certain levels have  
18 no observed health effects, but he's pretty much giving his own  
19 personal opinion with the first part, that none of these are cause  
20 for alarm. I think that comes out.

21          MR. MACE: Excuse me, in the very first sentence --

22          THE COURT: The second. We're going to leave in: My  
23 apologies for the late reply.

24          You are supposed to laugh at the jokes.

25          MR. MACE: You're talking about taking out the sentence

1           that starts: Blood levels?

2           THE COURT: None of those blood levels are a cause for  
3           alarm. So the --

4           MR. MACE: But that sentence.

5           THE COURT: Yes.

6           MR. MACE: Okay.

7           THE COURT: I think that takes care of that exhibit.

8           All right. Let's go to 2435.

9           MR. PAULOS: Your Honor, this -- this document appears to  
10          be a power point presentation; and according to the handwritten  
11          marginality at the top right on the first page, it's dated the  
12          18th of March. And I am not sure -- I think it says 1999? I  
13          can't quite tell, and it says, presented by 3M.

14           There's no indication that DuPont had any involvement in  
15          creating this document and presenting this information. We're not  
16          quite sure who it was presented to. And this document involves  
17          many other chemicals other than C-8, including PFOS, and is highly  
18          confusing to the lay person and for our jury.

19           THE COURT: What is this exactly?

20           MR. MACE: This is a business record from DuPont's files.  
21          There were regular meetings between 3M --

22           THE COURT: The RCB, is that where -- Is that how you  
23          know that?

24           MR. MACE: Yes, sir.

25           THE COURT: Who would that be?

1                   MR. MACE: Do you know? Mr. Brogdon had to leave. Our  
2 catalog --

3                   THE COURT: Your expert.

4                   MR. MACE: Our expert.

5                   THE COURT: That's a DuPont employee --

6                   MR. MACE: Yes, sir.

7                   THE COURT: -- whose file was turned over to you when in  
8 discovery.

9                   MR. MACE: So there were regular meetings between 3M and  
10 DuPont about this chemical over the years, and 3M would make these  
11 types of presentations to DuPont.

12                  THE COURT: You think it's 1989?

13                  MR. MACE: Yes, sir.

14                  THE COURT: It looks like.

15                  MR. MACE: Yes.

16                  THE COURT: All right. In general, I'm going to let it  
17 in.

18                  Is anything else -- On the issue of knowledge of DuPont  
19 only, is there anything else you wish me to look at here?

20                  MR. PAULOS: Your Honor, I'm not quite sure that  
21 Mr. Mace's representation as to the date is correct. There's  
22 information in here where they're talking about the early '90s.

23                  THE COURT: Yes, that's true. There is a --

24                  MR. MACE: We can look for a better copy of that, Your  
25 Honor. I think in the multiple copying process, it may be '99

1 instead of '89.

2 THE COURT: Well, we'll probably need to clear that up.

3 MR. MACE: Yes, sir.

4 MR. PAULOS: Along the -- In congruence with the Court's  
5 rulings regarding power point presentations, we have seen today,  
6 there are very confusing analytical discussions and --

7 THE COURT: There are things in here that the jury can  
8 use, and there are things -- Really, if you look at 2435.7, is  
9 this at all going to help the jury with anything that it would be  
10 considering? It's a long chemical compound formula.

11 MR. MACE: No, sir. We don't need that page.

12 THE COURT: All right. It will make the document  
13 somewhat incomplete. You don't care if we take that page out.

14 The same way, how about when we get to 2435.29, the  
15 charts?

16 MR. MACE: We don't need that page either or the next.

17 THE COURT: And what is your view of 2435.11? It has C-8  
18 mentioned but has these other chemicals of carbon. There won't be  
19 any testimony about that?

20 MR. MACE: We don't need it if Your Honor has a concern  
21 about it.

22 THE COURT: Let's take that out.

23 MR. PAULOS: Just to be clear, that's 2435.11?

24 THE COURT: Right.

25 All right. That leads us to 2438.

1                   MR. PAULOS: This is an internal e-mail from DuPont that  
2 it's summarizing, again, discussions with a third party at the  
3 plant -- an employee of GE who works at the plant. I believe it's  
4 a neighbor to DuPont. There's statements in here that we believe  
5 are prejudicial and are also hearsay and believe they require  
6 redaction.

7                   THE COURT: What would you propose to be redacted?

8                   MR. PAULOS: The first section I would like to call your  
9 attention to the very last paragraph where it says, he indicated  
10 he has had past experience with similar issues involving a  
11 material that caused staining of red blood cells but no other  
12 known effects over a long history of study. He thus understands  
13 the concern over blood detections even without known effects.

14                  We believe that that's hearsay that's incurable.

15                  THE COURT: This would be -- This would be presumably  
16 Mr. Dale Van De Velde?

17                  MR. PAULOS: That's what this document --

18                  THE COURT: So hearsay within hearsay.

19                  MR. MACE: But it's not being offered for the truth of  
20 the matter asserted. This is a contemporaneous document in  
21 DuPont's business record of what it was being told by its  
22 industrial neighbor that it was talking about these issues on. So  
23 it's something that's entitled to be considered whether it's true  
24 or not.

25                  THE COURT: Well, if you were -- If you were giving

1 information of a scientific nature here, he just says, past  
2 experience with a similar issue involving a material. Not C-8.  
3 So it's hearsay. If it was just issues of knowledge, I might  
4 consider it; but I don't think it really adds anything. So I'm  
5 going to take that paragraph out.

6 Then we get to 2452.

7 MR. LEBER: That's another one of --

8 THE COURT: It goes with the matter that you're going to  
9 brief --

10 MR. LEBER: -- the 1006 documents.

11 THE COURT: Thank you.

12 And how about 2453? Is that another one?

13 MR. LEBER: Same, Your Honor.

14 THE COURT: And then we have a letter from -- actually --

15 MR. PAULOS: I believe we are on D.2538. This is a --  
16 This document is not a business record of DuPont. This document  
17 actually is a fax from Mr. Bilott to a consultant in the *Leach*  
18 matter, David Gray. It was produced as part of Mr. Gray's expert  
19 files in the *Leach* matter. And it contains an e-mail from Dee Ann  
20 Staats to various individuals at the EPA. There is no DuPont  
21 recipient. It's not addressed to DuPont. There's no DuPont Bates  
22 stamp.

23 THE COURT: What's the purpose of this document?

24 MR. MACE: It could potentially be used on  
25 cross-examination of plaintiff's experts if they mischaracterize

1           certain things.

2           THE COURT: It won't be in at this point. If you are  
3           going to use it, you're going to let me know, and we'll address it  
4           at that point.

5           MR. MACE: Yes, sir.

6           MR. PAULOS: Thank you, Your Honor.

7           THE COURT: If we do use this, we're going to do what we  
8           can to leave Mr. Bilotto's name out of this.

9           MR. MACE: Understood, sir.

10          THE COURT: So keep that in mind with that document.

11          MR. PAULOS: There is significant --

12          THE COURT: The whole letter.

13          Then we get to Defendant's 2554.

14          MR. PAULOS: Your Honor, this is a document from 3M to  
15          the U.S. EPA. There's no evidence that this was ever received by  
16          DuPont, that DuPont had any hand in creating this document or  
17          involvement in this document. It's about 3M's plants in  
18          Minnesota. And it's also one of 3M's required submissions as part  
19          of the stewardship program. I believe it's completely irrelevant.

20          THE COURT: So what's the issue here?

21          MR. MACE: Your Honor, it's a public document. This is  
22          AR226. That's the public docket for this chemical that EPA  
23          maintains. The only use of this would potentially be in -- as we  
24          currently foresee is cross-examination of plaintiff 's experts.

25          THE COURT: We will not admit it at this point but

1           possibly usable for cross-examination.

2           MR. O'BRIEN: Again, approach at side-bar before it is  
3           published.

4           THE COURT: Yes.

5           And then we get to D.2555.

6           MR. PAULOS: This would be the exact same issues as the  
7           prior document.

8           THE COURT: You would use it the same way.

9           MR. MACE: Same way.

10          THE COURT: Same ruling as the issue before this.

11          2587.

12          MR. PAULOS: We understand the Court's prior rulings  
13          regarding Mr. Bilott, and we would just request that the document  
14          be redacted as the Court has instructed.

15          THE COURT: We'll take -- I think his name only appears  
16          in one place. So we'll --

17          MR. MACE: It's two, Your Honor. It's, Dear Mr. Bilott.

18          MR. PAULOS: It's on each page, on the top of each page.

19          THE COURT: We will take those off.

20          MR. MACE: Yes, sir.

21          THE COURT: Otherwise, it will be admitted.

22          And 2604.

23          MR. O'BRIEN: This one is not a DuPont document. There  
24          is no evidence it was received by DuPont. It is hearsay. It's a  
25          rank expert opinion. There is no evidence that the defendant

1           received this. And no notice can countervail the hearsay issue.  
2           And this is simply an expert opinion. We can't confront. We  
3           can't cross-examine.

4           THE COURT: What is this going to be used for?

5           MR. MACE: Yes, Your Honor. This is a contemporaneous  
6           document with the fact that as part of this monkey study, they had  
7           a peer review group come in and look at whether the low dose  
8           monkey would be tied to effects of C-8. And the independent  
9           review board considered it not to be. It's going to be used in  
10          rebuttal of plaintiff's experts.

11          THE COURT: This is peer reviewed pathology.

12          MR. MACE: Yes.

13          THE COURT: This is pathological work done by other  
14          members of -- another pathologists basically.

15          MR. MACE: Right.

16          THE COURT: How would you use this, what witness, and how  
17          would the witness --

18          MR. MACE: Well, at least two. Potentially, in  
19          cross-examination of plaintiff's experts if they misstate what the  
20          scientific facts were back at the relevant time. It's also part  
21          of the body of knowledge that was available to Dr. Rickard and  
22          DuPont as they were examining what to do with regard to this  
23          chemical and how to evaluate this monkey study.

24          THE COURT: Are you -- If we're talking about  
25          cross-examination, then it's an easy decision for me. If we're

1 talking about -- With Dr. Rickard, would you expect to use this in  
2 direct?

3 MR. MACE: Potentially, Your Honor.

4 MR. O'BRIEN: But, Your Honor, it doesn't cure the  
5 evidentiary foundation issue.

6 THE COURT: No, I just want to -- It could be used for  
7 cross depending on how the question is phrased. Let's see how  
8 this goes.

9 MR. O'BRIEN: But it doesn't cure the underlying issue,  
10 which is it's an out-of-court opinion.

11 THE COURT: I'm assuming that somebody knows this.

12 MR. O'BRIEN: Pardon me?

13 THE COURT: I would want to hear the questions first.  
14 That's the reason I'm doing this in the abstract. I don't know if  
15 the -- if the witness were talking about seeing this before, was  
16 familiar with it. If they're not, then we will have problems.

17 MR. MACE: The witness that we would be taking about,  
18 Your Honor, is somebody they're presenting as an expert on the  
19 state of the knowledge. And what they didn't know is just as  
20 relevant as what they did know, just like it is for the fact  
21 witnesses.

22 THE COURT: There's a monkey study that goes with it,  
23 right?

24 MR. MACE: True.

25 THE COURT: And a lot of the witnesses know about the

1 monkey study.

2 MR. PAPANTONIO: It does not go with it, judge. He just  
3 made it sound like this goes with the monkey study. This is --  
4 Judge, imagine that this is simply another entity. This is not  
5 something you can put in front of a witness and, say,  
6 cross-examine. It's not -- It's not even admissible.

7 THE COURT: Well, it's a peer review. Explain to me -- I  
8 don't understand. We have got the monkey study, and there was  
9 some medical material reviewed by a pathologist, and this is the  
10 peer reviewed. Was that person part of the study?

11 MR. MACE: No, sir. It's a separate -- It's related to  
12 the study in that when the scientific findings are made as a  
13 result of a study and an evaluation is made, do we want to have a  
14 peer review of, so in this one they had a peer review done of one  
15 of the findings.

16 THE COURT: When you say they, would this be the --

17 MR. MACE: The study authors.

18 THE COURT: So that's what I mean. The study was done,  
19 and this is part of the peer review process.

20 MR. MACE: Right.

21 MR. O'BRIEN: Not for -- Not for journal publication.

22 MR. PAPANTONIO: It is not -- That is just not accurate.  
23 They're trying to make it sound like this is a peer reviewed  
24 opinion for some type of treatise. This is -- I could take a half  
25 a dozen other opinions like this that have no connection at all to

1           the monkey --

2           THE COURT: I mean that's a fact question. If I am  
3           getting two different versions, I don't want to put either of you  
4           under oath -- no offense -- but if it's part of the study, then I  
5           see this as if the study is going to be discussed, then this will  
6           be discussed. If it is a stand alone, not part of the study, just  
7           someone who reviewed -- I don't know how that would happen. They  
8           would have to get access --

9           MR. PAPANTONIO: I don't know how a witness -- what  
10          witness --

11          MR. MACE: I will be able to link it up with Dr. Rickard  
12          in any event.

13          THE COURT: He knew about this --

14          MR. MACE: Exactly.

15          THE COURT: Right now it's not in evidence. You can  
16          attempt to lay a foundation. Then we will see what happens.

17          MR. MACE: All right.

18          MR. O'BRIEN: Obviously, Your Honor, if they've got a  
19          copy, that is a DuPont document. Otherwise, how do they prove  
20          with Dr. Rickard that they got it back in 2000? Because that's  
21          when the document was authored. So if there's a DuPont document  
22          that reflects DuPont actually received it, we are entitled -- we  
23          should have that.

24          THE COURT: Do you recall the background?

25          MR. MACE: It will be linked up with testimony, Your

1 Honor.

2 THE COURT: Well, if he received this on a certain date  
3 with a letter, you would have disclosed that in discovery, I would  
4 assume.

5 MR. MACE: Would have, yes.

6 MR. PAPANTONIO: Judge, before he uses it for  
7 cross-examination, we would like it linked up.

8 THE COURT: Actually, it's going to be on direct  
9 examination, right? If you lay a foundation first.

10 MR. MACE: Right.

11 THE COURT: We will leave it at that.

12 2605.

13 MR. PAULOS: Your Honor, this appears to be an  
14 advertisement for 3M for their Fluorad brand surfactant. The  
15 relevance to the case is --

16 THE COURT: What's this for?

17 MR. PAULOS: -- perplexing.

18 MR. MACE: Well, it's to show, Your Honor, how 3M was  
19 portraying its product in the public literature.

20 THE COURT: And that goes to?

21 MR. MACE: Plaintiffs are trying to make this sound like  
22 it's some -- They're trying to characterize this in front of the  
23 jury as if this were some skull and crossbones chemical that  
24 required all these warnings and labels. That's not how it was  
25 being presented by 3M.

1                   THE COURT: Well, but 3M is not a party, and it sounds  
2 like it would be offered as an assertion this is safe. So at this  
3 point I am not convinced. If something comes up in the trial and  
4 you want me to revisit this, I will do so. But at this point, I'm  
5 going to exclude it.

6                   Then we get to the newspaper article again.

7                   MR. PAULOS: Yes, Your Honor. You heard our argument on  
8 this. We believe it is hearsay and should be excluded.

9                   MR. MACE: Judge, this is where you took it out of the  
10 earlier one. I said we would come back to it later.

11                  THE COURT: It will come in once, not twice, of course.

12                  MR. MACE: And that's why I made the point, Your Honor,  
13 this goes to rebutting the plaintiff's characterization to the  
14 jury that nobody knew about this chemical. It was some big, kept  
15 secret by 3M and DuPont when both --

16                  THE COURT: It's part of what you sent to the EPA.

17                  MR. MACE: True.

18                  THE COURT: So it's not going to be admissible here, but  
19 it will be admissible as part of the exhibits that went with the  
20 letter.

21                  MR. MACE: I think that is a flip from what you said  
22 before. Before you said it would come in now but not there. Now  
23 it's going to go in there --

24                  THE COURT: Are you accusing me of flip-flopping?

25                  MR. MACE: I said the flip. I didn't do the flop.

1                   THE COURT: I don't think this comes in as a stand alone.  
2 My view now is that whatever you sent to the EPA in response to  
3 their initial indication that they might be filing a complaint  
4 would be what the jury gets.

5                   MR. MACE: Yes, sir. That's also the next one, too, Your  
6 Honor.

7                   THE COURT: You have offered it three times, but we'll  
8 let it in once. Actually, one is from *The Wall Street Journal*,  
9 and one is from *The New York Times*.

10                  MR. MACE: Yes, sir.

11                  THE COURT: If they were both attached, they will be  
12 admitted.

13                  MR. MACE: They were.

14                  MR. PAULOS: Just so I'm clear, Your Honor, these stand  
15 alone exhibits are excluded.

16                  THE COURT: No, they will be part of the attachments that  
17 were sent to the EPA.

18                  Then 2656. And this looks like it comes from the Federal  
19 Register.

20                  MR. PAULOS: Yeah, this is -- yes, Your Honor. This is a  
21 synopsis from the Federal Register regarding TSCA.

22                  MR. MACE: This falls in the same category of several we  
23 talked about earlier, Your Honor. It just depends to what extent  
24 they get into the TSCA issues that I may need to use this in  
25 cross-examination of their experts.

1                   THE COURT: Well, we will just reserve for now. It may  
2 or may not be used. That's how we will leave it.

3                   MR. PAULOS: Again, we would just ask that there be a  
4 side-bar called prior to the use of these --

5                   THE COURT: With all of these, that's the rule.

6                   MR. PAULOS: Thank you, Your Honor.

7                   THE COURT: And then we get to 2667. And just to be  
8 blunt, this is a report to Senate Environmental Committee. It is  
9 not a report of. So where does that take us?

10                  MR. MACE: Well, the potential use of this, Your Honor,  
11 would be if plaintiff's experts mischaracterize some of the facts,  
12 that we mean to use it with some of the experts.

13                  MR. O'BRIEN: Your Honor, this is being used as a  
14 backdoor shoehorn.

15                  MR. PAPANTONIO: Exactly.

16                  MR. O'BRIEN: That doesn't make it admissible.

17                  MR. PAPANTONIO: We have 17 of these.

18                  THE COURT: As much as we would like to be able to  
19 predict what's going to happen in a trial, we can't. So none of  
20 these are coming in yet. But, again, I think you all understand  
21 if things change in the trial with all of these exhibits, you can  
22 ask me to revisit based on what evidence is going to be presented.  
23 That's all we are doing at this point.

24                  MR. PAULOS: That is about 3M's plant site in Minnesota,  
25 and the relevancy of it --

1                   THE COURT: It may very well not come in. We will have  
2 to play it by ear.

3                   MR. MACE: I need to grab my other folder, judge.

4                   THE COURT: All right. I'm disappointed. That means  
5 we're getting towards the end.

6                   MR. MACE: I'm on my last one, yes, Your Honor.

7                   MR. PAULOS: Your Honor, the next document is 2669.

8                   THE COURT: You're taking advantage of Mr. Mace. He's  
9 trying dig out his files.

10                  MR. PAULOS: They're his exhibits.

11                  THE COURT: So this comes from where? Minnesota  
12 Department of Health, right?

13                  MR. MACE: Yes, Your Honor.

14                  MR. PAULOS: That's correct, Your Honor. Again, it's  
15 specific to 3M's Cottage Grove facility. So the relevance to this  
16 is zero. And it's basically the Minnesota Department of Health  
17 talking about 3M's plant facility and the PFOS that had been  
18 released on site.

19                  MR. MACE: It's a self-authenticating document, Your  
20 Honor, by the Minnesota Department of Health. The potential use,  
21 again, would be in cross-examination of the plaintiff's expert.

22                  MR. O'BRIEN: It's a case against DuPont, though.

23                  THE COURT: We will have to get into all that. If it's  
24 not being offered, I'm going to defer until there is an attempt to  
25 use it.

1                   And that will be the same thing with 2670.

2                   MR. O'BRIEN: It sounds like a lot of side-bars.

3                   MR. PAPANTONIO: Judge, excuse me, how do we do side-bars  
4                   in your courtroom? The same as in --

5                   THE COURT: Just a quick thought I had, how many will be  
6                   at each counsel table?

7                   MR. MACE: I think we have four or five.

8                   THE COURT: And you will have --

9                   MR. PAPANTONIO: The same.

10                  THE COURT: We may want to platoon people. I am not sure  
11                  you can do eight attorneys at side-bar. It's sort of tight.

12                  MR. MACE: We tried to keep it to two.

13                  THE COURT: We can fit four attorneys there.

14                  MR. PAPANTONIO: It never -- It rarely will be more than  
15                  four, judge.

16                  THE COURT: I mean if it's more than four, it gets  
17                  crowded. It doesn't mean you can't do it.

18                  MR. PAPANTONIO: You typically go off to -- As I'm  
19                  looking at your bench --

20                  THE COURT: The side. I come in over to the right. And  
21                  there's a little step there that is Ms. Samuels' perch. We don't  
22                  want to invade that, so we'll let her go first and get ready to  
23                  go.

24                  MR. O'BRIEN: Do you have Miles Davis in side-bars?

25                  THE COURT: Judge Marbley and I agree on a lot of things,

1           but the jazz, that's not one of them. So we use white noise.

2           It's a little bit more staid, I would call it.

3           MR. O'BRIEN: And when you have -- That's right by the  
4 witness box, correct?

5           THE COURT: Yes. If -- you know, Mr. Quisumbing is very  
6 good about moving the witness away. The witness will not be  
7 hearing the side-bar.

8           MR. O'BRIEN: Okay.

9           THE COURT: All right. So we're up to 2671.

10          MR. PAULOS: Again, Your Honor, this is a pollution  
11 report to the Minnesota legislature from April, 2014. We  
12 believe --

13          MR. MACE: Same category.

14          THE COURT: Same category. We will hold on this.

15          More on 3M on the next one, 2673.

16          MR. PAULOS: Correct, Your Honor. This appears to be  
17 some sort of pamphlet or brochure from 3M regarding its chemical  
18 businesses. I'm not sure if it bears a date.

19          THE COURT: Is this also in that category or not?

20          MR. MACE: Partially for that category. If we would use  
21 it in our case, we would link it up with a witness.

22          MR. PAPANTONIO: Judge, I hear that, but I'm sitting here  
23 thinking what event would possibly give rise to bringing in a 3M  
24 pamphlet on either cross-examination or --

25          THE COURT: Well, I mean to make this process helpful, if

1       we can focus this a little bit. Who is the witness? What's the  
2       purported relevance to the case? Otherwise, I'm not going to be  
3       able to give you a decision.

4            MR. MACE: Right. So let's -- Let's just hold on this  
5       for now in the same category that we just had.

6            THE COURT: All right. Then we get to 2683.

7            MR. PAULOS: Yes, Your Honor. This is a 3M business  
8       document that has no, from my understanding, no DuPont employee  
9       received any of this.

10          THE COURT: Let me just -- Is this another similar issue  
11       or is it something else?

12          MR. MACE: Actually, it's a meeting among 3M with DuPont  
13       employees, and it comes from DuPont's business files, the RJZ  
14       Bates numbers.

15          MR. PAULOS: It's a mystery as to how DuPont came into  
16       possession of this, and it does have a DuPont Bates number, but  
17       there is no DuPont recipient and no DuPont author. And it's  
18       summarizing hearsay statements of a meeting that occurred between  
19       3M and DuPont.

20          THE COURT: Pure business record offering. No witness to  
21       go with it?

22          MR. MACE: No -- I mean yes, it's a business record. But  
23       we also -- I mean Mr. Zipfel is on our witness list, is one of  
24       ones at the meeting.

25          MR. PAPANTONIO: So you're going to call -- Judge, if

1           they're going to call Zipfel, and that certainly -- if he's a  
2           direct witness for something like that, if he was at the meeting.  
3           But I don't think he still should be able to talk about hearsay  
4           that took place at the meeting and opinions and -- such as that.

5           THE COURT: So this is a '96 document of a meeting at the  
6           plant. There's a discussion of C-8. There's a lot of -- I've got  
7           the impression of that sorts of things in here. But your position  
8           is you may have a witness directly to testify --

9           MR. MACE: If we use it, it would be with a witness.

10          THE COURT: We need to address: I got the impression  
11           that these were internally synthesized or available compounds.

12          That's speculation. We will take that out.

13          MR. MACE: Where is that? I got the impression.

14          THE COURT: Bottom third of the page.

15          MR. PAULOS: I'm sorry, where was that at?

16          THE COURT: Bottom third of 2683. The paragraph starts  
17           with: DuPont has been testing candidates as C-8 replacements.

18          The next line comes out.

19          MR. MACE: That whole line.

20          THE COURT: Well: If they -- that will stay in.

21          All right. I think that takes us to 2709. And this  
22           is --

23          MR. MACE: This gets to the public notice, Your Honor, of  
24           the fact that the -- You will recall that some of the early rat  
25           studies that the plaintiff's experts talked about heavily, there

1           was an issue of whether the EPA knew about them. These documents  
2           are off the public docket, and they show that EPA was informed  
3           timely about the rat studies.

4           THE COURT: We get into a lot of studies. Is this one of  
5           the studies you expect there to be testimony about?

6           MR. MACE: Absolutely. This is a -- This relates to the  
7           study regarding the false positive on the islands --

8           THE COURT: The jury is going to hear about the study.

9           MR. MACE: Yes.

10          THE COURT: Do we really need -- The cover letter takes  
11           us into a stretch? It's a 3M letter. You're going to have  
12           testimony that this was in the -- within the knowledge of the  
13           scientific community, in a peer published review.

14          MR. MACE: The important --

15          THE COURT: You have another witness testifying about it.

16          MR. MACE: The important key thing is the cover letter  
17           because it was sent registered mail, and we have the receipt  
18           stamped by EPA, that they got it back in 1981. And that rebuts  
19           the argument that EPA didn't know about these studies. And the  
20           law is clear, which I think their own experts will admit, that if  
21           one company reports it, the other one doesn't have to.

22          THE COURT: The document is in its own category. You are  
23           going to use that with an expert. The letter will come in for  
24           that limited purpose.

25          MR. MACE: Yes, sir.

1                   THE COURT: If there's an issue that we get into about  
2 why didn't the EPA investigate this earlier, this is at least some  
3 evidence that goes to that issue. You can make of it what you  
4 want it to be, but --

5                   MR. PAULOS: We would also request that the attached  
6 study not go back to the jury.

7                   THE COURT: Well, if it's going to some type of a notice,  
8 it's a bit different. It wouldn't just be used by an expert.

9                   MR. BILOTT: The concern, Your Honor, would be that the  
10 only study would the study from 3M saying, no health effects.

11                  THE COURT: Right.

12                  MR. O'BRIEN: We could make the same arguments on any  
13 other LT.

14                  THE COURT: Well, maybe we should give this sort of  
15 designation the jury can follow. The letter for a limited purpose  
16 will be coming in. I want the jury to be able to identify what  
17 was sent with it. We could do that without sending the document  
18 back. So think of some way we can call this by a name they could  
19 recognize. This is --

20                  MR. MACE: And it may be as simple, Your Honor, as --

21                  THE COURT: Is this the only rat study?

22                  MR. MACE: According to the title, no, unfortunately,  
23 Your Honor.

24                  THE COURT: How many rat studies are there?

25                  MR. MACE: Well, there's several. There are at least two

1           that are important for the case.

2           THE COURT: This is a -- What year is this?

3           MR. MACE: '81.

4           THE COURT: Why don't we call this the 1981 rat study,  
5 C-8/rat study.

6           MR. BILOTT: The cover letter actually says, please find  
7 enclosed a reprint of the article, and it gives the title.

8           THE COURT: Right. And the title is not going to be very  
9 helpful. It's a long -- You can pronounce it better than I can.  
10          But I just want them to be able to link this up to what we're  
11          talking about. So I will suggest 1981 Rat Study. If you can come  
12          up with a better description.

13          MR. PAPANTONIO: Judge, just to be clear, what kind of  
14          situation would he be able to use this 3M document?

15          THE COURT: This document?

16          MR. PAPANTONIO: Yes.

17          THE COURT: If the contention is the EPA didn't have the  
18          information in a timely way to do an investigation of C-8, this at  
19          least is one indication of what they had in their possession.

20          I think that's the extent of it, isn't it?

21          MR. MACE: Yes, sir.

22          THE COURT: 2711.

23          MR. MACE: Same issue, Your Honor.

24          MR. PAULOS: Your Honor -- and we have the same  
25          objections except for this document is in such poor condition,

1           it's almost unreadable, and that's, I think, a concern. If Your  
2 Honor flips through it, you will see there's certain pages where  
3 you can't even see what is supposed to be depicted in some of  
4 these charts, and some you can't read the names of the chemicals  
5 that are being studied and to bring to the study. So it's the  
6 condition of the document itself that is a concern of ours.

7           THE COURT: Do you expect testimony on this document?

8           MR. MACE: Again, this gets into the fact that the  
9 government was sent these studies. They are trying to say that  
10 3M --

11           THE COURT: What I mean you're going to -- What you're  
12 proposing is this one go back to the jury, and we would be able to  
13 argue there is more information that the EPA had?

14           MR. MACE: Limited to that purpose and notice to EPA.

15           THE COURT: The problem with that is so much of this is  
16 -- will not be helpful. You know, they won't be able to have any  
17 idea what this chart means. I'm always reluctant to send things  
18 like that back.

19           MR. MACE: We can, I suppose, talk about --

20           THE COURT: Maybe the --

21           MR. MACE: -- what goes back. Maybe read the cover page  
22 of the articles that are attached.

23           THE COURT: The first 15 page are the narratives. They  
24 are in pretty bad shape, but I think these are readable. But,  
25 again, this would also entitle you, the defendants, to a limiting

1 instruction, that this is historical knowledge only. And in this  
2 case it is being offered to show what information was sent to the  
3 EPA. That's the only purpose for it.

4 MR. MACE: Yes, sir.

5 MR. PAULOS: And, again, this is a 3M document. There's  
6 no evidence that DuPont received this.

7 THE COURT: It doesn't go to any issue -- It involves  
8 really the EPA only.

9 MR. PAPANTONIO: And, judge, again, just so it's clear,  
10 we don't intend to try the EPA. I'm just trying to think of the  
11 scenario. The EPA is not on trial. We are not saying that the  
12 EPA failed to process information. We're not --

13 THE COURT: Here's what I'm getting, and I'm just trying  
14 to see what's probative and what isn't. I am not drawing any  
15 conclusions. The issue in the consent decree about whether this  
16 delayed, the failure to report, delayed the EPA's efforts to at  
17 least investigate C-8. I assume that's what you are talking  
18 about.

19 MR. MACE: Yes.

20 MR. PAPANTONIO: So opening statement I would say, for  
21 example, that you'll see that some of the material was sent to the  
22 EPA; and after it was sent, they concluded that they still didn't  
23 have enough information.

24 THE COURT: It's -- That's the debate. It would be in  
25 that area. But it's a narrow issue. It's not being offered for

1           the truth, of course.

2           So now we're up to 2729.

3           MR. MACE: I think it's 2717, Your Honor.

4           THE COURT: You're right, 2717.

5           MR. PAULOS: Yes, Your Honor. This is a -- appears to be  
6           an e-mail that was prepared to go to the U.S. EPA from DuPont.  
7           However, if you will notice the handwritten statement by, it looks  
8           like, A. Michael Kaplan: DuPont letter was not sent on 15th day  
9           because we were in possession of 3M letter which informed the  
10          agency of the new findings.

11           I believe this letter was in fact never sent to the EPA.

12           MR. MACE: That's inaccurate, Your Honor. That note  
13          refers to the fact that under TSCA, if you are going to send in  
14          data, you have got to send it in within the 15th working day after  
15          you have the data.

16           THE COURT: Your argument goes to the timing.

17           MR. MACE: Timing.

18           THE COURT: Not whether or not the letter was being sent.

19           MR. MACE: Right. Since they knew 3M had already sent  
20          the earlier letter --

21           THE COURT: There could be another way to read that. So  
22          if I -- DuPont letter was not sent, and I could stop there.

23           MR. O'BRIEN: That takes an interpretation --

24           THE COURT: -- on the 15th working day.

25           MR. O'BRIEN: This takes as interpretation of Mr. Kaplan,

1           whoever Kaplan is, and also this is stricken out.

2           MR. PAPANTONIO: A line was written right through it. We  
3           didn't do that.

4           MR. O'BRIEN: At the very least DuPont should be required  
5           to prove that this letter was sent.

6           THE COURT: Well, let me ask you this. This two-year  
7           study in rats, is that what we just got into?

8           MR. MACE: No. This was a follow -- yes. The two-year  
9           biopsy, yes.

10          MR. PAULOS: There was one in 1981 --

11          MR. MACE: There were two different rat studies. So we  
12          talked about two different ones. So I'm not --

13          THE COURT: Have we covered this rat study yet?

14          MR. MACE: In '93, I don't think -- I don't think we've  
15          talked about that one yet because we were talking about the '81  
16          study.

17          THE COURT: I don't -- I think a fair reading of this is  
18          the one 3M sent in.

19          MR. MACE: There were two notices. So 3M had sent a  
20          notice and --

21          THE COURT: But we're not using the 3M notice, are we?

22          MR. MACE: We may come to that.

23          THE COURT: So that would be -- That's probably easier  
24          than trying to guess what this means, if it's the same study.

25          MR. MACE: Right.

1                   MR. PAPANTONIO: Judge, this will definitely require a  
2 witness to say --

3                   THE COURT: Are we -- Is the 3M study coming in?

4                   MR. MACE: I think we may get to that. I will be linking  
5 these up with a witness because our state of the knowledge expert,  
6 Dr. Rickard, is very knowledgeable about what was given to EPA.

7                   THE COURT: And I'm focusing on a very narrow issue. If  
8 we know 3M sent this, then I will be inclined, for the reason we  
9 have already talked about, goes to the knowledge of EPA, to let it  
10 in on that basis rather than really stretching here trying to  
11 interpret what this handwritten note meant. Because if it  
12 contained documents, then it kind of disappears and isn't an  
13 issue.

14                  MR. MACE: I mean part of what you will see, the business  
15 practice is things aren't signed until they are sent. So the fact  
16 that Dr. Reinhardt signs this, we'll be able to prove up this was  
17 sent.

18                  MR. PAPANTONIO: Judge, I know -- I keep hearing, we are  
19 going to prove it up. I don't know how in the world somebody is  
20 going to prove it up unless they bring in this man that says, you  
21 know, I put a line through here and, yes, I said, let's not send  
22 it, but we did. This is so extreme, we are going to prove it up,  
23 but we continue to hear that.

24                  And I'm afraid what's going to happen at trial, judge, is  
25 this is all going to merge into a different argument by Mr. Mace.

1           You remember at the hearing we allowed this testimony in -- We saw  
2           this happen in the first trial. It's the same --

3           MR. MACE: We will probably be able to bring you another  
4           copy of this off the EPA docket because these are all public  
5           documents.

6           THE COURT: Let's do it from that end.

7           MR. MACE: Okay.

8           THE COURT: Although I will say, I do read this to say  
9           this wasn't sent on the 15th working day. It is a matter of where  
10          you end the clause for the analysis. But, hopefully, that won't  
11          make any difference. It's better not to guess.

12          MR. BILOTT: Your Honor, just for clarification, what the  
13          U.S. EPA and the TSCA consent order was dealing with DuPont's  
14          failure to send in information about C-8 crossing the human  
15          placental and the fact that C-8 was contaminating thousands of  
16          people's water supply, the documents that we're seeing here, that  
17          DuPont wants to submit as alleged evidence that they sent to EPA,  
18          the information they were asking, don't relate to any of that.

19          THE COURT: What are you saying it relates to?

20          MR. BILOTT: It relates to -- It relates to other  
21          information 3M sent that the U.S. EPA never --

22          THE COURT: What do the rat studies cover?

23          MR. BILOTT: The rat -- I don't know which rat study.

24          MR. PAULOS: The tumor.

25          MR. BILOTT: This is information that was apparently sent

1 by 3M --

2 THE COURT: What was the study about? Water containing  
3 C-8 or some other contact?

4 MR. BILOTT: No.

5 THE COURT: What was it about?

6 MR. BILOTT: This was about rats being exposed to C-8.

7 THE COURT: Exposed in what way?

8 MR. BILOTT: I guess in a laboratory setting.

9 THE COURT: No, I mean by water, air, skin contact?

10 MR. BILOTT: I believe it is a feeding study.

11 MR. MACE: Your Honor, this is one of the studies that  
12 plaintiffs rely on heavily to say, you knew it caused cancer, and  
13 you didn't tell anybody. Well, they are telling EPA about the  
14 studies contemporaneously --

15 THE COURT: If you get this on the EPA's part, it would  
16 make it a lot easier.

17 MR. MACE: Yes, sir.

18 THE COURT: Then we will get away from who sent it and  
19 was it sent?

20 MR. PAPANTONIO: Judge, just to be clear, though, is  
21 being -- what Mr. Bilott is saying the way we say is that -- the  
22 way we tie up this issue about the EPA saying, you know, you never  
23 gave us this specific information, they thought it was so  
24 important that the EPA was given information that the water that  
25 people were drinking was contaminated, that's one of those points.

1           The other one was that it was passing through the placenta. That  
2       was the second part of it. The other one, that it was being  
3       stored in blood, they make very specific -- they make very  
4       specific points about why it is these things caused us to not be  
5       able to advance in science.

6           I don't talk about rats. Rats, this is such a -- This is  
7       such a sideshow with these rats. That's not what the EPA is  
8       saying. I'm not -- I don't intend to open this door in any form  
9       or fashion.

10          THE COURT: Then, again, as this is framed, that will be  
11       the context of the ruling on the objection, if there is one.

12          All right. Let's get to 2729.

13          MR. PAULOS: Your Honor, just so I'm clear, DuPont is  
14       going to need to prove --

15          THE COURT: This is not coming in yet. We are going to  
16       see if this can be retrieved from an EPA document docket instead.

17          MR. MACE: Yes, sir.

18          THE COURT: So 2729.

19          MR. PAULOS: This, Your Honor will recognize, this is a  
20       summary of the same meeting that we discussed earlier today where  
21       we did some significant redactions --

22          THE COURT: Is this the same document?

23          MR. PAULOS: It's the same summary. But yet it is  
24       attached -- got attachments and things --

25          THE COURT: Aren't we looking at it twice?

1                   MR. PAPANTONIO: Three times actually.

2                   MR. MACE: There are actually -- Sorry, I didn't mean to  
3 interrupt you, counsel -- I think there are three different  
4 versions of it that are related. So I think the second page  
5 contains -- I think the cover page is different. The second page  
6 may contain some of the same language. So we are willing to work  
7 with counsel and make sure the same redactions get in.

8                   THE COURT: Why would we want three of these?

9                   MR. MACE: Well, there are some differences between who  
10 they are being sent to and some other --

11                  THE COURT: You are not trying to pad your exhibit list,  
12 are you?

13                  MR. MACE: No, sir. There are plenty --

14                  THE COURT: I think we have enough.

15                  I mean is there -- are there some differences among the  
16 three?

17                  MR. MACE: I will have to look back at this one in  
18 particular. But I think they are different in terms of who it was  
19 being sent to.

20                  THE COURT: This is a subtle difference, I get it, but I  
21 think it says pretty much the same. You might want to think about  
22 scaling it back. It does look like I read this document a couple  
23 times.

24                  MR. MACE: So if I understand, we're saying not if it's a  
25 duplicate. And if it's coming in, we have to coordinate the

1 redaction --

2 THE COURT: Even if it's very similar. But if there's a  
3 substantive difference, then that's a different matter.

4 How about anything else in here?

5 MR. MACE: I think we agree if there's redactions on the  
6 other one that need to be made, we would make them.

7 THE COURT: All right.

8 MR. PAULOS: I think at this point, Your Honor, that  
9 that's our main objections.

10 THE COURT: That's fine. And I think we go to 2744.

11 MR. PAULOS: This is --

12 THE COURT: This is a -- no, I'm sorry. Go ahead.

13 MR. PAULOS: This is an e-mail that attaches a fax from  
14 Chris Jones, Director of Ohio EPA -- or, excuse me, from Cindy  
15 Hafner, who is the Chief of DERR, to Chris Jones, and it's  
16 regarding the CAT Team report on C-8. There's references to  
17 Mr. Bilotto. His name is on here.

18 THE COURT: So we will redact that.

19 And the consent order, the jury is going to hear about.  
20 So we don't need to redact that. Is that your main issue,  
21 Mr. Bilotto?

22 MR. PAULOS: There is some reference to the plaintiff's  
23 letter and some terminology that we understand from Court rulings  
24 may not --

25 MR. MACE: We will coordinate with them on the

1 redactions.

2 THE COURT: Anything like that will come out.

3 All right. 2745. Is this the same thing we saw -- Let  
4 me see this for a second.

5 MR. PAULOS: That's correct.

6 THE COURT: Same document. I don't think we want to do  
7 this twice.

8 MR. MACE: Well, actually, Your Honor, the cover page is  
9 different. And so, again, the reason this might become relevant  
10 depends on what the plaintiffs do in their case-in-chief, but the  
11 fact that the U.S. EPA -- both the U.S. EPA and the West Virginia  
12 DEP knew about Ohio's analysis, Ohio's review of the CAT Team  
13 findings, which may or may be relevant based on what the  
14 plaintiffs put in their case.

15 THE COURT: So -- But the first one --

16 MR. MACE: So what's new is the cover e-mail.

17 THE COURT: The Chris Jones cover -- I'm sorry, the Chris  
18 Jones document that says 2744 has a cover page where someone from  
19 DuPont is e-mailing this to other people at DuPont.

20 MR. MACE: Okay, you went back on a document.

21 THE COURT: It's the same -- It's the cover to the same  
22 document in each case, the Chris Jones document.

23 MR. MACE: The attachments are the same.

24 THE COURT: The attachments are the same. But the first  
25 one has a cover letter from a David Rurak at DuPont --

1 MR. MACE: Right.

2 THE COURT: -- to a bunch of other people at DuPont with  
3 the attachment -- same attachment. This is from Dee Ann Staats,  
4 Dr. Staats, to all these people, right?

5 MR. MACE: Yes, U.S. EPA. It comes out of the EPA's  
6 files.

7 On that prior document, Your Honor, you will recall that  
8 one of the issues we had with this was whether we could only use  
9 the state of the knowledge at the time or use it for DuPont's  
10 knowledge. This links it up, that DuPont did in fact have it.

11 THE COURT: That's the first one of these.

12 MR. MACE: Right.

13 THE COURT: The second one is a Dee Ann Staats document.

14 MR. MACE: Yes, sir.

15 THE COURT: So how do you -- How do you contend that's  
16 admissible?

17 MR. MACE: Because it was produced under the U.S. EPA's  
18 file. There is no contention this isn't authentic. It's self  
19 authenticating because of the e-mail addresses.

20 THE COURT: Authentication, you're referring to --

21 MR. PAULOS: This isn't authenticating documents, Your  
22 Honor.

23 MR. LEBER: The heading on the one before has pretty  
24 distinctive characteristics.

25 THE COURT: What I want to talk about is whether this

1           qualifies as a business record -- or, I'm sorry, a record of -- as  
2           a public record, a record or statement. I mean certainly the  
3           Chris Jones document does. But you have got an employee of the  
4           West Virginia DEP just sending an e-mail to other people.

5           MR. MACE: To the U.S. EPA.

6           THE COURT: Well, to a lot of people.

7           MR. MACE: It proves up, if needed -- and I don't know if  
8           it's needed or not -- but it proves up that both West Virginia and  
9           U.S. EPA had OEPA's analysis.

10          MR. LEBER: We're not trying to prove the truth of the  
11           matter asserted in these documents, Your Honor, just the fact they  
12           were sent.

13          MR. MACE: If it becomes relevant, were they on notice of  
14           this?

15          THE COURT: When I was in law school, I heard a professor  
16           say, it's not about the money. Think of that when you hear  
17           someone say, it's not for the truth of the matter. I'm just  
18           kidding you. But you get my point. It always seems to come in  
19           for the truth regardless.

20          Well, the only thing we're arguing about is the Dee Ann  
21           Staats cover letter. The document itself, I'm not worried about.  
22           And you're saying you are not sure you're going to use --

23          MR. MACE: Right.

24          THE COURT: We'll do a side-bar before we do.

25          MR. MACE: Okay.

1                   THE COURT: All right. 2761.

2                   MR. PAULOS: Yes, Your Honor. This appears to be a  
3 letter to Todd Kelleher at the Division of Drinking and Ground  
4 Water --

5                   THE COURT: Let me back you up. Who is David Boothe?

6                   MR. MACE: He's a DuPont employee, Your Honor, who was  
7 giving the context with some of the regulatory agencies with  
8 regard to C-8.

9                   MR. PAULOS: It's an unsigned letter. And I think that  
10 Mr. Mace just said that letters were signed when they were sent.  
11 There is no proof this was ever sent, or received, to the person  
12 who it was intended to be sent. So --

13                  MR. MACE: But these are -- I'm sorry, I didn't mean to  
14 interrupt you.

15                  MR. PAULOS: That's okay. I just -- We believe it is  
16 hearsay and should be excluded as such.

17                  MR. MACE: It's the Bates number -- and I don't purport  
18 to have them all memorized, but I believe this is out of the  
19 production of U.S. EPA. So we do know they got it -- I'm sorry,  
20 the Ohio EPA because of the Bates number.

21                  THE COURT: How hard is that to dig out?

22                  MR. MACE: We should be able to link that up for you.

23                  MR. PAPANTONIO: Link it up --

24                  THE COURT: If this is in the EPA's files, that's what  
25 you are saying.

1 MR. MACE: Yes, sir. Ohio EPA.

2 THE COURT: It shows that EPA received it, then that  
3 addresses your issue. So right now we don't have that. But if it  
4 is produced, it will be a different matter.

5 MR. PAPANTONIO: That's correct.

6 MR. MACE: Yes, sir.

7 THE COURT: All right. The next, 2764, is an excerpt  
8 from the Federal Register.

9 MR. MACE: Yes, sir. This gets in that same category.  
10 Depending on where they go with these TSCA issues, we may need to  
11 use this with regard to what the guidance was over the years --

12 THE COURT: All right.

13 MR. MACE: -- on when you report.

14 THE COURT: On reporting requirements.

15 MR. MACE: Yes, sir.

16 THE COURT: It's not being offered at this point.

17 MR. MACE: We may to --

18 THE COURT: What we are doing -- and sometimes this is  
19 unavoidable -- but wading into the law, and that's always  
20 something that --

21 MR. PAPANTONIO: It's no different, judge, talking about  
22 what a statute was on a particular issue, and you're getting to a  
23 law interpretation but --

24 THE COURT: Well, that's a concern that I have. We will  
25 hold on this now until we see if it's offered. It's not being

1 offered at this point --

2 MR. BILOTT: Your Honor, I apologize for going backwards.

3 THE COURT: We only have two left, and you are going to  
4 take us backwards?

5 MR. BILOTT: I'm afraid so. On D.2745.

6 THE COURT: Hold on one second.

7 All right. This is a Dee Ann Staats matter. I held on  
8 this. This is not in.

9 MR. BILOTT: Correct. But one thing we want to note is  
10 it's incomplete. At least the version I have only has the first  
11 two pages.

12 THE COURT: So you have the two copies of, and they both  
13 -- It's -- The first one is complete. The second one isn't?

14 MR. BILOTT: Correct, Your Honor.

15 THE COURT: That, I am assuming, was a copying error.

16 MR. MACE: I am assuming.

17 THE COURT: So it's going to be the whole document,  
18 that's what you are suggesting, Mr. Bilotto?

19 MR. BILOTT: Yes, that would be -- Well, we want to make  
20 sure that on 2745, which they're representing is the version that  
21 allegedly was sent to EPA --

22 THE COURT: Oh, I see, whether the whole was sent by  
23 Dr. Staats.

24 MR. BILOTT: Correct.

25 THE COURT: Can you check on that?

1                   MR. MACE: Yes, sir.

2                   THE COURT: Now we're at 2873. Who is Stuart Bruny,  
3 Chief-SEDO, who would that be? Anybody know what SEDO means?

4                   MR. MACE: I think that was one of the -- that's one of  
5 the departments in Ohio EPA. This is out of the Ohio EPA  
6 production. You can see that at the bottom.

7                   THE COURT: What's the objection here to 2873? It's the  
8 first paragraph, right? No, there's more. It looks like the  
9 whole.

10                  MR. MACE: It's the C-8 update. So we don't need any of  
11 the topics that are discussed below that. Only the C-8 update  
12 section.

13                  MR. BILOTT: Is this being used to be something --  
14 allegedly notice or notice or knowledge of DuPont? Because as  
15 indicated here, it actually came out of the Ohio EPA files, not  
16 DuPont -- and then was produced by us actually to DuPont later.  
17 So I'm not sure how this would relate to what DuPont knew at the  
18 time.

19                  MR. MACE: It describes the facts back at the time in  
20 terms is what was being done with this public meeting and with the  
21 GIST team and the sampling that was going on.

22                  THE COURT: Would this arguably be both the business  
23 record and also public record? It's going to come in on that  
24 basis. All right.

25                  And 2885. Who is Michael Neal, who was the author?

1                   MR. PAULOS: Your Honor, this is an e-mail from Mike Neal  
2 to the fluoropolymers group at DuPont. It had attached to it two  
3 poster presentations allegedly -- since we don't know, and they  
4 are not attached to this document -- that are about how C-8 was  
5 used to treat cancer patients.

6                   THE COURT: What's the problem? Is Mr. Neal in?

7                   MR. MACE: Well, Mr. Neal, Your Honor, is -- he's a third  
8 party, but he was sending these. You can see down below  
9 Mr. Kennedy, who's from DuPont, he's corresponding with Mr. Neal  
10 who's with Plastics Europe, which is a trade group in Europe, and  
11 also to Bock --

12                  THE COURT: Is he in public relations?

13                  MR. MACE: Kennedy is a toxicologist.

14                  THE COURT: How about Neal?

15                  MR. MACE: Neal is -- I'm not sure what his title is, but  
16 he's with this trade organization. And you will recall there was  
17 some discussion about this clinical trial that was done where  
18 doses of C-8 were being given to cancer patients for treatment  
19 purposes, and Your Honor had a concern at the last trial that we  
20 did not link up when DuPont knew about that. Because I had  
21 represented to the Court this was part of what DuPont was  
22 considering when it was evaluating its conduct, what to do prior  
23 to the Science Panel's finding, and you had a concern that we  
24 hadn't adequately proven up that we knew about that prior to 2012,  
25 prior to the Science Panel's report. So this helps link up the

1 date of when DuPont knew about that.

2 MR. PAPANTONIO: Judge, if we use that, we will have  
3 other documents to say -- If they use that, we'll have other  
4 documents that say not only is it not a treatable use for cancer  
5 but also don't even try to go forward with this study. There's a  
6 lot more to this story.

7 THE COURT: There are so many issues in the case -- and  
8 this doesn't come out as addressing this particular issue with the  
9 exhibit -- but as a general matter, it turned out not to work,  
10 first of all.

11 MR. MACE: That's not true, Your Honor. So these are  
12 screening studies that were done. And the fact was they couldn't  
13 get a response out of the people even though they were giving them  
14 very high doses.

15 MR. PAPANTONIO: They had to stop giving it to them  
16 because it had the risk of killing people.

17 MR. MACE: No, sir, that's not true. Your Honor, that is  
18 a total mischaracterization and --

19 THE COURT: Wait, wait, wait. What I am simply asking is  
20 nobody is being treated with C-8 for cancer today, right?

21 MR. PAPANTONIO: They're not, judge.

22 THE COURT: The reason I say that is I want to get this  
23 out of the case. It doesn't seem to go -- It's going to get us  
24 down a blind alley.

25 MR. MACE: Plaintiffs are trying to picture to the jury

1           that decades ago DuPont should have concluded -- and they are  
2           contending did conclude but tried to hide it -- that C-8 was a  
3           very hazardous material. Nobody would allow one molecule to be  
4           exposed to anyone.

5           The fact that with DuPont's knowledge, they were actually  
6           doing a clinical trial, intentionally giving it to people in  
7           extremely high doses prior to the Science Panel's finding helps  
8           rebut their claim that DuPont knew or should have known, that this  
9           was extremely hazardous, and nobody should be exposed to.

10          THE COURT: I want to scrub this pretty hard. Now this  
11           document really doesn't take it -- I mean this is minimal, right?  
12           It doesn't have anything specific about who was treated, how they  
13           were treated, when they were treated. We have got a reference  
14           literally to a poster, right?

15          MR. PAPANTONIO: That's all this is.

16          MR. MACE: That's with this document.

17          THE COURT: But anything else to go it, with the whole  
18           theory --

19          MR. MACE: Yes, there's Dr. Rickard's testimony about  
20           what he knew about that as he was evaluating DuPont's conduct and  
21           what steps they should take prior to the Science Panel's finding.  
22           And the reason it's important was to address Your Honor's concern,  
23           well, I hear all that from Dr. Rickard, but I haven't seen proof  
24           that they knew that --

25          THE COURT: At what time?

1 MR. MACE: The timing --

2 THE COURT: So you're saying this goes with time -- This  
3 is pretty much a timing issue.

4 MR. MACE: The timing of the knowledge.

5 MR. O'BRIEN: It's a 403 issue at some point in the  
6 treatment because with chemotherapy, you give people poison to  
7 kill stuff like tumors. So they give this -- We're getting into a  
8 pharmacological/pharmokinetics trial here --

9 THE COURT: That's a logical leap I can't make when  
10 somebody -- I assume these are pretty seriously ill cancer  
11 patients we are talking about?

12 MR. MACE: Yes, sir.

13 THE COURT: So medical science would say if you are in a  
14 grave risk of death, that's the time to take grave risks with  
15 treatment. That doesn't mean -- I don't think you can medically  
16 imply from that, just as a lay person implies, because people *in*  
17 *extremis* would be given, that that meant the chemical wasn't  
18 harmful. I'm not prepared to make that link.

19 MR. DOUGLAS: Like baby aspirin to prevent a heart  
20 attack.

21 MR. PAPANTONIO: We would be opening such a door here, we  
22 would have a totally different case, and it is not even necessary.

23 MR. MACE: I think it is highly probative, Your Honor, to  
24 DuPont's evaluation --

25 THE COURT: I've been caught cold on this, and I hate to

1           keep making you brief things, but let's do another -- By the way,  
2           if you would like, I can do you all a favor if you want a page  
3           limit on these or not? It's important enough if you want to go  
4           ahead or if you can think you can agree?

5           MR. MACE: I think both parties are fairly reasonable. I  
6           don't think we need a page limit to keep it down.

7           THE COURT: But this is going to be the issue: Should  
8           the jury hear about --

9           MR. MACE: Clinical trials.

10          THE COURT: -- clinical trials with cancer patients using  
11           C-8 as a possible treatment? In other words, on DuPont's side  
12           tell me why it's relevant, probative, not unfairly prejudicial.  
13           And the other side, tell me the opposite.

14          MR. PAPANTONIO: A ruling would be helpful because we  
15           would be asking our doctors, Dr. Bahnsen, would you treat somebody  
16           for cancer with C-8? I think there might be an interesting  
17           response to that from our witness.

18          THE COURT: All right. We will address that.

19          Now we are on the last exhibit by my count.

20          MR. MACE: The record shows applause.

21          THE COURT: After two whole days of this, I can see the  
22           light at the end of the tunnel.

23          DuPont Acts on Suspect Chemical. This an *Industrial*  
24           *Chemical News*. This goes to what issue?

25          MR. MACE: Well, again, in terms of DuPont's activities

1 being public knowledge, I mean their claim, the plaintiff's claim,  
2 id that DuPont is sweeping everything under the carpet, and nobody  
3 knows what's going on. But the fact is that the trade publication  
4 *Industrial Chemical News* was reporting on this. So it gets -- You  
5 will recall you had *The Wall Street Journal* and *The New York Times*  
6 articles earlier, you get them in one time. But this is a similar  
7 article that was also in the trade publication.

8 THE COURT: Do we know the year?

9 MR. MACE: 1981.

10 MR. PAPANTONIO: There's not -- Two thing about this,  
11 judge. This -- He keeps saying, we've made the argument that they  
12 hid it from everyone. No, our argument is they hid it from the  
13 people that were drinking it every day for 50 years. That's our  
14 argument, not this hide this broadly from the community, that they  
15 hid it from the very people they were poisoning with it.

16 THE COURT: Let me make a --

17 MR. PAPANTONIO: It's a broad generalization.

18 THE COURT: I have a narrower question, *The Wall Street*  
19 *Journal* and *The New York Times*, they don't serve it anywhere in  
20 Ohio or West Virginia in great numbers, but people read it; and  
21 local papers oftentimes will pick up stories. I'm not concerned  
22 about those two journals. This is the *Industrial Chemical News*.  
23 This wouldn't be read by the average consumer of water in these  
24 districts. Wouldn't you agree?

25 MR. MACE: That's true, Your Honor.

1                   MR. PAULOS: Your Honor, I believe your prior ruling was  
2 the other articles were admissible because they were submitted to  
3 EPA.

4                   THE COURT: That's true.

5                   MR. PAULOS: This was --

6                   THE COURT: I am going to let you get into *The Wall*  
7 *Street Journal* and *The New York Times*. But this is a trade  
8 journal. It isn't widely disseminated.

9                   I think that's all the exhibits, right?

10                  MR. O'BRIEN: Your Honor, may we address one issue --  
11 yes, it is. May we address one issue because yesterday we learned  
12 for the first time that Laura Korte would be the corporate rep or  
13 corporate designee of the trial of this case. When DuPont in 2013  
14 filed a Rule 26 disclosure at the commencement of this MDL, there  
15 was no disclosure of Laura Korte as a person with knowledge.

16                  THE COURT: Let me back up. Counsel, she's going to be  
17 at counsel table?

18                  MR. MACE: She's the corporate representative, so she'll  
19 be at counsel table.

20                  THE COURT: It was Dr. Rickard at the last trial.

21                  MR. MACE: Yes, sir.

22                  MR. O'BRIEN: And she was not identified any time as a  
23 witness in Bartlett. The first time she was ever identified in  
24 this case was in February of 2016, when DuPont's witness list  
25 identified her with 49 other may call witnesses. Compared to --

1                   THE COURT: Has she be deposed?

2                   MR. MACE: She has been three times, Your Honor.

3                   MR. O'BRIEN: That was in the *Little Hocking* case. So  
4 here's the good cause, that we understand that she --

5                   THE COURT: What are you asking for?

6                   MR. PAPANTONIO: A deposition, Your Honor.

7                   MR. O'BRIEN: Next week.

8                   THE COURT: All right. When was she first identified on  
9 the witness list?

10                  MR. O'BRIEN: February 15, 2016.

11                  MR. MACE: She was actually identified, Your Honor, back  
12 in 2013 when the list of depositions was reviewed with regard to  
13 depositions in the prior cases.

14                  THE COURT: We kept that -- I have made a ruling, that  
15 you wouldn't -- you would have to move to add to these.

16                  MR. MACE: It's more than that, Your Honor. In PTO no.

17                  8 --

18                  THE COURT: It bears my signature. I do remember this  
19 part.

20                  MR. MACE: In PTO 8, what you said was with regard to  
21 these past cases, there were a bunch of depositions taken --

22                  THE COURT: We weren't going to undo it all --

23                  MR. MACE: All of it was available for use in this MDL.  
24 Depos in prior cases may used. No party may re-depose any such  
25 witness except on motion and showing of good cause. Any such

1 motion shall be filed no later than three months from the date of  
2 this order.

3 We had put in a placeholder for about three people we  
4 thought we might want to re-depose. We ended up not seeking that.  
5 But it was expressed at the beginning of the --

6 THE COURT: We debated this a long time. I remember  
7 well.

8 MR. PAPANTONIO: She has gone from may call on the bottom  
9 of the witness list to now she's corporate rep. She's sitting  
10 here.

11 THE COURT: I want to get the facts here. How many  
12 people are on the may call list?

13 MR. O'BRIEN: Forty-nine.

14 THE COURT: And how many are on the will call list?

15 MR. O'BRIEN: Five.

16 THE COURT: That's the problem. How long a deposition do  
17 you think this would take?

18 MR. O'BRIEN: Five hours.

19 MR. PAPANTONIO: I think five hours.

20 THE COURT: Extensive.

21 MR. MACE: We are on the eve of trial. All she's doing  
22 is sitting there, Your Honor. She's the corporate representative.  
23 She's on the may call list. We do not intend to call her.

24 THE COURT: Wait. She's coming, but she's not  
25 testifying.

1                   MR. MACE: She's sitting there as the corporate rep.

2                   THE COURT: As we speak, you are not planning on calling  
3                   her.

4                   MR. MACE: Right.

5                   MR. PAPANTONIO: Judge, we have the right to call her  
6                   adversely.

7                   THE COURT: You do. The question is whether you have the  
8                   right to depose her.

9                   MR. PAPANTONIO: What I am trying to say, the first time  
10                  we heard this was the first time the Court heard, well, Ms. Korte  
11                  is going to be here, not Dr. Rickard. So they have, of course,  
12                  they have held this off to the last minute. I ought to be able to  
13                  question her. Nobody in this MDL has been able to question her at  
14                  all.

15                  THE COURT: Tell me about her background. What's her  
16                  title, first of all?

17                  MR. MACE: John, do you know Korte's title?

18                  MR. GALL: My first chance to speak on the record. I am  
19                  sorry, I do not recall the title.

20                  MR. MACE: Mr. Brogdon could have --

21                  THE COURT: Generally, what's her background with DuPont?

22                  MR. O'BRIEN: She's a business manager of sustainability.

23                  MR. GALL: I have not spoken with her, but I believe she  
24                  had something to do with in the later stages organizing the  
25                  monitoring DuPont's response to some of the C-8 issues.

1                   MR. MACE: I don't think she had any involvement with C-8  
2 not until 2009.

3                   MR. PAPANTONIO: Your Honor, this very response gives you  
4 an idea of how late this has developed. That's what I am trying  
5 to say. This is what she -- This is the background on her. So  
6 they wait until yesterday. And they say, oh, we are not going to  
7 put Rickard as our PR. And Ms. Korte is just going to sit there  
8 and watch the trial. We still have a right to be able to call the  
9 public rep --

10                  THE COURT: Again, there is no question you have a right  
11 to call her. There is no dispute about that.

12                  Your argument is you really didn't feel like taking 49  
13 depositions --

14                  MR. PAPANTONIO: That is correct. Plus we -- excuse me.  
15 We said to the Court back then the use of the -- the use of time  
16 and expense going through 49 witnesses, first of all, is unheard  
17 of in an MDL. They always are required to narrow their witnesses.  
18 They didn't do that here, and they didn't do it for a reason.  
19 Rickard didn't go well for their PR. Great. Now they're going to  
20 try this woman.

21                  Judge, I ought to be able to ask her from the MDL -- from  
22 the MDL standpoint some questions before she sits in that chair as  
23 a PR.

24                  MR. MACE: That's totally inaccurate. Rickard did an  
25 excellent job as the corporate rep. We can choose whomever we

1 want --

2 THE COURT: We don't have a jury here to decide that.

3 MR. MACE: But that's not the issue. The issue is she  
4 was deposed three times. The understanding and agreement was if  
5 anybody wanted to depose anybody again, they had to show this back  
6 in 2013 so we wouldn't get in this situation.

7 THE COURT: Do you know when she was deposed? What years  
8 are we talking about?

9 MR. MACE: Yes, she was deposed twice in 2013 and once in  
10 2014.

11 MR. BILOTT: All of the cases before we've talked about  
12 in the prior C-8 actions involved some of the attorneys in this  
13 room. The *Little Hocking* case involved none of the plaintiffs'  
14 attorneys in this room. DuPont's attorneys sitting here were  
15 involved in those depositions, but none of us were. So none of  
16 the attorneys here had any opportunity to depose --

17 THE COURT: It does mention the *Leach* case in terms to  
18 what discovery would be used from that case to this case.

19 MR. MACE: Actually, Your Honor, and there are other  
20 lawyers, but it was defined as the past C-8 cases, which *Little*  
21 *Hocking* was expressly listed -- and I don't have that order with  
22 me --

23 MS. NIEHAUS: Excuse me. CMO 13 is the Case Management  
24 Order for this case, for Freeman. It actually identified *Little*  
25 *Hocking* as one of the prior cases.

1                   MR. PAPANTONIO: Judge, this is being presented as if --

2                   THE COURT: In all honesty --

3                   THE LAW CLERK: It refers to *Little Hocking*. It refers  
4 to like the four cases that were on there and --

5                   THE COURT: In this particular case. This is a general  
6 order. This particular case lists them all?

7                   MS. NIEHAUS: CMO 13, I think it's 4B -- A maybe --

8                   THE LAW CLERK: It was all, referring to your order, that  
9 you didn't want them to redo everything that had been done in the  
10 C-8 cases. So they all agreed. This was never really debated,  
11 this issue.

12                  THE COURT: But the other, the order in this case is  
13 saying, you mentioned all four.

14                  MR. MACE: And it also indicated -- It also indicated, as  
15 your Court's order did in *Bartlett*, if somebody showed up on a  
16 witness list that they hadn't been deposed, so it wouldn't even  
17 fall into that, they would have 45 days from the day of  
18 identification to depose them. So identified in February, we're  
19 sitting here at the end of May or the middle to May --

20                  THE COURT: So what I -- I guess the other issue is the  
21 depositions are already taken. Did it cover the areas involved in  
22 this case?

23                  MR. PAPANTONIO: No, it do not, judge. Can I ask the  
24 Court, please, as a matter to equity, if nothing else, yesterday I  
25 sat here, and I explained that they had passed on complying with

1           the Court order on more than 120 documents. The Court said -- We  
2           went forward with that anyway. We said fine. This is just a  
3           matter of equity. They are trying to say, well, we did something  
4           wrong by not taking 49 witnesses? I am talking about four -- four  
5           or five hours with this witness to be able to talk to her before  
6           she comes. That's equitable, judge. I know this isn't a court of  
7           equity, but we have seen that, on playing this very --

8                 THE COURT: This is both a court of law and a court of  
9                 equity.

10                MR. MACE: But it's beyond that, and that's a different  
11                issue, Your Honor. It's not that we've sprung them with 49 new  
12                names. These were people largely that had been previously  
13                deposed, and these are worth sitting here with the defendant  
14                rebutting what they throw at us. So we, obviously, need a little  
15                flexibility, why this list is may call.

16                THE COURT: The problem is it's not just a deposition.  
17                It's that only -- We're getting into different areas. And then --  
18                I'm just to look at this both ways. You will be opening up doors  
19                that can't be opened any further because it's too late in the  
20                discovery process.

21                MR. O'BRIEN: But the issue is, it's in good cause in  
22                2013 at the commencement of this MLD, when they were supposed to  
23                identify the witnesses with pertinent information, they don't  
24                identify her. They don't identify the deposition that had been  
25                taken of her.

1                   THE COURT: I mean one way to look at this, I understand  
2 you're speaking of optics. I'm speaking of, legally speaking,  
3 she's just sitting there. Her satisfying being the corporate rep  
4 doesn't change, other than the fact that she's going to be present  
5 in the courtroom.

6                   MR. PAPANTONIO: Well, judge, here is -- There are no new  
7 doors that will be opened. The only issues that I will be  
8 questioning her about are the issues we've been talking about here  
9 for two days.

10                  THE COURT: All right. Here's what I am going to do. I  
11 want this to be a relatively short deposition. I definitely don't  
12 want it to exceed five hours, hopefully a lot shorter. And I want  
13 it to be confined to what we all know are the triable issues in  
14 the case.

15                  MR. PAPANTONIO: Yes, sir.

16                  THE COURT: Nothing new.

17                  MR. PAPANTONIO: Not at all.

18                  THE COURT: And I will let you work out the schedule.

19                  MR. PAPANTONIO: Thank you.

20                  THE COURT: Now I think everybody looks pretty whipped.  
21 I feel pretty whipped. The only other matter we could address  
22 today, if you would like with all of us here, is the issue of  
23 other matter discharged in the Ohio River. Do you have enough  
24 energy to continue?

25                  MR. DOUGLAS: Your Honor, I have been here all day. This

1           was my one solo assignment to argue this.

2           THE COURT: And you're ready to go.

3           MR. DOUGLAS: I'm faced, however, with a flight that's  
4           leaving. I could make it quick or ask for the opportunity to just  
5           brief what we would have --

6           THE COURT: What time is your flight?

7           MR. DOUGLAS: It's six o'clock.

8           THE COURT: You have got to get out of here.

9           I think -- I have DuPont's supplemental. Are we done  
10          with the briefing? I think we are, aren't we? Anything else you  
11          want to file?

12          MR. DOUGLAS: We would like to put -- file a brief. If  
13          we could have until Monday.

14          THE COURT: All right. Any objection to that?

15          MR. MACE: No, Your Honor.

16          THE COURT: Truthfully, I don't want to waste your time.  
17          I am going to grant the motion *in limine*. I just want to tell you  
18          that not simply because I want to give you an opinion, but I want  
19          you to be prepared for the case rather than make you do a useless  
20          exercise. Briefly, you will get the opinion -- I want a summary  
21          -- By the way, tremendous arguments. I don't want to just piece  
22          this apart, but there are several things in here. You can't  
23          compare pounds of different chemicals, and that's throughout here.  
24          You know, a pound of C-8 versus a pound of some other chemical,  
25          there would have to be expert testimony that would make those

1 anywhere near -- We're going to use some sort of hazard basis.

2 The other thing is I don't doubt there are other  
3 chemicals that can cause testicular cancer, but this becomes an  
4 expert opinion, particularly with regard to causation. So if  
5 there were medical testimony and expert testimony to go with this,  
6 I slight have a somewhat different view, but it would take a lot  
7 to do that. So at this point there is no expert, to my knowledge,  
8 who has given an opinion based on these chemicals. So that's the  
9 long and the short.

10 MR. DOUGLAS: I would also just add that the articles,  
11 the three articles they have cited in support of any connection  
12 between the chemicals and testicular cancer, are some of the  
13 flimsiest things I have ever seen in the medical literature. One  
14 has to do with seamen and testicular cancer.

15 MR. MACE: Your Honor, if I could just --

16 THE COURT: What I want to be clear, we have the Sixth  
17 Circuit conference for four days next week, and I have got to be  
18 there all four. I want to make sure we have everything. If you  
19 need to go to catch your plane, go ahead any time you need to. I  
20 just want to clear up what's left to be decided.

21 I will give you a final decision on the proposed limiting  
22 instructions. You can expect that. We have a couple of  
23 outstanding motions *in limine* to be ruled on. And you're going to  
24 brief a couple of the issues we debated today about exhibits. And  
25 I think that's everything.

1                   MR. MACE: And the *Daubert* issue on Redlich.

2                   THE COURT: That's right.

3                   THE LAW CLERK: And the tort reform and the bifurcation.

4                   THE COURT: That's right. We will try to get those to  
5 you as -- again, you're owed an opinion on this, but there I will  
6 do you a favor by giving a heads up. On the bifurcation, it's  
7 going to remain the same. You will get an opinion on. I don't  
8 want you to be up in the air on how you prepare your case. The  
9 other matters, we will go through the briefing.

10                  MR. MACE: Your Honor, I did want to make my record,  
11 clarification, if needed, on the Ohio River issue because -- So  
12 the points you raised and counsel raised went to the process of  
13 cross-examining the specific causation doctor about the  
14 thoroughness of the investigation. So I heard and understood  
15 that.

16                  But we had three independent bases for getting into it.  
17 One, that was relevant to breach of duty industry standard of  
18 care, and that these were lawful --

19                  THE COURT: I just wanted to give you a summary so you  
20 wouldn't have to waste more time on it. I get it. I considered  
21 all these arguments.

22                  MR. MACE: And the claimed fear of future cancer.

23                  THE COURT: I saw that.

24                  MR. MACE: Right, and then --

25                  THE COURT: The issue of punitive damages.

1                   MR. MACE: Right, reprehensibility. So even for the  
2 second phase.

3                   THE COURT: At this point, you might ask me to  
4 reconsider, but at that this point I'm not prepared to say yes.

5                   MR. PAPANTONIO: Judge, is there any way that I can -- we  
6 can get a few minutes to walk around your courtroom so I can look  
7 at some logistics?

8                   THE COURT: You can be here as long as you want to be.

9                   MR. PAPANTONIO: Thank you.

10                  THE COURT: You have the tech people on both sides, you  
11 have been there already?

12                  MR. MACE: We have. And what we had talked about, Your  
13 Honor, I think we talked about this yesterday, perhaps was that  
14 they're going to, after the jury is selected, set up behind the  
15 rail --

16                  THE COURT: So you know, next week, if you want to send  
17 people over to just become familiarized with the technology, it's  
18 the exact same system as Judge Marbley, different display system.  
19 That's all.

20                  MR. MACE: We are going to move our refrigerator and  
21 supplies into the work room. Thank you, sir.

22                  THE COURT: All right. Well, thank you for two intense  
23 days. Nice to see all of you. We'll meet -- We are starting a  
24 week from this coming Tuesday. Let's plan around 8:15 in the  
25 morning to make sure there are no big snags. I am reachable by

1 phone any time. I will be in on Friday. So if you have -- any  
2 things that really can't wait, just call Ms. Barrick. We will try  
3 to take care of things. We can typically take care of that by  
4 conference call.

5 MR. PAPANTONIO: Meet in your office?

6 THE COURT: Yes.

7 MR. MACE: And I think that Mr. Butler and Mr. Gall are  
8 conferring on the jury forms. They were not complete yesterday  
9 apparently.

10 THE COURT: All right. Do either of you have grave  
11 concerns that we have a problem or -- I don't care if you have a  
12 couple people to debate, but is it more systemic? Or how do you  
13 see this? Mr. Gall.

14 MR. GALL: I think Mr. Butler and I will be able to come  
15 up with a list. I think there are somewhere between five and ten  
16 that look like they shouldn't be a part of it. But I will talk  
17 about that. We only saw part of the material from the jurors, not  
18 the complete set.

19 THE COURT: So what -- We'll leave it in an official way.  
20 If you both agree that somebody should be excluded, then that  
21 person will be excluded. And I don't -- You don't have any issue  
22 with the people who have already been excluded, do you? I am  
23 happy to resolve those.

24 MR. GALL: Not really, Your Honor. The group is mostly  
25 people who have prepaid vacations or --

1                   THE COURT: I have great confidence in Fran Green, who is  
2 not a lawyer, but if you think they've made an error in the  
3 review --

4                   MR. MACE: One issue. As I understand Mr. Gall, Your  
5 Honor sent out two questionnaires. There was one complete set --  
6 stack that did not have the second questionnaire.

7                   MR. GALL: I am color blind, apparently like Your Honor,  
8 so that the court sent out a jury questionnaire that's a darker  
9 color, and then there was a supplemental set. As to the 70 that  
10 are in the precertified group, there are none of the standard  
11 forms. And they aren't in there. So I understood from Fran that  
12 we were going to get those --

13                  THE COURT: Okay. She has those --

14                  MR. GALL: She has them. We're not going to get that  
15 stack until next week. I will work with that stack --

16                  THE COURT: Take a look at those. Let me know if you  
17 have a disagreement. I think our goal is between 50 and 60  
18 people. We have gone through the first couple of chutes,  
19 including anybody who can't sit for four weeks. That will be the  
20 biggest impediment.

21                  MR. GALL: There were five to ten that fall -- a couple  
22 that are just outliers, that made comments on the form that seemed  
23 very peculiar. But there are some that said they were not  
24 available. Of the group of 70, I think 35 claimed they are  
25 unavailable, and some of those offered prepaid vacations excuses

1 and the like that would have been excused.

2 I don't think there's going to be an issue, but there's  
3 -- we need to take a look at both sets before we're going to see  
4 what's there.

5 THE COURT: All right. Very good. Thank you both. All  
6 right. We will be in touch.

## C E R T I F I C A T E

I, Laura L. Samuels, do hereby certify that the foregoing is  
a true and correct transcript of the Continued Proceedings of the  
Final Pretrial Conference on the Deposition Designations and the  
Admissibility of Exhibits in the case of: E. I. du Pont de Nemours  
and Company C-8 Personal Litigation, case no. 2:13-md-2433, before the  
Honorable Edmund A. Sargus, Jr., Chief Judge, in the United States  
District Court, Southern District of Ohio, Eastern Division, on the  
date indicated, reported by me in shorthand and transcribed by me or  
under my supervision.
